David Mech,2015-05-22 The interactions between apex predators and their prey are some of the most awesome and meaningful in

nature displays of strength endurance and a deep coevolutionary history And there is perhaps no apex predator more impressive and important in its hunting or more infamous more misjudged than the wolf Because of wolves habitat speed and general success at evading humans researchers have faced great obstacles in studying their natural hunting behaviors The first book to focus explicitly on wolf hunting of wild prey Wolves on the Hunt seeks to fill these gaps in our knowledge and understanding Combining behavioral data thousands of hours of original field observations research in the literature a wealth of illustrations and in the e book edition and online video segments from cinematographer Robert K Landis the authors create a compelling and complex picture of these hunters The wolf is indeed an adept killer able to take down prey much larger than itself While adapted to hunt primarily hoofed animals a wolf or especially a pack of wolves can kill individuals of just about any species But even as wolves help drive the underlying rhythms of the ecosystems they inhabit their evolutionary prowess comes at a cost wolves spend one third of their time hunting the most time consuming of all wolf activities and success at the hunt only comes through traveling long distances persisting in the face of regular failure detecting and taking advantage of deficiencies in the physical condition of individual prey and through ceaseless trial and error all while risking injury or death By describing and analyzing the behaviors wolves use to hunt and kill various wild prey including deer moose caribou elk Dall sheep mountain goats bison musk oxen arctic hares beavers and others Wolves on the Hunt provides a revelatory portrait of one of nature s greatest hunters

Goats Sheep and Wolves Verna MacKay,2015-04-28 This is a workbook At the end of each topic there are reflections and activities for the reader to do In this book the reader will find that there are people who proclaim to be Christians who are not a part of the true followers of Jesus Christ The bible calls them wolves living among the sheep The wolves represent the disciples of Satan while the sheep represents the children or followers of the Lord This book gives examples of wolves and sheep The Lord wants everyone saved into his kingdom but there are those will reject the free offer of salvation and will be eternally lost This book takes the readers using their imagination into the homecoming of Jesus into heaven after his resurrection from the grave the response from the holy angels as they welcome their Commander and Chief Jesus Christ This book offers those who have surrendered their lives to the Lord a glimpse of what heaven will be like for them when they finally get there and of the New Jerusalem

This book was born out of a prophetic dream my mom had back in November 1988 which indeed has been my spiritual compass guiding me onto the path of destiny and allowing me to finally see it come to fruition from February 29 that evening at 11 59 p m PST I was told by the Holy Ghost to submit my manuscript and I obeyed God On March 8 2024 I received the call from my literary agent saying that they had accepted and approved my manuscript that it was well received and that they wanted it to be published My response was a loud holler and crying at the same time For me it is a miraculous event In addition to that miraculous event as I read my manuscript and review the edited copy I find myself living some of this out right now because faith will take you there before you actually get there Now faith is the substance of things hoped for the evidence of things not seen Hebrews 11 1 I am Marquita G Hides currently residing in the region of California I was born and raised in the city of Fort Wayne the hub of Northeast Indiana and am the sixth of eight children At the tender age of sixteen I made the intelligent decision to receive Jesus Christ into my heart as my Savior and Lord inspired by the best Christian example before me in my mother who was the most wonderful person in the world and is now with the Lord I am an itinerant preacher preaching the love and power of God across the country I have to thank my God for all my academic achievements being I am a graduate of Oral Roberts University with a master's degree in Christian ministry and I completed my undergraduate studies at Trinity College of Port Richey Florida obtaining my bachelor of arts in organizational management My heart desires to see and especially equip every born again believer in the Lord Jesus Christ to come into their spiritual purpose and fulfill the will of God in their lives whether they are young in their middle years or in their golden years Our Lord Jesus said it like this Lo I come in the volume of the book it is written of me I delight to do thy will O my God yea thy law is within my heart **Biodiversity** Anne Elizabeth Maczulak,2010 Students with a basic understanding of the environment and concern for its future know the importance of preserving biological diversity Biodiversity is the variety of living things on Earth or in a specific area This definition seems simple enough to understand yet the concept of biodiversity has deeper meanings that challenge even trained environmental scientists A region that has a wide variety of species in robust populations is said to possess biodiversity But not every place on Earth bursts with diverse life Biodiversity concentrates in certain areas while other parts of the globe possess a somewhat lesser variety and number of species Kelly's Customs Tariffs of the World ,1922 The Friendship of a Mountain Pascal Bruckner,2023-05-25 Why are we fascinated by mountains These outcrops of rock were once considered unsightly something to be avoided at all costs but since Rousseau they have been contrasted with our corrupt cities and viewed as serene enclaves of beauty and relaxation But why climb to the summit only to come back down again Why does the toil of climbing convert into joy What metaphysics of the absolute is playing out here what challenge does climbing pose to time and ageing to fearful panic to the brush with danger which leads

