local level Drawing on case studies of transnational conservation organizations in Southeast Asia and the Pacific *The Paradox of Scale* explores how NGOs build maintain and lose authority over time Balboa sets a new research agenda for the study of governance offering practical concepts and analysis to help NGO practitioners She introduces the concept of authority as a form of legitimated power explaining why it is necessary for NGOs to build authority at multiple scales when they create implement or enforce rules Examining the experiences of Conservation International in Papua New Guinea International Marinelife Alliance in the Philippines and the Community Conservation Network in Palau Balboa explains how a paradox of scale can develop even for those NGOs that seem powerful and effective Interdisciplinary in its approach *The Paradox of Scale* offers guidance for interpreting the actions and pressures accompanying work with NGOs showing why even the most authoritative NGOs often struggle to make a lasting impact

Stylistics and Social Cognition Poetics and Linguistics Association. Conference, 2007 This volume of articles comprises papers from the 25th annual conference of the Poetics and Linguistics Association PALA which was held at the University of Huddersfield England in July 2005 The theme of the conference was

Stylistics and Social Cognition and as usual at a PALA conference this theme was interpreted very widely by the participants as the reader of this book will no doubt conclude At the heart of this volume there is something of a reaction against the cognitive developments in stylistics which might be seen as being in danger of privileging the individual interpretation of literature over something more social The concern is to consider whether there is a more collective approach that could be taken to the meaning of text and whether recent insights from cognitive stylistics could work with this idea of collectivity to define something we might call commonality of meaning in texts Stylistics and Social Cognition will be of interest to those working in stylistics and other text analytic fields such as critical discourse analysis and those concerned with notions of interpretation collective meaning and human communication **Creating the Soul Body** Robert E. Cox, 2008-04-18

Outlines the principles and mechanics of the soul body the spiritual vehicle that enables individual consciousness to survive the body's death Shows that the ancient Vedic Egyptian Hebraic and Pythagorean traditions shared and understood this spiritual practice Reveals modern science as only now awakening to this ancient sacred science Ancient peoples the world over understood that individual consciousness is rooted in a universal field of consciousness and is therefore eternal surviving the passing of the physical body They engaged in spiritual practices to make that transition maximally auspicious These practices can be described as a kind of alchemy in which base elements are discarded and higher levels of consciousness are realized The result is the creation of a vehicle a soul body that carries consciousness beyond physical death These spiritual preparations are symbolized in the Vedic Egyptian and Hebraic traditions as a divine stairway or ladder a step by step path of ascent in which the practitioner raises consciousness by degrees until it comes to rest in the bosom of the infinite thereby becoming immortal This spiritual process explains the reincarnation of the Dalai Lama for example whose reincarnation is confirmed in infancy through physical and spiritual signs indicating that the consciousness has been carried from one lifetime to the next In *Creating the Soul Body* Robert Cox maps the spiritual journey of consciousness behind this sacred science of immortality and reveals the practice of creating a soul body in detail He also shows that this ancient spiritual science resembles advanced theories of modern science such as wave and particle theory and the unified field theory and reveals that modern science is only now awakening to this ancient science of immortality *A.
