The Rise of Political Intellectuals in Modern China Shakhar Rahav, 2015-02-17 The May Fourth movement 1915 1923 is widely considered a watershed in the history of modern China This book is a social history of cultural and political radicals based in China s most important hinterland city at this pivotal time Wuhan Current narratives of May Fourth focus on the ideological development of intellectuals in the seaboard metropolises of Beijing and Shanghai And although scholars have pointed to the importance of the many cultural political societies of the period they have largely neglected to examine these associations seeing them only as seedbeds of Chinese communism and its leaders like Mao

Zedong This book by contrast portrays the everyday life of May Fourth activists in Wuhan in cultural political societies founded by local teacher and journalist Yun Daiying 1895 1931 The book examines the ways by which radical politics developed in hinterland urban centers from there into a nation wide movement which ultimately provided the basis for the emergence of mass political parties namely the Nationalist Party Guomindang and the Chinese Communist Party CCP The book s focus on organizations everyday life and social networks provides a novel interpretation of where mechanisms of historical change are located The book also highlights the importance of print culture in the provinces It demonstrates how provincial print culture combined with small local organizations to create a political movement The vantage point of Wuhan demonstrates that May Fourth radicalism developed in a dialogue between the coastal metropolises of Beijing and Shanghai and hinterland urban centers The book therefore charts the way in which seeds of political change grew from individuals through local organizations into a nation wide movement and finally into mass party politics and subsequently revolution The book thus connects everyday experiences of activists with the cultural political ferment which gave rise to both the Chinese Communist party and the Nationalist Party *The Cambridge Economic History of China* Debin Ma, Richard von Glahn, 2022-02-24 China s rise as the world s second largest economy surely is the most dramatic development in the global economy since the year 2000 Volume II which spans China s two turbulent centuries from 1800 charts this wrenching process of an ancient empire being transformed to re emerge as a major world power This volume for the first time brings together the fruits of pioneering international scholarship in all dimensions of economic history to provide an authoritative and comprehensive overview of this tumultuous and dramatic transformation In many cases it offers a fundamental reinterpretation of major themes in Chinese economic history such as the role of ideology the rise of new institutions human capital and public infrastructure the impact of Western and Japanese imperialism the role of external trade and investment and the evolution of living standards in both the pre Communist and Communist eras The volume includes seven important chapters on the Mao and reform eras and provides a critical historical perspective linking the past with the present and future **New Profession, Old Order** Kees Gispén, 2002-07-25 New Profession Old Order explores the creative tension between modern technology and preindustrial Germany It offers an explanation of why the engineering profession is so successful in transforming the physical world did not achieve the professional power cohesion and prestige that its technological accomplishments would seem to have warranted *Schooling and State Formation in Early Modern Sweden* Bengt Sandin, 2020-11-07 In this book the emergence of schools in urban Sweden between the seventeenth and the nineteenth century provides the framework for a history of children and of childhood It is a study through the lens of the changes in early modern education spatial aspect of the life of children and systems of governance in the early modern Swedish state Educational systems defined the spatial aspects of childhood where children were supposed to grow up in the home the school the streets and alleys or the place of work over a period of about two hundred years Schools and education

represent both a mental and a physical space an abstract place for children as well as a local and concrete place for them which stood out against the alternative spatial aspects of the life of children It is also a study of how different cultural systems influence the definitions of childhood and schools in the context of church and home instruction poor relief policing surveillance and the question of why children went to schools It examines the role of the school as childcare and as a provider of food shelter and welfare and as governance The Emergence of Modern Japan Janet Hunter,2014-06-06 The main emphasis of this book is upon political social and economic developments as conditioned by Japan s interaction with the outside world the advance of industrialisation and the emergence of the Japanese nation state Unlike previous textbooks on the history of modern Japan Janet Hunter s book adopts a thematic approach which makes the period much more accessible for readers who wish to pursue their particular interests throughout the period Moreover it will also establish a greater awareness of the cultural and institutional continuities which are crucial to any proper understanding of modern Japan

the Handbook is built on three fundamental tenets of sociology First the authors adopt the perspective that schools are a central institution in society An understanding of the function of schooling in social life is enhanced by viewing schools as interrelated with other societal institutions The study of how the context of schooling influences education processes is critical to an understanding of school outcomes Rather than being determined solely by ascribed and achieved characteristics an individual's cognitive and social development are influenced heavily by the structures and networks in which the individual is embedded Communities families schools and social groups are critical elements in the educative process By viewing the school as a societal institution and highlighting the interaction between context and individual behavior the Handbook chapters provide a broader and deeper understanding of the determinants of learning in contemporary society The second sociological insight that guides the research in the Handbook is that the school is a social system
