**Marital Instability and Divorce Outcomes** Craig A. Everett, 1991 Clinicians and educators in the marriage and family field will gain valuable insight into the relationship dynamics that cause marital stress and the interactional factors that may result in divorce from this excellent book The perceptive theoretical empirical and clinical chapters included in *Marital Instability and Divorce Outcome* examine why certain elements in relationships result in divorce while others do not and assist professionals in evaluating these elements Specifically this provocative volume enables professionals to examine how a marriage has weathered developmental periods of stability and instability whether or not it has the necessary resources to survive and in the event a divorce occurs what will be the most likely post divorce adjustment for the marriage partners This informative volume aids professionals in their work with marital relationships by covering a wide range of topics involved in assessing marital instability and divorce outcomes The relationship circumstances that can lead to divorce are examined in an investigation of personality types which are prone to divorce and a comparison of patterns of relationships which are stable and those which are likely to result in divorce The conditions that exist after a divorce are explored in a discussion on how to predict post divorce adjustment and physical well being of the marriage partners after divorce Educators teaching marriage and family courses at all levels from high school to college and clinicians who work with marital family and child cases will find this helpful volume to be an invaluable resource for evaluating factors influencing marital instability and divorce outcome

*Marital Instability and Divorce Outcomes* Craig A. Everett, 1991      **Family Mediation** Howard H. Irving, Michael Benjamin, 1995-07-19 As divorce rates rise family mediation represents an alternative way of making settlements without involving an already overburdened judicial system This book presents a discussion of the current North American trends in the burgeoning field of family mediation by featuring both a review of the literature and a model for family mediation practice The practice model presented here Therapeutic Family Mediation stresses an ecological perspective and considers the feminist critique of the mediation process The authors also address mediation's role in the important issues of joint custody ethnicity and child protection Future directions in family mediation are examined in the final part

*Who Divorces?* Barbara Thornes, Jean Collard, 2023-07-05 The divorce rate in England and Wales increased nearly four fold between 1950 and 1976 in the five years following the implementation of the 1969 Divorce Reform Act in January 1971 it more than doubled Despite the plethora of public comment about the rising divorce rates there was at the time very little objective data in our society about either those who chose to resolve their marital unhappiness by divorce or the possible causes and consequences of such divorce Originally published in 1979 this book the first published study from the Marriage Research Centre represented an important landmark in a relatively unexplored field *Who Divorces* Presents the findings of a large scale study into the characteristics of those who divorce Certain childhood adolescent pre marital and marital characteristics and experiences of a random sample of men and women who divorced are considered and compared

with the characteristics and experiences of a random sample of men and women whose marriages were still intact. Additionally, research findings relating to the causes and consequences of divorce both for the individual and for society are discussed with particular reference to the wide range of prevailing opinion on these matters.

**Child Custody** Craig Everett, 2015-11-17 For too long, divorce and remarriage literature has focused only on the outcome in the personal lives of the divorcees during and after divorce. But now, in *Child Custody: Legal Decisions and Family Outcomes*, you will see that divorce is a chain reaction that begins in the courtroom and branches out into the families of the world, changing the lives of children, parents, and grandparents alike. *Child Custody* is an incisive, up-to-date collection of studies that addresses both child custody decisions and the varied and often surprising outcomes for those children and their families. Divided into two main sections, one focusing on legislative guidelines and the other on family issues, this unique compilation of recent divorce and remarriage research gives you a rare view of the attitudes some judges have toward divorce. In addition, those people in both law and family research fields will have at their disposal the many aspects of the legal decision-making process and the legislative guidelines that currently hold sway over custody and post-divorce cases. Here are some of the topics you will read about: the evolution of three types of residential custody arrangements; father, mother, and joint custody followed over a two-year period; legal reforms aimed at guaranteeing parental access to children; how social research has shaped New Hampshire's child support policy; divorced fathers and mothers in Greece; the stigmas on lesbian mothers in custody cases; how grandparent involvement shapes post-divorce families. Meant as a catalyst for further research and study, this book begins to touch upon the intrinsic flaws in both legal and family systems that continue to exist. Too often, we think of divorce and child custody as merely legal decisions. In *Child Custody*, however, you will find that what matters in court is also a family matter.

**Marital Instability in the United States** Evelyn L. Lehrer, 2017 This paper

surveys some of the main strands in the recent literature on the economics of divorce with a focus on U S studies We begin with a discussion of changes over time in the divorce rate and the widening gap in marital instability by socioeconomic status We review the role of age at entry into first marriage including recent analyses that find strikingly different relationships by race and ethnicity Compared to other developed economies the divorce rate in the U S is exceptionally high We offer possible explanations including the roles of theologically conservative religions which promote early entry into motherhood and marriage and low female education and the high levels of both income inequality and teen fertility in the U S We review the effects of divorce reforms While such reforms have made it easier for women to leave violent marriages lack of an ability to be economically self sufficient remains an important barrier for many women trapped in such marriages In light of this we discuss the importance of caution in interpreting research findings a high level of marital stability is not always the best outcome Finally we review the literature on the effects of divorce on the well being of children and the role of child support policies

*Negotiating the Life Course* Ann Evans,Janeen Baxter,2012-10-23 Pathways through the life course have changed considerably in recent decades Many of our assumptions about leaving home starting new relationships and having children have been turned upside down It is now almost as common to have children prior to marriage as afterwards and certainly much more common to live together before marrying than to marry without first living together Women are more likely to remain in the labour force after having children and many families struggle with problems of work family balance at some stage in their lives particularly when they have young children But how much has really changed Is there really more diversity in how individuals transition through these life course stages or just variations at the margin with most people following a standard work and family life course This volume makes use of rich longitudinal data from a unique Australian project to examine these issues Drawing on broader theories of social change and demographic transitions in an international context each chapter provides a detailed empirical assessment of the ways in which Australian adults negotiate their work and family lives In doing so the volume provides important insight into the ways in which recent demographic social and economic changes both challenge and reproduce gender divisions
