The Great Experiment Mart Grams, 2012-09-22 A free market text on the emergence in America of a Great Experiment Stemming from Alexander Hamilton s statememnt in Federalist 1 and stated two centuries later by Ronald Reagan Freedom is never more than one generation away from extinction We didn t pass it to our children in the bloodstream It must be fought for protected and handed on for them to do the same or one day we will spend our sunset years telling our children and our children s children what it was once like in the United States where men were free Hamilton wondered if men were capable of ruling themselves This text deals with that hope and duty and my attempts over the years to express to my students a spark to relight that fire the Framers and Founders felt when creating the greatest experiment in freedom the world has seen

The Turn Around Religion in America Michael P. Kramer, 2016-02-24 Playing on the frequently used metaphors of the turn toward or turn back in scholarship on religion The Turn Around Religion in America offers a model of religion that moves in a reciprocal relationship between these two poles In particular this volume dedicates itself to a reading of religion and of religious meaning that cannot be reduced to history or ideology on the one hand or to truth or spirit on the other but is rather the product of the constant play between the historical particulars that manifest beliefs and the beliefs that take shape through them Taking as their point of departure the foundational scholarship of Sacvan Bercovitch the contributors locate the universal in the ongoing and particularized attempts of American authors from the seventeenth century forward to get it whatever that it might be right Examining authors as diverse as Pietro di Donato Herman Melville Miguel Algarin Edward Taylor Mark Twain Robert Keayne Nathaniel Hawthorne Paule Marshall Stephen Crane Ralph Waldo Emerson and Joseph B Soloveitchik among many others and a host of genres from novels and poetry to sermons philosophy history journalism photography theater and cinema the essays call for a discussion of religion s powers that does not seek to explain them as

much as put them into conversation with each other Central to this project is Bercovitch's emphasis on the rhetoric ritual typology and symbology of religion and his recognition that with each aesthetic enactment of religion's power we learn something new

Animals and Nature Rod Preece, 2011-11-01 No one tradition alone offers a sufficient respect for other species Taken together they may offer a prospect for saner human animal relations From the book Western conceptions of objectivity and individuality have resulted in a readier appreciation of the worth of the animals and nature than has been recognized This provocative book takes issue with the popular view that the Western cultural tradition in contrast to Eastern and Aboriginal traditions has encouraged attitudes of domination and exploitation towards nature particularly animals Preece argues that the Western tradition has much to commend it and that descriptions of Aboriginal and Oriental orientations have often been misleadingly rosy simplified and codified according to current fashionable concepts Animals and Nature is the result of six years intensive study into comparative religion literature philosophy anthropology mythology and animal welfare science

Animal Tales Keita Hatooka, 2022-08-29 Throughout his works Thomas Pynchon uses various animal characters to narrate fables that are vital to postmodernism and ecocriticism Thomas Pynchon's Animal Tales Fables for Ecocriticism examines case studies of animal representation in Pynchon's texts such as alligators in the sewer in V the alligator purse in Bleeding Edge dolphins in the Miami Seaquarium in The Crying of Lot 49 dodoes pigs and octopuses in Gravity's Rainbow Bigfoot and Godzilla in Vineland and Inherent Vice and preternatural dogs and mythical worms in Mason Dixon and Against the Day

Through this exploration Keita Hatooka illuminates how radically and imaginatively the legendary novelist depicts his empathy for nonhuman beings Furthermore by conducting a comparative study of Pynchon s narratives and his contemporary documentarians and thinkers Thomas Pynchon s *Animal Tales* leads readers to draw great lessons from the fables which stimulate our ecocritical thought for tomorrow **What is Your Name?** Charles Reynolds Brown,1924

Pain and the Aesthetics of US Literary Realism Cynthia J. Davis,2021-11-04 The postbellum period saw many privileged Americans pursuing a civilized ideal premised on insulation from pain Medico scientific advances in anesthetics and analgesics and emergent religious sects like Christian Science made pain avoidance seem newly possible The upper classes could increasingly afford to distance themselves from the suffering they claimed to feel more exquisitely than did their supposedly less refined contemporaries and antecedents The five US literary realists examined in this study resisted this contemporary revulsion from pain without going so far as to join those who celebrated suffering for its invigorating effects William Dean Howells Henry James Edith Wharton Mark Twain and Charles Chesnutt embraced the concept of a heightened sensitivity to pain as a consequence of the civilizing process but departed from their peers by delineating alternative definitions of a superior sensibility indebted to suffering Although the treatment of pain in other influential nineteenth century literary modes including sentimentalism and naturalism has attracted ample scholarly attention this book offers the first sustained analysis of pain s importance to US literary realism as practiced by five of its most influential proponents

The Macmillan Book of Proverbs, Maxims, and Famous Phrases Burton Egbert Stevenson,1965 Sayings which range from the Greeks and Hebrews of 800 and 700 B C down to the present **Thomas Hardy and Animals** Anna West,2017-04-19 Thomas Hardy and Animals examines the human and nonhuman animals who walk and crawl and fly across and around the pages of Hardy s novels Animals abound in his writings yet little scholarly attention has been paid to them so far This book fills this gap in Hardy studies bringing an important author within range of a new and developing area of critical inquiry It considers the way Hardy s representations of animals challenged ideas of human animal boundaries debated by the Victorian scientific and philosophical communities In moments of encounter between humans and animals Hardy questions boundaries based on ideas of moral sense or moral agency language and reason the possession of a face and the capacity to suffer and perceive pain Through an emphasis on embodied encounters his writings call for an extension of empathy to others human or nonhuman In this accessible book Anna West offers a new approach to Hardy criticism Rejuvenating the Humanities Ray Broadus Browne,Marshall William Fishwick,1992 The humanities are the human elements in any culture In the West these humanities have ordinarily been anchored in and derivative of Eurocentric culture and have been centered on elite and art related subjects As such they have strengthened and perpetuated elite culture and have been restricted and narrow in their point of view They have enervated the modern humanities which in a democratic society insist on having democratic humanities Democratic humanities demand a new point of view which demands respect for and dignity to the common

aspects of culture as well as inclusion of those elements It is time the call went ringing through the land The Old is Sick Please Bring Assistance Rejuvenate the humanities The essays in this volume are Assistance an effort to demonstrate the inalienable need for new subjects in the humanities canon and the value of those subjects as parts of the New Humanities The twenty essays in this effort to bring new vitality to the humanities range through fields familiar in life but unfamiliar in the humanities canon They include leisure folk cultures material culture pornography comics animal rights Black studies travelling and of course the bugbear of academics television The authors include some of the outstanding scholar observers of today all of whom address their subjects in cool dispassionate and convincing reason The subject of revitalizing the Humanities is important indeed This volume will go a long way toward alerting the intellectual community to the desperate need to bring new understanding to the study of the modern humanities **Biology of the vertebrates; a comparative study of man and his animal alli** Herbert Eugene Walter,1928
