The Oxford Handbook of

Late Antiquity Scott Fitzgerald Johnson, 2015-11 The Oxford Handbook of Late Antiquity offers an innovative overview of a period c 300 700 CE that has become increasingly central to scholarly debates over the history of western and Middle Eastern civilizations This volume covers such pivotal events as the fall of Rome the rise of Christianity the origins of Islam and the early formation of Byzantium and the European Middle Ages These events are set in the context of widespread literary artistic cultural and religious change during the period The geographical scope of this Handbook is unparalleled among comparable surveys of Late Antiquity Arabia Egypt Central Asia and the Balkans all receive dedicated treatments while the scope extends to the western kingdoms and North Africa in the West Furthermore from economic theory and slavery to Greek and Latin poetry Syriac and Coptic literature sites of religious devotion and many others this Handbook covers a wide range of topics that will appeal to scholars from a diverse array of disciplines The Oxford Handbook of Late Antiquity engages the perennially valuable questions about the end of the ancient world and the beginning of the medieval while providing a much needed touchstone for the study of Late Antiquity itself Law and Society in the Age of Theoderic the Great Sean D. W. Lafferty, 2013-07-25 This book explores the evolution of Roman law and society in Italy from 493 with the proclamation of the Ostrogoth Theoderic the Great as king until about 554 when the eastern Emperor Justinian was able to re establish imperial authority in the region Drawing upon evidence from a variety of legal and historical sources it investigates how Theoderic and his successors attempted to govern the peninsula in the wake of foreign invasions the collapse of civic administration the break up of the Mediterranean economy and the emergence of new forms of religious and secular authority It challenges long held assumptions as to just how peaceful prosperous and Roman like Theoderic's Italy really was Its primary focus is the Edictum Theoderici a significant but largely overlooked document that offers valuable historical insights into the complex and sometimes contested social political and religious changes that marked Italy's passage from Antiquity into the Middle Ages **From Plato to NATO** David Gress, 1998 The end of the Cold war and the imminent unification of Europe raises urgent questions about the future of the Western Alliance FROM PLATO TO NATO analyses European civilisation's legacy from its inception and traces the ongoing debate about the West through to the present day David Gress assesses historical accounts of the West and argues that while often attacked as a cover for exploitation the legitimacy and unity of the West appears to contain both the rationality of the enlightenment and the mythological visions of fascism It will be up to the Westerners to choose which West they want to embrace FROM PLATO TO NATO is the first book to make sense of the enduring value of Western politics and culture at a time when the West is facing its greatest challenge since World War Two how to include new democracies in a world order that is struggling to preserve the egalitarian values of the Western Tradition *Religion in Roman Egypt* David Frankfurter, 2020-06-30 This exploration of cultural resilience examines the complex fate of classical Egyptian religion during the centuries from the period when Christianity first made its appearance in Egypt to when it became the region's dominant religion roughly 100 to 600 C E

Taking into account the full range of witnesses to continuing native piety from papyri and saints lives to archaeology and terracotta figurines and drawing on anthropological studies of folk religion David Frankfurter argues that the religion of Pharonic Egypt did not die out as early as has been supposed but was instead relegated from political centers to village and home where it continued a vigorous existence for centuries In analyzing the fate of the Egyptian oracle and of the priesthoods the function of magical texts and the dynamics of domestic cults Frankfurter describes how an ancient culture maintained itself while also being transformed through influences such as Hellenism Roman government and Christian dominance Recognizing the special characteristics of Egypt which differentiated it from the other Mediterranean cultures that were undergoing simultaneous social and political changes he departs from the traditional decline of paganism triumph of Christianity model most often used to describe the Roman period By revealing late Egyptian religion in its Egyptian historical context he moves us away from scenarios of Christian triumph and shows us how long and how energetically pagan worship survived

Between Christ and Caliph Lev E. Weitz, 2018-04-04 In the conventional historical narrative the medieval Middle East was composed of autonomous religious traditions each with distinct doctrines rituals and institutions Outside the world of theology however and beyond the walls of the mosque or the church the multireligious social order of the medieval Islamic empire was complex and dynamic Peoples of different faiths Sunnis Shiites Christians Jews and others interacted with each other in city streets marketplaces and even shared households all under the rule of the Islamic caliphate Laypeople of different confessions marked their religious belonging through fluctuating sometimes overlapping social norms and practices In *Between Christ and Caliph* Lev E Weitz examines the multiconfessional society of early Islam through the lens of shifting marital practices of Syriac Christian communities In response to the growth of Islamic law and governance in the seventh through tenth centuries Syriac Christian bishops created new laws to regulate marriage inheritance and family life The bishops banned polygamy required that Christian marriages be blessed by priests and restricted marriage between cousins seeking ultimately to distinguish Christian social patterns from those of Muslims and Jews Through meticulous research into rarely consulted Syriac and Arabic sources Weitz traces the ways in which Syriac Christians strove to identify themselves as a community apart while still maintaining a place in the Islamic social order By binding household life to religious identity Syriac Christians developed the social distinctions between religious communities that came to define the medieval Islamic Middle East Ultimately *Between Christ and Caliph* argues that interreligious negotiations such as these lie at the heart of the history of the medieval Islamic empire

