the Netherlands Marcel C. A. van den Nieuwenhuijzen, 2010-09-24 The Netherlands is one of a handful of countries in which bank enterprise and national financial law give rise to a large number of international financial transactions. It is important then for practitioners in other countries to gain more than a notional understanding of the specific features of Dutch financial law as well as a clear working knowledge of how Dutch financial law interacts with supranational regulatory and policy regimes affecting financial transactions. Toward this end, this very useful book provides a practical but nevertheless thorough survey of Dutch financial law with lucid explanations of such topics as the following: specific rules applicable to investment institutions; specific rules applicable to debt instruments offering securities in both primary and secondary markets; set off and calculation of obligations of market participants; netting structures for custody and book entry transfer of securities; obtaining and terminating listings; mandatory bids; competing bids; friendly and unfriendly bids under public offering regulations; alternative investment funds and fund governance; meaning, jargon and function of derivatives; forwards, futures, options, swaps, etc.; securities repurchase and lending transactions; covered bond regulations; caretaking duties in private and public law; structure of legal proceedings of a prospectus liability claim; unfair commercial practices rules; case law in insider trading and market manipulation; and securities litigation in Dutch private criminal and administrative law. Written in clear, easy-to-follow English, this book makes Dutch financial law accessible to lawyers, business persons, and others whose work entails financial transactions in the Netherlands. It also serves as an admirable text for students and academics in the field of financial law.

Introduction to Dutch Law Jeroen Chorus, 2016-04-18 A standard legal resource since its first edition in 1978, this matchless book has proven itself the ideal overview of Dutch law for foreign lawyers. This Fifth Edition fully updates its systematic description of the legal sources, institutions, and concepts in all major fields of law. Recent developments covered include the progressive implementation of standards set by international conventions, the reorganization of the judiciary, the statute on environmental law, and the re-codification of private international law. The continuing influence of European law is evident in many fields, perhaps most notably in family law. The various chapters are written by experts, scholars, and lawyers in particular fields and provide an authoritative overview of each field. The historical sources of Dutch law are discussed as well as Dutch legal culture, judicial organization, legal education, and the legal profession. These chapters are followed by introductions to essential issues of private and public law and labour law. The last chapter examines questions of legal philosophy. The only resource of its kind available, this book is unmatched as a thorough guide to further research. It offers practitioners, particularly foreign lawyers, a quick and reliable way into any area of Dutch law that they may be required to research. It will also be of great value to comparatists, especially those studying the influence of European law on national legal systems, scholars, and students. Like previous editions, the Fifth Edition has been prepared under the auspices of the Netherlands Comparative Law Association.

European Financial Regulation Veerle Colaert, Danny Busch, Thomas Incalza, 2019-12-26 Mirroring the long established structure of the financial industry EU financial regulation as we know it today approaches banking insurance and investment services separately and often divergently In recent decades however the clear separation between financial sectors has gradually evaporated as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries As the contours of the traditional tripartition in the financial industry have faded the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross sectoral perspective For each specific research theme including prudential regulation corporate governance and conduct of business rules the similarities as well as gaps overlaps and unjustifiable differences between banking securities and insurance regulation are clearly presented and discussed This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes
