Risk And Sociocultural Theory New Directions And Perspectives:

Risk and Sociocultural Theory Deborah Lupton, 1999-12-09 This 1999 book presents a variety of exciting perspectives on the perception of risk and the strategies that people adopt to cope with it Using the framework of recent social and cultural theory it reflects the fact that risk has become integral to contemporary understandings of selfhood the body and social relations and is central to the work of writers such as Douglas Beck Giddens and the Foucauldian theorists The contributors are all leading scholars in the fields of sociology cultural and media studies and cultural anthropology Combining empirical analyses with metatheoretical critiques they tackle an unusually diverse range of topics including drug use risk in the workplace fear of crime and the media risk and pregnant embodiment the social construction of danger in childhood anxieties about national identity the governmental uses of risk and the relationship between risk phenomena and social order

The Future of Hope Miroslav Volf, William Henry Katerberg, 2004 Over the last three decades a major cultural shift has taken place in the attitudes of Western societies toward the future Modernity's eclipse by postmodernity is characterized in large part by the loss of hope for a future substantially better than the present Old optimism about human progress has given way to uncertainty and fear In this book scholars from various disciplines theology the social sciences and the humanities explore the move from a culture of optimism to a culture of ambiguity and they seek to infuse today's jaded language of hope with a new vitality The Future of Hope offers a powerful critique of today's stifling cultural climate and shows why the vision of hope central to Christian faith must be a basic component of any flourishing society The first section of the book sets the context with telling cultural criticism of modernity The second section focuses on affinities between premodern Christian visions of hope and twentieth century thought The final section of the book examines the relationship between postmodern thought Christian tradition and biblical hope addressing how Christians in a postmodern world can best articulate their faith Written by truly profound thinkers these chapters are diverse in their content methodologies and temperament yet they are united by a deep engagement with both the Christian tradition and the larger cultural and intellectual climate in which we live and work The Future of Hope can thus be read not just as an attempt at retrieval of hope for today but as itself one small act of hope in an age when people too seldom take time to think critically and hopefully Contributors David Billings Robert Paul Doede Kevin L Hughes Paul Edward Hughes Daniel Johnson William Katerberg John Milbank Jurgen Moltmann James K A Smith Miroslav Volf Nicholas Wolterstorff

Empowerment, Health Promotion and Young People Grace Spencer, 2013-10-30 Globally young people's health is an increasing priority area for health practitioners policy makers and researchers and concepts of empowerment feature strongly in international public health discourses on young people's health Yet the concept of empowerment remains under theorized and its relationship to young people's health is not well understood This innovative volume critically examines the concept of empowerment and its relationship to young people's health Empowerment Health Promotion and Young People is set out in two main parts Part one examines differing conceptions of power and empowerment and how these concepts have been variously defined and used in relation to young people's health and health promotion Part two offers a new theoretical framework for understanding empowerment as it relates to young people's health Drawing together key works in the field and findings from an empirical enquiry on young people's health this framework looks at health as it is defined by young people themselves and offers new directions for empowerment and critical insights into the field of young people's health and health promotion Critically engaging with the concept of power and opening up the debate about the relevance and effectiveness of using contemporary understandings of empowerment to promote health this book is suitable for researchers and students of health sociology education and youth studies interested in young people's health and health promotion

