Social Theory and Modernity Timothy W. Luke, 1990-10-01 Social Theory and Modernity combines the analytical techniques of political theory and comparative politics as a method for conducting innovative inquiry and research in political science The focus of political theory for example results in new issues for historical and cross national comparative analysis whereas comparative analysis provides new parameters for analyzing the ideology of social institutions In presenting this method Luke elaborates upon Rousseau's discursive style and critical methods Marx's historical materialism Gramsci's theoretical tactics Marcuse's instrumental rationality Cabral's theories of critique and revolution Weber's interpretive method and Foucault's system of political and social analysis It concludes by offering an incisive analysis of the moral and ideological influence of behavior and the link between ideology and political economy especially in modern society Social Theory and Modernity is essential reading for professionals and students in the fields of political theory history comparative politics sociology anthropology social philosophy and cultural studies Luke's book is a tour de force He writes critical theory in the best sense applying the ideas of the Frankfurt School Gramsci and postmodernism to real social and political issues today Social Theory and Modernity avoids arid exegesis in favor of engaged and lucid analysis of the global problematics of late capitalism Not content simply to rehearse the masters of critical theory Luke refreshes and extends their ideas by developing his own important theoretical voice Luke is witty and pulls no punches This accessible book will appeal to readers in a wide range of social science disciplines notably including political science and sociology This book reinforces Luke's reputation as one of the two or three leading critical theorists working today Ben Agger SUNY University at Buffalo This collection of essays provides a rich reading for it collates a lot of innovative ideas in the present day Marxist theory Financial Express

Radical Paradoxes; Dilemmas of the American Left: 1945-1970 Peter Clecak, 1973

Modern Philosophies of Human Nature P. Langford, 2012-12-06 General Argument My aim is to survey some of the most influential philosophical writers on human nature from the time that Augustine codified Christian belief to the present During this

period philosophical opinions about human nature underwent a transformation from the God centered views of Augustine and the scholastics to the human centered ideas of Nietzsche Freud and Sartre While one aim has simply been to provide a handy survey I do have three polemical purposes One is to oppose the notion that the modernism of more recent writers was produced by methodological innovations According to both Freud and Sartre as well as other key figures like Lacan and Heidegger their views were the product of new methods of investigating human nature namely those of psychoanalysis and the phenomenological reduction Psychoanalysis claimed to use the interpretation of both dreams and the relationship between analyst and patient to penetrate the unconscious Phenomenology has claimed that trained philosophers are able to obtain a privileged view of consciousness by a special act of thought called the phenomenological reduction which enables them to view consciousness without preconceptions On many issues my sympathies are with Nietzsche rather than with Freud or phenomenology This is also the case regarding methodology Nietzsche saw quite clearly that the possibility of popularising the views he himself held came from the decline of Christianity My rejection of exclusive reliance upon the methodologies of psychoanalysis and phenomenology is based on two lines of argument Modern Movements in European Philosophy Richard Kearney, 1995-01-15 In this now classic textbook Richard Kearney surveys the work of nineteen of this century's most influential European thinkers The second edition has a new chapter devoted to Julia Kristeva whose work in the fields of semiotics and psychoanalytic theory has made a significant contribution to recent continental thought

Counterrevolution and Repression in the Politics of Education Sean Noah Walsh, 2013-12-12 Counterrevolution and Repression in the Politics of Education revisits the ideas of Herbert Marcuse in order to examine how his observations on counterrevolution are applicable to present conditions in politics particularly those pertaining to the politics of education While Marcuse's influence in the academy has noticeably waned since its zenith in the late 1960s his observations seem more relevant than ever especially in the current context of economic crises ideological polarization and a heightened disaffection with capitalism In particular this book focuses on how counterrevolution functions within the field of ideology manipulating the acquisition representation and exercise of reason in order to diminish the faculties of dissent and render utopian projects as the paramount political obscenity While we are most familiar with counterrevolution in its guise of bloodstained battlefields and ditches filled with the bodies of dissidents Marcuse alerts us to the decidedly ideological character of counterrevolution in late capitalism In advanced industrial society counterrevolution functions by converting the needs of the working class turning a potentially revolutionary segment of society into clients and supporters of the very system that oppresses them Furthermore the counterrevolution in the advanced industrial society is purely preemptive there is no revolution to be undone or turned back Starting from the foundation provided by Marcuse this book demonstrates how the tactics of counterrevolution have been applied in the present for the purpose of undermining criticism and dissent and how counterrevolution has intervened within the politics of reason In the last several years alone we have witnessed attempts

by state powers to reorganize college and university curricula a heightened denigration of intellectuals and academics within political discourse pervasive encroachment of consumerism in the collegiate experience and the rapid expansion of online teaching By using Marcuse's ideas this book demonstrates that rather than unconnected and isolated these phenomena are unified by the counterrevolutionary strategy of limiting and obstructing the acquisition of reason for the final aim of narrowing the possibilities for dissent

Dilemmas of Schooling (RLE Edu L) Ann Berlak, Harold Berlak, 2012-04-27 This study illuminates how the everyday activity of teachers raises profound economic cultural ethical political and research issues and provides a new and fruitful way of examining the practice of teaching The first part of the book offers a detailed description of sensitively recorded school situations arising from work carried out in a number of British primary schools From the analysis of their research the authors constructed a theoretical perspective for looking at schooling in the form of sixteen dilemmas the second half of the book is concerned with this perspective and shows how the dilemmas constitute a language for looking at everyday schooling and relating it to more general political social and cultural issues The book thus spans the gap in educational thinking between work with a firm empirical base and specifically theoretical studies

The Two Faces of Political Apathy Tom DeLuca, 1995 This inclusive study examines the extraordinarily high rates of political nonparticipation in the United States and the political historical institutional and philosophical roots of such widespread apathy To explain why individuals become committed to political apathy as a political role Tom DeLuca begins by defining the two faces of political apathy The first rooted in free will properly places responsibility for nonparticipation in the political process on individuals Political scientists and journalists however too often overlook a second more insidious face of apathy a condition created by institutional practices and social and cultural structures that limit participation and political awareness The public blames our most disenfranchised citizens for their own disenfranchisement Apathetic citizens blame themselves DeLuca examines classic and representative explanations of non participation by political analysts across a range of methodologies and schools of thought Focusing on their views on the concepts of political power and political participation he assesses current proposals for reform He argues that overcoming the second face of apathy requires a strategy of real political equality which includes greater equality in the availability of political resources in setting the political agenda in clarifying political issues and in developing a public sphere for more
