Changing Parks John S. Marsh,Bruce W. Hodgins,1998-05-15 This important book is a must for everyone concerned with the heritage and future of Canada's parks Contributors include an impressive assembly of noted park experts ranging from academic authorities and government parks personnel to concerned nonpolitical park supporters Since the establishment of Banff National Park in 1885 and Algonquin Provincial Park in 1893 parklands have been part of Canada's heritage Where other protected areas such as forest reserves heritage rivers and greenways have also been created a more comprehensive view of the creation and management of conservation areas and marshland is discussed Cooperative approaches to park management recognize the regional context of parks with respect to local communities as well as the inclusion of more diverse groups of people particularly Aboriginals This work encourages the general public to take an interest in our priceless park heritage *The Routledge Introduction to Canadian Fantastic Literature* Allan

Weiss,2020-12-29 This study introduces the history themes and critical responses to Canadian fantastic literature Taking a chronological approach this volume covers the main periods of Canadian science fiction and fantasy from the early nineteenth century to the first decades of the twenty first century The book examines both the texts and the contexts of Canadian writing in the fantastic analyzing themes and techniques in novels and short stories and looking at both national and international contexts of the literature's history This introduction will offer a coherent narrative of Canadian fantastic literature through analysis of the major texts and authors in the field and through relating the authors work to the world around them **Fights of Fancy** George Edgar Slusser,Eric S. Rabkin,1993 This collection of fifteen original essays offers new perspectives on armed conflict as a central aspect of science fiction and fantasy writing Looking past the superficial conventions associated with ray guns and aliens swords and sorcerers the contributors show how writers in the genre today are not so much imagining war more fully as they are completely re imagining it Science fiction and fantasy writing is no longer mired in epic or chivalric models but is responding to new and more complex real world motivations for armed aggression advances in weaponry shifts in the theaters of war and changes in battlefield conditions Most of the papers were presented at the annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field's most prestigious international gathering The trend throughout the book is away from critical interest in stories of spatial or territorial conquest and toward works that deal with topics related to wars of temporal logistics and the internationalization of the combat zone including urban street violence gender conflicts and resistance to runaway technology The essays range from studies of the semantics and linguistics of warfare in science fiction to a critique of Osip Senkovsky's *Fantastic Journeys of Baron Brambeus* from writer Joe Haldeman's assessment of the impact of his Vietnam experiences on his fiction to inquiries into a shared author reader agenda in novels concerning potential mass destruction including Stephen King's *Dead Zone* and

M J Engh s Arslan The collection also charts new directions in writing such as the anti apocalyptic science fiction of Samuel R Delany and embraces new modes of presentation particularly computer animation and the bande dessinee or illustrated narrative as exemplified by French novelist Phillippe Druillet s La Nuit Musician Bob Marley film actor directors Sylvester Stallone and Bruce Lee and the cyberpunk film classics Terminator and the Road Warrior series are among other topics discussed Together the essays reinforce the editors contention that the true function of these fantasies and science fictions is neither nostalgia nor fancy but analysis The contributors treat the texts they examine as a means not of playing war games but of understanding the role of war in the present and the future Canadian Science Fiction and Fantasy David Ketterer,1992 Science Fiction and Fantasy Literature, 1975-1991 R. considers the significant failure of some works to confront the subject and the success of others as educational tools With a clear focus on the subject of war this work does not deal with such related topics as nuclear accidents reactor disasters or near war situations The bulk of the book is given over to the detailed annotated bibliography which consists of over 800 entries with associated checklists Intended to provide scholars librarians and general readers with ready access to a great variety of information about his body of writing the bibliography lists both hardcover and paper editions of books and the reprinting of each short story and corrects several errors in other standard reference works In his critical analysis and through the annotations in the bibliography Brians attempts to improve our understanding of cultural attitudes toward the dangers posed by the ever present reality of nuclear weaponry Jacket **Science Fiction and Fantasy Series and**
