Teaching Shakespeare and Marlowe L. E. Semler, 2014-02-13

This book explores how to achieve innovative approaches to teaching and learning Shakespeare and Marlowe within formal learning systems such as school and university The Inquiring Organization Catherine Kikoski, John Kikoski, 2004-07-30

This book provides the context and tools to create knowledge via a proven process of inquiry questions and conversation. It introduces the theoretical background to explain why as well as the practical hands on skills and processes to demonstrate how to surface tacit knowledge that which we know but which we have not yet made explicit in conversation e.g. background education and experience and create new knowledge in collaboration with colleagues. In the information economy knowledge is an asset and a currency. The creation of new knowledge therefore enhances an organization's position in the marketplace. How do we create new knowledge? We don't do it by learning what is already known. The learning organization is already past. Instead we do it by inquiring which is a method of bringing tacit knowledge to the forefront of awareness. The inquiring organization surfaces tacit knowledge which is what its employees bring to the table: their background, education, experience, character and judgment, and transforms that knowledge into new explicit knowledge that can be transferred from one employee to another through conversation. That is true knowledge creation and this book provides the tools, skills, techniques and processes for executives and professionals in any field to accomplish this task in today's fluid environment. Today's new breed of eXtreme projects are different. They feature high speed, high change, high complexity, high risk and high stress. While traditional projects follow the classic model of ready aim fire, eXtreme project managers succeed by shooting the gun and then redirecting the bullet while not losing sight of their moving target. *eXtreme Project Management* provides a practical guide for leaders working under high risk and high pressure while producing the desired bottom line results. Based on Doug DeCarlo's extensive experience in working with more than 250 project teams, his eXtreme project management model is built around an integrated set of principles, values, skills, tools and practices proven to consistently work under conditions of rapid change and uncertainty. eXtreme project management is based on the premise that you don't manage the unknown the same way you manage the known. It's a people-centric approach to high performance that makes quality of life a fundamental part of the project venture. *Public Health Leadership* Louis Rowitz, 2014.
