Brackenridge, Richard S. Croxson, Ross Mackenzie, 2016-08-20 The fifth edition of this leading reference book on insurance medicine provides a comprehensive guide to life expectancy for underwriters and clinicians involved in the life insurance industry Extensively revised and expanded the new edition reflects developments in life and healthcare insurance as well as medicine Genetics and Life Insurance Mark A. Rothstein, 2004 Experts discuss the economic legal and social issues surrounding the use of genetic testing in determining eligibility for life insurance Insurance companies routinely use an individual's medical history and family medical history in determining eligibility for life insurance this is part of the process of medical underwriting Insurers have also long used genetic information often derived from family history in underwriting But rapid advances in gene identification and genetic testing are changing the way we look at genetic information Should the results of genetic testing which might identify a predisposition toward disease not related to medical history be available to life insurance medical underwriters Few if any life insurers currently require genetic testing but there are no laws or regulations prohibiting its use Genetics and Life Insurance examines the complex economic legal and social issues surrounding the use of genetic information in life insurance underwriting The contributors are legal scholars representatives of the life insurance industry including an actuary and an insurance physician a geneticist a genetic counselor a philosopher and a consumer advocate They explore all aspects of an issue that has only recently drawn the attention of policymakers and the public The book opens with a report on the results of a public opinion poll on genetics and life insurance Succeeding chapters present the insurer perspective a discussion of the economics of risk selection in life insurance background information on the process of underwriting a scientific analysis of genetic risks and mortality rates a philosophical discussion of fairness and genetic underwriting the viewpoints of consumers and genetics counselors a comparison of different international policy approaches to the issue and a legal analysis of antitrust implications when insurers collaborate in setting standards for medical underwriting In the final chapter the editor addresses various policy options examining the pros and cons of each one and assessing their political feasibility **Reports of the Tax Court of the United States** United States. Tax Court, 1983 Final issue of each volume includes table of cases reported in the volume Discrimination Against Minorities and Women in Pensions and Health, Life, and Disability Insurance: Proceedings and papers, 1978 *The Price of Smoking* Frank A. Sloan, Jan Ostermann, Christopher Conover, Donald H. Taylor, Gabriel Picone, 2006-08-11 What does a pack of cigarettes cost a smoker the smoker's family and society This longitudinal study on the private and social costs of smoking calculates that the cost of smoking to a 24 year old woman smoker is 86 000 over a

lifetime for a 24 year old male smoker the cost is 183 000 The total social cost of smoking over a lifetime including both private costs to the smoker and costs imposed on others including second hand smoke and costs of Medicare Medicaid and Social Security comes to 106 000 for a woman and 220 000 for a man The cost per pack over a lifetime of smoking almost 40 00 The first study to quantify the cost of smoking in this way or in such depth this accessible book not only adds a weapon to the arsenal of antismoking messages but also provides a framework for assessment that can be applied to other health behaviors The findings on the effects of smoking on Medicare and Medicaid will be surprising and perhaps controversial for the authors estimate the costs to be much lower than the damage awards being paid to 46 states as a result of the 1998
