Petroleum Refinery Operations Scheduling. Chapter V. A Gasoline Blending Problem Alan S. Manne, RAND CORP SANTA MONICA CALIF., 1954. The selection of an optimal gasoline blending schedule is presented. Assuming fixed availabilities of raw blending materials and of fixed realizations upon finished products, the Union Oil Company's gasoline blending operations were formulated in terms of a constrained maximum problem. The outstanding result of the numerical analysis was that it would be worth several millions of dollars per annum if the company were able to shift sales so as to sell additional quantities of premium grade gasoline.
