Making the Law of the Sea James Harrison, 2011-04-14 The law of the sea is an important area of international law which must be able to adapt to the changing needs of the international community Making the Law of the Sea examines how various international organizations have contributed to the development of this law and what kinds of instruments and law making techniques have been used Each chapter considers a different international institution including the International Maritime Organization and the United Nations and analyses its functions and powers Important questions are posed about the law making process including what actors are involved and what procedures are followed Potential problems for the development of the law of the sea are considered and solutions are proposed In particular James Harrison explores and evaluates the current methods employed by international institutions to coordinate their law making activities in order to overcome fragmentation of the law making process

Risk and the Regulation of Uncertainty in International Law Monika Ambrus, Rosemary Rayfuse, Wouter Werner, 2017-10-27 Increasingly international legal arrangements imagine future worlds or create space for experts to articulate how the future can be conceptualized and managed With the increased specialization of international law a series of functional regimes and sub regimes has emerged each with their own imageries vocabularies expert knowledge and rules to translate our hopes and fears for the future into action in the present At issue in the development of these regimes are not just competing predictions of the future based on what we know about what has happened in the past and what we know is happening in the present Rather these regimes seek to deal with futures about which we know very little or nothing at all futures that are inherently uncertain and even potentially catastrophic futures for which we need to find ways to identify conceptualise manage and regulate risks the existence of which we can possibly only speculate about This book explores how the future is imagined articulated and managed across the various fields of international law including the use of force maritime security international economic and environmental law and human rights It investigates how the future is construed in these various areas how the costs of risk risk regulation risk assessment and risk management are distributed in international law the effect of uncertain futures on the subjects of international law and the way in which international law operates when faced with catastrophic or existential risk

The law of the sea Robin Churchill, Vaughan Lowe, Amy Sander, 2022-05-10 For nearly forty years The law of the sea has been regarded as an authoritative and standard work on the

subject combining detailed analysis and relevant practical examples with a clear and engaging style Completely revised and updated this new edition will be a vital resource for anyone with an interest in maritime affairs The book provides a rigorous analysis of the 1982 UN Convention on the Law of the Sea and the many other legal instruments that regulate human activities at sea as well as taking full account of the numerous decisions of international courts and tribunals in recent years It also traces the historical background to the law and its broader political economic and environmental context The new edition includes substantially expanded coverage of contemporary threats faced by the marine environment from human activities such as the loss of marine biodiversity the effects of climate change on the oceans and the vast amounts of plastic polluting the sea This volume is written by three highly qualified authors drawing on their extensive experience of teaching and researching the law of the sea as well as their practical experience in advising governments and acting as counsel and arbitrators in international litigation

Asian Maritime Power in the 21st Century Vijay Sakhuja, 2011 Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates exponential expansion of science technology and industrial growth

The Changing Dimensions of Security Dr. Suresh R, 2015-10-01 The end of cold war and the on going globalization process along with the proliferation of non traditional threat to security of the nations led to multilateralism in international relations Though the great powers are not ready to accept the new developments the post cold war events such as threat from non state actors to the security of nation the global economic slowdown and global climate change compelled even the most militarily powerful nation to seek multilateral approach to address these trans border menaces The global movements towards democratization and protection and promotion of human rights supported by ICT once again brought individuals rights and security into focal point It appears that even if nations are secure people living there may not be secure The civil wars taken place in some nation states to protect the rights of multi ethnic groups or the demand for right to self determinations of people are examples of such a situation In this context security means people s security and international efforts are required to ensure people s security from any threat emanates from within or outside the nation states Thus human security assumes great significance in the post cold war era of profoundly interdependent global system There is a blurred boundary between national security and international security on the one hand and the national security and human security on the other hand The initiative taken by the new government at the federal level towards good neighbourhood and better relation with great powers along with focusing more on human security issues appears to be policy in the right direction Again the shift from a land centric security paradigm to maritime security and coastal security are also visible in recent times The book deals with the changing dimensions of security at the theoretical level and a wide spectrum of security issues that India is confronted with and also certain policy options In the theoretical section the strategic doctrine of India is well reviewed and policy options are also explored It covers areas such as

biological perspective of security human security perspective energy security and maritime security In addition it also examines some of the bilateral security issues and concerns with neighbouring countries

Filling Regulatory Gaps in High Seas Fisheries Yoshinobu Takei, 2013-03-27 In *Filling Regulatory Gaps in High Seas Fisheries* author Yoshinobu Takei investigates the regime of high seas fisheries from the perspective of international law and considers whether there are regulatory gaps in high seas fisheries and if so how they should be filled The book focuses on topical issues such as the management of deep sea fisheries on the high seas and the protection of vulnerable marine ecosystems In view of the current state of marine fisheries resources together with ecosystem concerns swift and effective action is required to improve fisheries management in particular for high seas fisheries Takei thoroughly analyzes the current state of affairs and convincingly suggests steps to be taken in the future

International Environmental Law Ulrich Beyerlin, Thilo Marauhn, 2011-08-11 *International Environmental Law* is a new textbook written for students practitioners and anyone interested in the subject The overall aim of the book is to provide a fresh understanding of international environmental law as a whole seen in the light of climate change biodiversity loss and the other serious environmental challenges facing the world The book has also been kept

deliberately manageable in size by careful selection of topics and by adopting a cross cutting synthesis of regulatory interaction in the field This enables the reader to place international environmental law in the broader context of public international law in general revealing at the same time that international environmental law is experimental ground for developing new legal approaches towards global governance To this end the authors have combined theory and practice Apart from discussing concepts rule making and compliance the book looks at options for improved coordination harmonisation and even integration of existing multilateral environmental agreements analysing how conflicts between various environmental regimes can be avoided or at least adequately managed The authors argue that an appropriate management of international environmental relations must address the North South divide which continues to be a major obstacle to global environmental cooperation Furthermore the authors emphasise the growing human rights dimension of international environmental law This book is an ideal door opener for the further study of international environmental law Focusing on international environmental governance in a comprehensive way it serves to explain that each institution each actor and each instrument is part of a multi dimensional process in international environmental law and relations