to conquest It s not faith that elevates mountains it s mountains that elevate our faith in challenging us to overcome them These hooded majesties crush some people while exalting others For the latter climbing means being born again reaching a state of exhilaration Being seized by exhaustion upon arriving at the summit is akin to casting your eyes upon paradise Is it the stinging cold the wind so strong that it almost knocks you down or is it higher powers that speak to us in this mixture of terror and beauty A child of the mountains who spent his youth in Austria and Switzerland Pascal Bruckner has special ties to the subject of this book the further he climbs the more he reconnects to his past In sparkling and sensual prose Bruckner s paean to the majesty of mountains weaves together things seen and things read childhood memories literature and philosophy interlaced with reflections on life ageing and the unrivalled beauty of an ecosystem that we are in danger of destroying

Cattle, Their Predators and Geomatics Research Michael O'Neal Campbell, 2025-08-06 Cattle are currently the most important domesticated mammals with populations numbering in the hundreds of millions and occupying large tracts of land while the conservation of large mammalian carnivores is becoming a dominant discourse in modern geopolitics also claiming large portions of the Earth s land surface Computer based surveying and communication systems including geomatics Big Data and Big Tech are becoming an essential part of human communication and environmental assessments and are critical to large scale assessments of land conflicts A current critical potent but neglected issue concerns the measurement of the interfaces of large carnivore and cattle ecologies in a cross continental format This book offers a novel approach to the interfaces of the sciences of conservation biology animal ecology agricultural development and geomatics which are increasingly interconnected in modern global development scenarios For animal ecology and conservation biology it is about the management systems that have developed from ecological and human parameters For agricultural development topics concern ancestral development physiological

characteristics ecological requirements and predation opportunities and conflicts of cattle breeds For geomatics the topics concern the image based and survey based technologies that enable more critical environmental assessments The book takes a novel approach by examining the ancestry of cattle including the aurochs and current wild buffalos gaur banteng yaks bison the process of domestication into taurine and indicine cattle the semi domestication of yaks and water buffalo the ecologies of ancestral and modern large carnivores including bears big cats and canids and how the requirements of these large charismatic mammals conflict with the requirements of cattle and agricultural development in Asia Europe Africa North America and South America This integrative approach contributes to the interests of academic researchers students practitioners and policy makers and general readers

A New Reading of the Animal Apocalypse of 1 Enoch Daniel Olson, 2013-03-15 A New Reading of the Animal Apocalypse of 1 Enoch is the most comprehensive theological commentary on this important second century BCE Jewish apocalypse to date laying out the purpose and methodology of this Enochic allegory and using this as the basis for a new commentary on the whole text presented here in a fresh translation Against other interpretations that focus on Israel and its institutions Daniel Olson argues that the promise of universal blessing in the Abrahamic covenant is presented in the Animal Apocalypse as the governing dynamic in a sacred history that begins and ends with humanity in general The authentic Jacob Israel will appear in the end times and be the catalyst of universal salvation
