subject to policy decisions and value assessments Physically safe technologically stable and socio economically sustainable
HLW management will top the agenda That must be accomplished in a society whose segments are both stable and in a rapid
state of flux under the influence of global as well as national factors private interests as well as the vagaries of national
politics Among the challenges to be faced is how to codify responsibilities of nuclear industry governments and international
organisations and any adopted management policy must attain legitimacy at the local national regional and global levels All
such considerations raise questions about the practical and theoretical knowledge This special issue book will address these
questions by exploring HLW management in Canada France Germany India Sweden the UK and the USA Special emphasis
will be placed on highlighting national context current trends and uncertainties with relevance to a socially sustainable

Energy DOE manages dozens of sites across the nation that focus on research design and production of nuclear weapons and
nuclear reactors for defense applications Radioactive wastes at these sites pose a national challenge and DOE is considering
how to most effectively clean them up Some of the greatest projected risks cleanup costs and technical challenges come from
processing and disposing transuranic and high level radioactive waste This report addresses how DOE should incorporate
risk into decisions about whether the nation should use alternatives to deep geologic disposal for some of these wastes It
recommends using an exemption process involving risk assessment for determining how to dispose of problematic wastes
The report outlines criteria for risk assessment and key elements of a risk informed approach The report also describes the
types of wastes that are candidates for alternative disposition paths potential alternatives to deep geologic disposal for
disposition of low hazard waste and whether these alternatives are compatible with current regulations Methodology for