Handbook of Social Problems George Ritzer, 2003-11-13 Ritzer's Handbook of Social Problems offers a comprehensive treatment of today's major societal issues. The articles are authored by some of the top scholars in the field and address problem areas that will capture the interests of students and professors alike. The international coverage is most welcome in this time of intensifying global inequalities. Nancy Jurik, Arizona State University. The Handbook of Social Problems: A Comparative International Perspective provides a unique broadly comparative perspective on the current state of social problems and deviance in a variety of societies around the world. Editor George Ritzer, along with leading U.S. and international sociologists, examines the relationship between social problems and a society's level of development and affluence. The essays in this volume focus on four interrelated issues involved in the relationship between social problems and the level of development and affluence. Less developed and less affluent societies are more likely to experience a range of social problems than developed and affluent societies. Affluence causes or at least brings with it a series of social problems that do not exist in less affluent societies. It is only with affluence that certain things can come to be imagined as social problems such as excessive consumption. The very affluence of a society makes it vulnerable to problems that would not be social problems in poorer societies. The Handbook explores the theory of the weakness of the strong: in other words, strong or wealthy nations may have greater vulnerability to some social problems than less developed or affluent societies. This theory is clearly illustrated in this volume by the aftermath of September 11, 2001, depicting the vulnerability of the U.S. to social problems in far removed corners of the world. In addition, the international and comparative essays in this volume cover other important issues such as the impact of modern technologies on social problems, ecological problems, global inequality, health as a social problem, and much more. The Handbook of Social Problems is a vital resource for sociologists and graduate students as well as an excellent addition to any academic library. Risk and Morality Richard V. Ericson, Aaron Doyle, 2003-01-01 Collectively the contributors explain why risk is such a key aspect of Western culture and demonstrate that new regimes for risk management are transforming social integration, value-based reasoning, and morality. **Risk and the English Novel** Julia Hoydis, 2019-09-23 Taking the cue from the currency of risk in popular and interdisciplinary academic discourse, this book explores the development of the English novel in relation to the emergence and institutionalization of risk from its origins in probability theory in the late seventeenth century to the global risk society in the twenty-first century. Focussing on 29 novels from Defoe to McEwan, this book argues for the contemporaneity of the rise of risk and the novel and suggests that there is much to gain from reading the risk society from a diachronic literary-cultural perspective. Tracing changes and continuities, the fictional case studies reveal the human preoccupation with safety and control of the future. They show the struggle with uncertainties and the construction of individual or collective logics of risk which oscillate between rational calculation and emotion, helplessness and denial, and an enabling or destructive sense of adventure and danger. Advancing the study of risk in fiction beyond the confinement to dystopian disaster narratives, this book shows how topical

notions such as chance and probability uncertainty and responsibility fears of decline and transgression all cluster around risk

Contours of the Nation Deborah McPhail, 2017-01-01 Contouring the Nation is the first book which historically explores obesity in Canada from a critical perspective Deborah McPhail demonstrates how obesity as a problem was affixed to particular populations in order to separate true Canadians from others

Social Science of the Syringe Nicole Vitellone, 2017-02-10 This book addresses the history of harm reduction It evaluates the consequences and constraints stakes and costs of the policy of needle exchange for the purposes of harm prevention and health research Vitellone situates the syringe at the centre of empirical research and theoretical analysis challenging existing accounts of drug injecting which treat the syringe as a dead device that simply facilitates social action between humans Instead this book complicates the relationship between human and object injecting drug user and syringe to ask what happens if we see the object as an intra active part of the sociality that constitutes injecting practices And what kinds of methods are required to generate a social science of the syringe that is able to measure injecting sociality Social Science of the Syringe develops material methodologies and epistemologies of injecting drug use to enact the syringe as an object of intellectual inquiry It draws on the methodologies of social anthropology Actor Network Theory Deleuze's empiricism and new feminist materialism to move towards materially engaged knowledge production This interdisciplinary approach improves understandings of the causes and effects of injecting behaviour and the problem of needle sharing as well as providing a more robust empirical framework to evaluate the motivations and consequences of drug use and drug policy This book will appeal to researchers and students interested in the sociology of health and illness STS Actor Network Theory empirical sociology medical anthropology social and cultural anthropology addiction theory and harm reduction

Sea Ports and Sea Power Lynn Harris, 2016-12-14 This volume represents a more Africanist approach to the framework of maritime landscapes and challenges of adapting international heritage policy such as the UNESCO convention While the concept of a maritime landscape is very broad a more focused thematic strategy draws together a number of case studies in South Africa Namibia Tanzania and Nigeria with a common thread Specifically the contributors address the sub theme of sea ports and sea power as part of understanding the African maritime landscape Sea ports and surrounds are dynamic centers of maritime culture supporting a rich diversity of cultural groups and economic activities Strategic locations along the African coastline have associations with indigenous maritime communities and trade centers colonial power struggles and skirmishes establishment of naval bases and operations and World War I and II engagements

research approaches as well as actual research results Case studies include medical anthropology cultural epidemiology cultural history and social medicine perspectives **The End of Fortuna and the Rise of Modernity** Arndt