The Modern Origins of the Early Middle Ages Ian Wood, 2013-09-27 The Early Middle Ages which marked the end of the Roman Empire and the creation of the kingdoms of Western Europe was a period central to the formation of modern Europe This period has often been drawn into a series of discourses that are more concerned with the eighteenth nineteenth and twentieth centuries than with the distant past In *The Modern Origins of the Early Middle Ages* Ian Wood explores how Western Europeans have looked back to the Middle Ages to

discover their origins and the origins of their society Using historical records and writings about the Fall of Rome and the Early Middle Ages Wood reveals how these influenced modern Europe and the way in which the continent thought about itself He asks and answers the important question why is early medieval history or indeed any pre modern history important This volume promises to add to the debate on the significance of medieval history in the modern world

The Care of the Brain in Early Christianity Jessica Wright,2022-12-14 The care of the brain in early Christianity is a history of the brain during late antiquity Through close attention to ancient medical material and its transformation in Christian texts Jessica Wright traces the roots of cerebral subjectivity the identification of the individual self with the brain a belief very much still with us today to tensions within early Christianity over the brain s role in self governance and its inherent vulnerability Examining how early Christians appropriated medical ideas Wright tracks how they used the vulnerability of the brain as a trope for teaching ascetic practices therapeutics of the soul and the path to salvation Bringing a medical lens to the religious discourse this text demonstrates that rather than rejecting medical traditions early Christianity developed through creatively integrating them Publisher s website

Reforming the Household of God Gray, Allison L.,2022 If the household of God that is the living Church is to flourish as a space where all can belong we need to meet the major challenges we face as Christians with a commitment to compassionate listening a willingness to engage in difficult or even painful conversations and a genuine dedication to taking action that serves our siblings in the human family For crucial conversations about lay leadership institutional reform and community belonging to take place the faithful must first feel empowered to see and articulate connections between their lived experiences and the foundational texts that are part of the authoritative canon of Scripture We have to grapple with those New Testament letters that talk about what it means to belong from the introduction In our age of polarity could there be a more timely book than Allison Gray s *Reforming the Household of God* Paul s Model of Belonging In this informed and readable book Gray contextualizes how Paul the Apostle engaged metaphors to bridge the divide of differences in his communities offering insight into how Christians might do the same today Laurie Brink OP professor of New Testament studies Catholic Theological Union This incredible body of work expresses the genius of Allison Gray and is a significant contribution to the canon of liberative Christian praxis Rev Stephen A Green pastor and activist The Luke NYC

Towns in Decline, AD100-1600 Terry Slater,2017-07-05 Many European towns have experienced loss of population degradation of physical structure and profound economic change at least once since the height of the Roman Empire This volume is an examination of the various causes of these changes the results which flowed from them and the reasons why some urban centres survived revived and eventually flourished again while others failed and died The contributors bring to bear the techniques of history and archaeology the perspectives of

economics agronomy medicine architecture and planning geography and law to the study The result is a synthesis which connects the Decline of the Roman Empire to the effects of the Black Death and the economic transformation of Renaissance Florence *The Fall of Rome* Bryan Ward-Perkins,2006-07-12 Why did Rome fall Vicious barbarian invasions during the fifth century resulted in the cataclysmic end of the world s most powerful civilization and a dark age for its conquered peoples Or did it The dominant view of this period today is that the fall of Rome was a largely peaceful transition to Germanic rule and the start of a positive cultural transformation Bryan Ward Perkins encourages every reader to think again by reclaiming the drama and violence of the last days of the Roman world and reminding us of the very real horrors of barbarian occupation Attacking new sources with relish and making use of a range of contemporary archaeological evidence he looks at both the wider explanations for the disintegration of the Roman world and also the consequences for the lives of everyday Romans in a world of economic collapse marauding barbarians and the rise of a new religious orthodoxy He also looks at how and why successive generations have understood this period differently and why the story is still so significant today **The Treasure Chest of the Early Christians** David Batson,2001 *Ancient History: Key Themes and Approaches* Neville Morley,2002-09-09 Ancient History Key Themes and Approaches is a sourcebook of writings on ancient history It presents over 500 of the most important stimulating and provocative arguments by modern writers on the subject and as such constitutes an invaluable reference resource The first section deals with different aspects of life in the ancient world such as democracy imperialism slavery and sexuality while the second section covers the ideas of key ancient historians and other writers on classical antiquity Overall this book offers an invaluable introduction to the most important ideas theories and controversies in ancient history and a thought provoking survey of the range of views and approaches to the subject **The Cultural Turn in Late Ancient Studies** Philip Rousseau,2005-04-28 Collection of essays that focuses on questions of gender and culture in early Christianity
