Risk Taking And Decision Making:

Risk Taking and Decision Making, 1998-02 Risks are an integral part of complex high stakes decisions and decisionmakers are faced with the unavoidable tasks of assessing risks and forming risk preferences This is true for all decision domains including financial environmental and foreign policy domains among others How well decisionmakers deal with risk affects to a considerable extent the quality of their decisions This book provides the most comprehensive analysis available of the elements that influence risk judgments and preferences The book has two dimensions theoretical and comparative historical The study of risk taking behavior has been dominated by the rational choice approach Instead the author adopts a socio cognitive approach involving a multivariate theory integrating contextual cognitive motivational and personality factors that affect an individual decisionmaker s judgment and preferences the social interaction and structural effects of the decisionmaking group and its organizational setting and the role of cultural societal values and norms that sanction or discourage risk taking behavior The book s theoretical approach is applied and tested in five historical case studies of foreign military interventions The richly detailed empirical data on the case studies make them metaphorically speaking an ideal laboratory for applying a process tracing approach in studying judgment and decision processes at varying risk levels The case studies analyzed are U S interventions in Grenada in 1983 and Panama in 1989 both low risk Soviet intervention in Czechoslovakia in 1968 moderate risk U S intervention in Vietnam in 1964-68 high risk and Israel s intervention in Lebanon in 1982-83 high risk

Decision Making, Assessment and Risk in Social Work Brian J. Taylor, 2017-04-10. At a time when accountability and the avoidance of risk are increasingly demanded of social workers, the ability to make clear and informed decisions is essential. This book, written for practicing social workers undertaking their ASYE and compulsory CPD, has been designed to help professionals make sound judgments in increasingly complex contexts and under pressure. The focus is on empowering front-line professionals through reflective practice so that they are able to draw on multiple factors and perspectives and make sound problem-solving judgements. The book begins with the core concepts: client focus and legal background, before moving on to consider the collaborative processes and the nature of individual judgements. It then considers particular dimensions of social work decision making, such as safeguarding, taking risks, assessment and dynamic decision tools and processes. It then concludes by looking at the organisational context of decision management, with a focus on supervision, training and effective communication.
