Cordova,2023-04-29 Before the civilized era there was a gigantic need to have a huge pair of limbs to survive the monstrosity of wild living Now that we have learned not only how to use the tools around us to hunt meat harvest plants and recreate our habitat but also to group ourselves to better help each other The requirements of survival are also recalibrated In order to construct a responsible united society we must begin with the smallest possible unit of a community a romantic partnership This is a relationship where the decisions of one member impacts the entire group albeit a group of two We then move to a small family after the addition of offspring and then the scale of the group undergoes constant growth Since our societal problem can be sourced from the gradual performance of humanity acting in bad faith and unreasonable acts and from the parents in those dysfunctional families who mold their child s mind towards undesirable behaviors we can then start minimizing its effects with endeavors that lead to the opposite As couples we are the least form of the society the small known world in the eyes of our child Being with our partners is the most ideal training ground for practicing unity teamwork and leadership The Art of War in a Relationship is about educating each of us using a responsible parent s mindset as the focal point This journey starts with the ideal traits of a healthy relationship and reaches its peak in proper family leadership We are looking forward to having a responsible society This means that we are looking forward to having a better generation To have many responsible children raised by their responsible parents To have a responsible couple handling their relationship as their training ground to become the most ideal parent they could be When these couples become parents they

management CISM is now a well established method in crisis intervention and one that is clearly needed within aviation. However there are many peculiarities in this branch of CISM which require thorough consideration. People working in high reliability environments need to be sensitive to others reactions to critical stress. They are the normal reactions of normal people in abnormal situations. However to ensure this a proper programme must be put in place based on a scientific and standardized approach. This book describes the various methods and elements of the CISM model as well as their interventions. It also investigates the benefits of CISM on the individual level and on an organisational strategic level. It details CISM training and courses and features a case study based on the berlingen accident of 2002. Critical Incident Stress Management in Aviation will be of direct relevance to human factors experts, safety managers, ATCOs and air navigation service providers though there is also much that will be of interest to aviation physicians, psychologists and airport/airline managers.

The Power of Anticipatory Images in Student Achievement James M. Davy, 2020-10-03. This book features ten high academically achieving low income inner city students from Newark New Jersey who graduated from public high schools at or near the top of their class and continued to excel in college. Using a qualitative research design the author interviewed the ten students and the person who most influenced their educational progress about what motivated them to achieve at such high levels. Three mutually reinforcing anticipatory images emerged as a common element of their stories. In their own voices the students describe the anticipatory images they framed, how they developed them and how they used them to their advantage. Davy advances a theoretical model of the Anticipatory Competent student who continually progresses in the directions of the images projected ahead.