Brendecke, Peter Vogt, 2017-09-25 The late 16th century and the first half of the 17th century saw a final resurgence of the concept of Fortuna Shortly thereafter this goddess of chance and luck who had survived for millennia rapidly lost her cultural and intellectual relevance This volume explores the late heyday and subsequent erasure of Fortuna It examines vernacular traditions and confessional differences analyses how the iconography and semantics of Fortuna motifs transformed and traces the rise of complementary concepts such as those of probability risk fate and contingency Thus a multidisciplinary team of contributors sheds light on the surprising ways in which the end of Fortuna intersected with the rise of modernity

Early Motherhood in Digital Societies Ranjana Das, 2019-12-11 Early Motherhood in Digital Societies offers a nuanced understanding of what the digital turn has meant for new mothers in an intense and critical period before and after they have a baby often called the perinatal period The book looks at an array of digital communication and content by drawing on an extensive research project involving in depth qualitative data from interviews with new mothers in the United Kingdom and online case studies These stories are analysed to investigate the complexity of emotions around birth the diversity of birth experiences and the myriad ways in which television the press and social media impede and empower women giving birth The book asks what does the use of technology mean in the perinatal context and what implications might it have for maternal well being It argues for a balanced and context sensitive approach to the digital for maternal well being in the critical perinatal period By doing this the book fills a gap in media studies addressing itself to gaps within audience analysis health communication and parenting It will be essential reading for research and teaching modules in media studies cultural studies sociology health communication and sociology of medicine and health Ulrich Beck Gabe Mythen, 2004-04-20

Ulrich Beck has emerged as one of the leading thinkers of the age His principal claim to fame is as author of the widely acclaimed Risk Society first published in 1986 Since this time Beck s work has had a profound effect on the trajectory of social theory leading to him being hailed as a zietgeist sociologist The risk society thesis has gained credence within the academic community and across the disciplines as a means of explaining the large scale changes that have enveloped contemporary society Despite its continued popularity as a touchstone for debate the risk society perspective is yet to be systematically unravelled Gabe Mythen provides both an introduction to and a critique of Beck s work that places his contribution within the context of other theorists of risk such as Giddens Douglas and Foucault Key areas of analysis include risk and the environment lifestyles and risk public perceptions media representations of danger and the changing nature of political engagement **Beyond The Risk Society: Critical Reflections On Risk And Human Security** Mythen,

Gabe, Walklate, Sandra, 2006-08-01 Bringing together cutting edge academics and researchers Beyond the Risk Society provides an understanding of the relevance and impact of the concept of risk in various subject areas Contributions by

domain experts critically evaluate the way in which theoretical risk perspectives have influenced their fields of interest offering the opportunity to reflect upon the problems and possibilities for future work on risk

On Vulnerability Patrick Brown, 2021-07-12 *On Vulnerability* maps out an array of perspectives for critically examining the nature of vulnerability its unequal patterning across different social groups alongside the everyday social processes that render us vulnerable interactions identity and group dynamics Each chapter equips the reader with a particular sensitising framework for navigating and questioning what it means to be vulnerable or how people cope amid vulnerability From deviance stigma and the spoiling or fracturing of identity to perspectives such as intersectionality risk emotions and the vulnerable body the book traces the theoretical roots of these different analytical lenses before applying these through illuminating examples and case studies Drawing on scholarship across more interpretative analytic and critical traditions the chapters combine into a multi dimensional toolkit which will enable the study of the cultural meanings of vulnerability the political economic factors that shape its patterning with a critical sensibility for unlearning many assumptions therefore challenging our sense of who is or who can be vulnerable This book is designed to equip undergraduate and post graduate students and researchers across the social health and human sciences aiding them as they study and question the experiences and structures of vulnerability in our social world
