Scare Time:

Scare is Must Rohit Bhatia, What exactly does fear mean Fear is the state of fear or anxiety about how something will turn out At different times in our lives we all experience confront and deal with various kinds of dread But is being afraid actually a bad thing What message is being conveyed by fear Fear is a natural human survival instinct thus it s not necessarily bad We are protected by fear It raises our threat awareness and equips us with defensive strategies In some circumstances feeling terrified is perfectly normal and even beneficial Fear can act as a signal or warning telling us to exercise caution Fear is the flame that transforms your life s clay into porcelain You acquire great beauty if you have the fortitude to stand up to the flames You become dust if you flee from your fear Welcome your inner hero like a reliable friend if you wish to bring it to life It is only when you muster the bravery to face your fears that you genuinely become yourself therefore embracing them and allowing them to teach you everything it has to offer Scare is Must is a book where the writers talk about their fears in life and other topics In Calmer Times Arthur J. Agent-Based Evolutionary Search Ruhul A. Sarker,Tapabrata Ray,2010-07-12 Agent based evolutionary search is an emerging paradigm in computational intelligence offering the potential to conceptualize and solve a variety of complex problems such as currency trading production planning disaster response management business process management etc There has been a significant growth in the number of publications related to the development and applications of agent based systems in recent years which has prompted special issues of journals and dedicated sessions in premier conferences The notion of an agent with its ability to sense learn and act autonomously lowers the development of a plethora of efficient algorithms to deal with complex problems This notion of an agent differs significantly from a restrictive definition of a solution in an evolutionary algorithm and opens up the possibility to model and capture emergent behavior of complex systems through a natural age oriented decomposition of the problem space While

this flexibility of representation offered by agent based systems is widely acknowledged they need to be signed for specific purposes capturing the right level of details and description This edited volume is aimed to provide the readers with a brief background of agent based evolutionary search recent developments and studies dealing with various levels of information abstraction and applications of agent based evolutionary systems There are 12 peer reviewed chapters in this book authored by distinguished researchers who have shared their experience and findings spanning across a wide range of applications

Garrison, 2011-04-16 From the foundation of the American Republic presidents have had to deal with both internal and external national security threats From President Washington and his policy of neutrality during the wars between Great Britain and France in the eighteenth century to President Lincoln and the war to save the union to President Wilson during the war to end all wars to President Roosevelt and war of the Greatest Generation to President Truman and his steel during the forgotten war and most recently to President Bush and the War on Terror presidents have had to use their power as commander in chief to meet the challenges of national crisis and war The judiciary specifically the Supreme Court has also played an integral part in the historical development and defining of the commander in chief power in times of war and national crisis from the earliest days of the republic How these powers have grown is a consequence of how the presidents have viewed the office of the presidency and how the judiciary has interpreted the commander in chief and executive power clauses of the U S Constitution over time Supreme Court Jurisprudence in Times of National Crisis Terrorism and War provides a chronological review of the major national security and war events in American history Garrison reviews the great debates between

Hamilton and Madison and Chief Justice Roger Taney and Attorney General Edward Bates on presidential executive power and how subsequent presidents have adopted the Hamiltonian view of the presidency. He also examines how Article III courts specifically the Supreme Court have defined expanded and established boundaries on the commander in chief power. With this historical backdrop Garrison reveals how for over two centuries the judiciary has defended the rule of law and maintained the principle that under the U S Constitution neither the guns of war nor threats to safety have silenced the rule of law.
