information is provided on issues not well documented in the past e.g. the involvement of external actors in curriculum design, career services for students and links between governance and funding. The Milano based team of scholars convincingly interpret the opportunities and problems of higher education reforms aiming to position higher education in the knowledge society. Ulrich Teichler, University of Kassel, Germany, *European Universities and the Challenge of the Market* by Marino Regini offers a timely, refreshing and well researched account of one of the most important changes in European and other higher education: the rise of competition and the market as key policy drivers. This is a global template whose diffusion and domestications are hugely important for higher education policy research and Regini's book begins lucidly and insightfully to fill in longstanding gaps for us. Just as crucially, the book provides valuable material on both the convergences and divergences we find increasingly between globally situated higher education states. Roger King, Open University and London School of Economics, UK. UK academics are frequently exhorted to integrate a European and global perspective into their syllabuses, especially where their students are drawn from a wide variety of national backgrounds. But this is difficult when there is a dearth of detailed, accessible, contemporary accounts of national practices elsewhere. This edited book goes a very long way to help them. It offers detailed, rigorously researched descriptions of the nature and effects on higher education of its marketisation, descriptions rooted in robust theoretical and conceptual frameworks which help the reader situate the descriptions in their own context. Paul Trowler, Lancaster University, UK.

Gergana Noutcheva, 2012-07-26 The Balkan countries have responded differently to the EU's conditional offer of membership. This book examines the diverging compliance patterns of the Balkan accession states and asks why some of them have complied substantially, some only partially, and others have defied the EU. The book examines the compliance of the Balkan states with the EU accession conditionality, arguing that the variation in the compliance behavior of Balkan governments hinges on three main factors: the legitimacy of the EU conditions as seen domestically in the accession states, the costs of compliance, and the EU's ability and willingness to use its superior power resources to impose compliance when faced with domestic defiance. Placing important events from the most recent political history of the Balkans in a broader historical perspective, the author evaluates the successes and failures of the EU's state building policies in the Balkans, a geographical area of the highest priority for the EU's foreign policy and a test case for the EU's capacity and willingness for foreign policy action. Based on detailed empirical data, *European Foreign Policy and the Challenges of Balkan Accession* will be of interest to scholars and students of EU and comparative politics and those focusing on policy impact in EU integration. **Private**
