## **Scared Straight And The Panacea Phenomenon:**

**Scared Straight! and the Panacea Phenomenon** James O. Finckenauer, 1982      **Scared Straight!** James O. Finckenauer, 1999 This study examines why in the face of data that show its ineffectiveness the Scared Straight approach to delinquency prevention continues to be used in some jurisdictions The author's 1982 edition examined and critiqued the Scared Straight project at New Jersey's Rahway State Prison It identified the program as unable to deal with juvenile delinquency associated it with a pattern of failure in other efforts to deal with juvenile delinquency and linked these to a futile but persistent quest for simple remedies or cures This pattern was referred to as the panacea phenomenon This new edition updates the evidence and extends the discussion The panacea phenomenon is identified as a myth having the function of offering simple explanations for complex often otherwise unexplainable issues and problems The original Scared Straight case study is then reviewed and evidence of Scared Straight's performance since 1982 presented A description of Norway's Ullersmo project which operated from 1992 to 1996 and was based on U.S. models is offered as an international example of the panacea phenomenon in action The book concludes that Scared Straight and programs like it survive despite evidence that they do not work because they are harmonious with certain deeply held beliefs about crime punishment and human behavior One such belief that fear of consequences sustains behavioral change is a cornerstone of the Scared Straight program

*Scared Straight Ex and the Panacea Phenomenon* James O. Finckenauer, 1982      **Preventing Crime** Brandon C. Welsh, David P. Farrington, 2007-08-09 Crime prevention should be rational and should be based on the best possible evidence Decision makers should weigh heavily any available evidence on what works best How can a program that has produced no discernable evidence of effectiveness as shown through numerous evaluations be considered for implementation Unfortunately this happens all the time Evidence based crime prevention attempts to overcome this and other obstacles by ensuring that the best available evidence is considered in any decision to implement a program designed to prevent crime This book is about evidence based crime prevention A project of the Campbell Collaboration Crime and Justice Group Preventing Crime brings together the leading scientific evidence on what works best for a wide range of interventions organized around four important domains in criminology at risk children offenders victims and places It is the first book to assess the effectiveness of criminological interventions using the most rigorous review methodology of the systematic review It is an indispensable guide to the leading scientific evidence on what works best to prevent crime

Medical Experimentation Charles Fried, 2016-05-02 First published in 1974 Charles Fried's Medical Experimentation is a classic statement of the moral relationship between doctor and patient as expressed within the concept of personal care This concept is then tested in the context of medical experimentation and more specifically the randomized controlled trial RCT Regularly referred to as a point of departure for ethical and legal discussions of the RCT the book has long been out of print This new second edition includes a general introduction by Franklin Miller and the late Alan Wertheimer a reprint of the

1974 text and an in depth analysis by Harvard Law School scholars I Glenn Cohen and D James Greiner which discusses the extension of RTCTs to social science and public policy contexts The volume concludes with a new essay by Charles Fried that reflects on the original text and how it applies to the contemporary landscape of medicine and medical experimentation

**Lawful Order** Leo Carroll, 2005-09-14 Prisons remain a controversial topic for debate in our society. While few doubt the necessity of their existence, there is considerable debate over their purpose, organization, and processes. Do prisons exist to rehabilitate, punish, or simply incarcerate? How do we judge prison conditions? If those conditions are found to be unacceptable, how do we change them? What are a prisoner's rights? This book charts the history of Rhode Island's Adult Correctional Institutions over the past 40 years. Professor Carroll examines the radical transformation of Rhode Island prisons in response to changes in their external environment and determines that the transformation can be seen to manifest five distinct stages: patriarchy, anarchy, restoration, threat, and consolidation.

**Deviant Behaviour** Clifton D. Bryant, 2014-09-03 A comprehensive set of readings examining the full range of concerns in the field of deviant behaviour. All the selections are relatively recent and have not appeared in other anthologies.

