

An aerial photograph of a marina. The water is a deep blue, and the piers are a reddish-brown color. Numerous white and light-colored boats are docked at the piers. The boats vary in size, from small sailboats to larger motor yachts. The piers are arranged in a grid-like pattern, with some boats docked at the end of a pier and others along the side. The overall scene is a busy harbor area.

Marinas And Small Craft Harbors:

MARINAS and Small Craft Harbors Bruce O. Tobiasson, Ronald C. Kollmeyer, 1991-10-31 *MARINAS and Small Craft Harbors* defines the state of the art in marina and small craft harbor planning design and construction. Its authors are experienced teachers and practicing professionals. Their contribution through this book will be recognized for many years to come both herein North America and in the many countries throughout the world now developing recreational facilities. Our engineering outreach program at the University of Wisconsin Madison has for nearly two decades offered an annual state of the art conference on marina planning design and construction. The conference has been built on meeting educational needs of professionals practicing in this field. The authors Bruce Tobiasson and Ron Kollmeyer have for many years participated as guest faculty at these conferences. By having done so they have sharpened their instructional skills, broadened their knowledge base about state of the art practice and developed a compassion to help others in the field. *MARINAS and Small Craft Harbors* is a very comprehensive and readable work and belongs in the hands of all those people responsible for planning and building waterfront facilities in the 1990s and beyond. I commend the authors for their excellent work.

Planning and Design Guidelines for Small Craft Harbors: Planning, Environmental, and Financial Considerations; Chapter 2 Entrance, Breakwater, and Basin Design; Chapter 3 Inner Harbor Structures; Chapter 4 Land-Based Support Facilities Task Committee on Marinas 2020 of the Coasts, Oceans, Ports, and Rivers Institute of ASCE., 2013. Prepared by the Task Committee on Marinas 2020 of the Ports and Harbors Committee of the Coasts, Oceans, Ports and Rivers Institute of ASCE. *Planning and Design Guidelines for Small Craft Harbors* third edition provides new state of the art guidelines for the planning design and development of small craft harbors. Much has changed in marina development and operation since the previous edition and new challenges confront those charged with providing access to oceans, lakes and rivers by recreational and commercial users. Construction and maintenance of marinas and waterfront facilities have not kept pace with demand. Products are available now that are more predictable and cost effective. And increasingly available waterfront sites are often blighted or contaminated. This Manual will assist those involved with waterfront development to produce facilities that are convenient, attractive and safe as well as meeting aesthetic, social and cultural goals. Topics include planning, environmental and financial considerations, harbor entrance, breakwater and basin design, inner harbor structures, land based support facilities. Civil engineers, architects, planners, marine contractors, real estate developers and marina owners both public and private will refer frequently to the guidelines presented in this manual.
