Religion And Regime:

Religion and Regimes Mehran Tamadonfar, Ted G. Jelen, 2013-11-26 This work is a collection of essays that describe and analyze religion and regime relations in various nations in the contemporary world The contributors examine patterns of interaction between religious actors and national governments that include separation support and opposition In general the contributors find that most countries have a majority or plurality religious tradition which will seek a privileged position in public life The nature of the relationship between such traditions and national policy is largely determined by the nature of opposition A pattern of quasi establishment is most common in settings in which opposition to a dominant religious tradition is explicitly religious However in some instances the dominant tradition is associated with a discredited prior regime in which a pattern of legal separation is most common Conversely in some nations a dominant religion is for historical reasons strong associated with national identity Such regimes are often characterized by a lazy monopoly in which the public influence of religion is reduced

Religion and Regimes Mehran Tamadonfar, Ted G. Jelen, 2014 Religion and Regimes Support Separation and Opposition emphasizes the changing political role of religion in various nations of the world The approach is based on market models of religion and connects the style of religious politics in a given nation to the nature of competition among dominant religious traditions and their alternatives

Faith in Numbers Michael Hoffman, 2021-01-18 Why does religion sometimes increase support for democracy and sometimes do just the opposite In Faith in Numbers political scientist Michael Hoffman presents a theory of religion group interest and democracy Focusing on communal religion he demonstrates that the effect of communal prayer on support for democracy depends on the interests of the religious group in question For members of groups who would benefit from democracy communal prayer increases support for democratic institutions for citizens whose groups would lose privileges in the event of democratic reforms the opposite effect is present Using a variety of data sources Hoffman illustrates these claims in multiple contexts He places particular emphasis on his study of Lebanon and Iraq two countries in which sectarian divisions have played a major role in political development by utilizing both existing and original surveys By examining religious and political preferences among both Muslims and non Muslims in several religiously diverse settings Faith in Numbers shows that theological explanations of religion and democracy are inadequate Rather it demonstrates that religious identities and sectarian interests play a major part in determining regime preferences and illustrates how Islam in particular can be mobilized for both pro and anti democratic purposes It finds that Muslim religious practice is not necessarily anti democratic in fact in a number of settings practicing Muslims are considerably more supportive of democracy than their secular counterparts Theological differences alone do not determine whether members of religious groups tend to support or oppose democracy rather their participation in communal worship motivates them to view democracy through a sectarian lens

idea of Europe The collection closes with an overview of European nation states focusing on history demography legal perspectives political authorities societal changes and current trends Written by leading scholars in the field the Handbook is an authoritative and up to date volume which demonstrates the enduring presence of lived and institutionalized religion in the social networks of identity policy and power over two millennia of European history Faith, Rights, and Choice James Farney, Clark Banack, 2023-02-27 The Canadian provinces have evolved quite different ways of responding to the policy problems posed by religious schools Seeking to understand this peculiar reality Faith Rights and Choice articulates the ways in which the provincial governance regimes developed for religious schools have changed over time Covering nearly three centuries the book begins with the founding of schooling systems in New France and continues into a variety of present day conflicts that emerged over the question of religion in schools James Farney and Clark Banack employ a method of process tracing drawing on 88 semi structured interviews with key policy insiders They also reference archival material documenting meetings political speeches and legislative debates related to government decisions around issues of religious education Relying on the theoretical foundations of both historical institutionalism and Canadian political development Faith Rights and Choice presents a new analytic framework to help make sense of the policy divergence witnessed across Canada **The Unfree Exercise of Religion** Jonathan Fox, 2016-02-05 Religious discrimination is the norm in many countries around the world and the rate is rising Nearly every country which discriminates does so unequally singling out some religious minorities for more discrimination than others Religious tradition does not explain this complex issue For example Muslim majority states include both the most discriminatory and tolerant states in the world as is also the case with Christian majority states Religious ideologies nationalism regime culture security issues and political issues are also all part of the answer In The Unfree Exercise of Religion Jonathan Fox examines how we understand concepts like religious discrimination and religious freedom and why countries discriminate He makes a study of religious discrimination against 597 religious minorities in 177 countries between 1990 and 2008 While 29 types of discrimination are discussed in this book the most common include restrictions in places of worship proselytizing and religious education **Religion, Equality and Employment in Europe** Katayoun Alidadi, 2017-06-15 The management of religious and ideological diversity remains a key challenge of our time deeply entangled with debates about the nature of liberal democracy equality social cohesion minorities and nationalism security and foreign policy This book explores this challenge at the level of the workplace in Europe People do not surrender their religion of belief at the gates of their workplace nor should they be required to do so But what are the limits of accommodating religious belief in the workplace particularly when it clashes with other fundamental rights and freedoms Using a comparative and socio legal approach that emphasises the practical role of human rights anti discrimination law and employment protection this book argues for an enforceable right to reasonable accommodation on the grounds of religion and belief in the workplace in Europe In so doing it draws on the case law of Europe s two supranational

