Benassai,C. A. Brebbia,G. R. Rodríguez,2011 Following on the success of the first conference the Wessex Institute of Technology is convening the Second International Conference on Physical Coastal Processes Management and Engineering This book contains papers to be presented at that Conference Coastal zone dynamics involve distinctive features that stem from both near shore hydrodynamics and the complex local behaviour of the atmosphere that is affected by the irregularity of the coastal topography and variations in land sea surface roughness and thermal properties Complex interactions occur between the atmosphere ocean and land leading to large temporal and spatial differences in air sea exchange processes and

wind strength and direction Recreational and tourism demand on coastal areas activities makes increased shore and beach protection necessary Coastlines are often subjected to direct impact of wind swell and storm wave activity Many other physical phenomena such as tides and associated currents long waves and storm surges also affect the dynamic behaviour of the coastal zone With the increase in extreme events due to climate change the role of extreme events in changing coastal zones needs to be considered The International Conference will consider also of these and will cover such topics as Wave modelling Wave transformation hydrodynamics Extreme events and sea level rise Sea defences Interaction between coastal defences and processes Energy recovery Hydrodynamic forces Sediment transport and erosion Pollution and dispersion Planning and beach design Coastal geomorphology Coastal processes and navigation Coastal processes and GIS Bio physical coastal processes and Great Lakes problems The book will be of interest to engineers and government officials involved with coastal zone management and development