**Introductory Criminology** Marcus Felson, Mary A. Eckert, 2017-12-04 Introductory Criminology: The Study of Risky Situations takes a unique and intuitive approach to teaching and learning criminology. Avoiding the fragmentation of ideas commonly found in criminology textbooks, Marcus Felson and Mary A. Eckert develop a more practical, readable structure that engages the reader and enhances their understanding of the material. Their descriptive categories simultaneously broad and realistic serve better than the usual philosophical categories such as positivism and classicalism to stimulate students' interest and critical thinking. Short chapters, each broken into 5-7 sections, describe situations in which crime is most likely to happen and explain why they are risky and what society can and cannot do about crime. They create a framework to organize ideas and facts and then link these categories to the leading theories developed by criminologists over the last 100 years. With this narrative to guide them, students remember the material beyond the final exam. This fresh new text was created by two professors to address the main points they encounter in teaching their own criminology courses. Problems solved include reluctant readers' aversion to abstract thinking, fear of theory, and boredom with laundry lists of disconnected ideas. Felson, a leader in criminology theory with a global reputation for innovative thinking, and Eckert, an experienced criminal justice researcher, are uniquely qualified to reframe criminology in a unified arc. By design, they offer abstractions that are useful and not overbearing; their prose is readable, and their concepts are easy to comprehend and remember. This new textbook challenges instructors to re-engage with theory and present the essence of criminological thought for adult learners, coaching students to grasp the concept before any label is attached and allowing them to emerge with deeper understanding of what each theory means and offers. Lean with no filler or fluff like stock photos. Introductory Criminology includes the authors' graphics to crystallize and expand

concepts from the text Decade of Nightmares Philip Jenkins, 2006 Drawing on a wide array of sources the author of *Dream Catchers* identifies 1975 to 1986 as the watershed years when Americans rejected the radicalism of the 1960s and adopted a more pessimistic interpretation of human behavior Twenty-one Mental Models That Can Change Policing Renée J. Mitchell, 2021-09-15 This book goes beyond other police leadership books to teach practitioners how to think about policing in a structured way that synthesizes criminological theory statistics research design applied research and what works and what doesn't in policing into Mental Models A Mental Model is a representation of how something works Using a Mental Model framework to simplify complex concepts readers will take away an in depth understanding of how cognitive biases affect our ability to understand and interpret data what empirical research says about effective police interventions how statistical data should be structured for management meetings and how to evaluate interventions for efficiency and effectiveness While evidence based practice is critical to advancing the police profession it is limited in scope and is only part of what is necessary to support sustainable change in policing Policing requires a scientifically based framework to understand and interpret data in a way that minimizes cognitive bias to allow for better responses to complex problems Data and research have advanced so rapidly in the last several decades that it is difficult for even the most ambitious of police leaders to keep pace The Twenty one Mental Models were synthesized to create a framework for any police public or community leader to better understand how cognitive bias contributes to misunderstanding data and gives the reader the tools to overcome those biases to better serve their communities The book is intended for a wide range of audiences including law enforcement and community leaders scholars and policy experts who specialize in policing students of criminal justice organizations and management reporters and journalists individuals who aspire to police careers and citizen consumers of information about policing Anyone who is going to make decisions about their communities based on data has a responsibility to be numerate and this book *Twenty one Mental Models That Can Change Policing A Framework For Using Data and Research For Overcoming Cognitive Bias* will help you become just that **Corrections** Michael Welch, 2013-10-14 Review questions Recommended readings 3 America's Penal Past Introduction Colonial America Methods of punishment William Penn and the Great Law Analyzing punishment in colonial America Prisons in the nation's early years Newgate Prison Connecticut subterranean incarceration and political imprisonment The Walnut Street Jail penal reform and the quest for state power Newgate Prison New York City The Jacksonian era Reconceptualizing crime as a social problem The Pennsylvania and Auburn systems of prison discipline Elam Lynds warden of Auburn and Sing Sing Correctional Options Incentives Amendments Act United States.
