investment and business ventures **The Cost of Environmental Degradation** Lelia Croitoru, Maria Sarraf, 2010-07-16

How much is a cleaner environment worth For policy makers that question used to go largely unanswered Many economic activities cause environmental degradation entailing real costs to the economy and to people s welfare Knowing the extent of these costs is crucial for identifying a country s main environmental priorities and allocating appropriate funds for environmental protection Over the past decade the World Bank has initiated a systematic effort to measure the costs of environmental degradation in the Middle East and North Africa shedding new light on their magnitude and on the need for policy changes In many cases these costs were found to be surprisingly large The Cost of Environmental Degradation Case Studies from the Middle East and North Africa brings together the best case studies of this program and summarizes their policy impacts at the national and regional levels The case studies quantify monetarily the annual damage due to environmental degradation and express these estimates as percentages of the countries gross domestic product The studies use the most recent environmental valuation methods to estimate the economic costs resulting from air pollution water degradation deforestation and land degradation Uniquely the book dedicates a case study to value the costs of environmental degradation resulting from an oil spill and demolition waste in times of conflict The studies then illuminate the concrete implications on policy investments and institutions for the respective nations This book will be of interest to policy makers nongovernmental organizations and academic and research institutions **Cultural Resources Overview for Northwestern California** Jerome King, William R. Hildebrandt, Sharon A. Waechter, 2016 **The New Wider World** Grant Westoby, 2001 The Teacher Resource Book is an integral part of The New Wider World Foundation Edition Used as a photocopiable resource this book will help students and teachers get even more from the Foundation Edition of the leading GCSE Geography text **Sustainability in Energy and Buildings 2021** John R. Littlewood, Robert J. Howlett, Lakhmi C. Jain, 2021-09-28 Chapter A Multi functional Design Approach to Deal with New Urban Challenges is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com) *Survivability under Overheating* Afroditi Synnefa, Shamila Haddad, Priya Rajagopalan, Matthaios Santamouris, 2020-12-23 The present book discusses three significant challenges of the built environment namely regional and global climate change vulnerability and survivability under the changing climate Synergies between local climate change energy consumption of buildings and energy poverty and health risks highlight the necessity to develop mitigation strategies to counterbalance overheating impacts The studies presented here assess the underlying issues related to urban overheating Further the impacts of temperature extremes on the low income population and increased morbidity and mortality have been discussed The increasing intensity duration and frequency of heatwaves due to human caused climate change is shown to affect underserved populations Thus housing policies on resident exposure to intra urban heat have been assessed Finally opportunities to mitigate urban overheating have been proposed and discussed **Oil, Wine, and the Cultural Economy of Ancient Greece** Catherine E.

Pratt,2021-03-18 In this book Catherine E Pratt explores how oil and wine became increasingly entangled in Greek culture from the Late Bronze Age to the Archaic period Using ceramic architectural and archaeobotanical data she argues that Bronze Age exchange practices initiated a strong network of dependency between oil and wine production and the people who produced exchanged and used them After the palatial collapse these prehistoric connections intensified during the Iron Age and evolved into the large scale industries of the Classical period Pratt argues that oil and wine in pre Classical Greece should be considered cultural commodities products that become indispensable for proper social and economic exchanges well beyond economic advantage Offering a detailed diachronic account of the changing roles of surplus oil and wine in the economies of pre classical Greek societies her book contributes to a broader understanding of the complex interconnections between agriculture commerce and culture in the ancient Mediterranean