courts three country studies Belgium the Netherlands and the UK as well as developments in the US and Canada By offering the first book length treatment of the issue it will be of significance to academics students policy makers business leaders and anyone interested in a deeper understanding of the potentials and limits of European and Western inclusion freedom and equality in a multicultural context Awarded an honourable mention from the International Academy of Comparative Law for the 2018 Canada Prize *Africa and the Decolonisation of State-Religion Policies* John Osogo Ambani,2021-05-25 This book argues that a view has taken root in Africa which equates state secularism to the aggressive removal of religion from the public sphere or even state ambivalence towards religious affairs This view arises from a misguided interpretation of the practice of state secularism particularly in France Turkey and the US which understanding is ill suited for the sub Sahara Africa s state religion because the region boasts of at least three major religious traditions African religion Islam and Christianity and blanket condemnation of public manifestation of religion or ambivalence towards it may offend the natural flourishing of this trinity and more The contribution holds that most applications of state secularism in Kenya Nigeria and Uganda favour the Christian faith which during its tumultuous experiences in Europe survived the enlightenment the reformation and like experiences socialised to co exist with what are now called secular states Additionally due to the long history of Christendoms in Europe Christian principles penetrated the colonial legal systems that were bequeathed to Africa at independence and the sustenance of the colonial legacy means that the Abrahamic faith has an upper hand in the state religion relations contest The obvious loser is African religion which has suffered major onslaughts since the colonial days

Religion and Authoritarianism Karrie J. Koesel,2014-02-24 This book provides a rare window into the micropolitics of contemporary authoritarian rule through a comparison of religious state relations in Russia and China two countries with long histories of religious repression and even longer experiences with authoritarian politics Drawing on extensive fieldwork in multiple sites in these countries this book explores what religious and political authority want from one another how they negotiate the terms of their relationship and how cooperative or conflicting their interactions are This comparison reveals that while tensions exist between the two sides there is also ample room for

mutually beneficial interaction Religious communities and their authoritarian overseers are cooperating around the core issue of politics namely the struggle for money power and prestige and becoming unexpected allies in the process

Politics, Religion and Gender Sieglinde Rosenberger, Birgit Sauer, 2013-07-03 Heated debates about Muslim women's veiling practices have regularly attracted the attention of European policymakers over the last decade The headscarf has been both vehemently contested by national and or regional governments political parties and public intellectuals and passionately defended by veil wearing women and their supporters Systematically applying a comparative perspective this book addresses the question of why the headscarf tantalises and causes such controversy over issues about religious pluralism secularism neutrality of the state gender oppression citizenship migration and multiculturalism Seeking also to establish why the issue has become part of the disciplinary practices of some European countries but not of others this work brings together an important collection of interpretative research regarding the current debates on the veil in Europe offering an interdisciplinary scope and European wide setting Brought together through a common research methodology the contributors focus on the different religious political and cultural meanings of the veiling issue across eight countries and develop a comparative explanation of veiling regimes This work will be of great interest to students and scholars of religion politics gender studies and multiculturalism
