Woods, Wenceslau G. Teixeira, Johannes Lehmann, Christoph Steiner, Antoinette M. G. A. WinklerPrins, Lilian Rebellato, 2008-11-16 Amazonian soils are almost universally thought of as extremely forbidding However it is now clear that complex societies with large sedentary populations were present for over a millennium before European contact Associated with these are tracts of anomalously fertile dark soils termed terra preta or dark earths These soils are presently an important agricultural resource within Amazonia and provide a model for developing long term future sustainability of food production in tropical environments The late Dutch soil scientist Wim Sombroek 1934 2003 was instrumental in bringing the significance of these soils to the attention of the world over four decades ago Wim saw not only the possibilities of improving the lives of small holders throughout the world with simple carbon based soil technologies but was an early proponent of the positive synergies also achieved in regards to carbon sequestration and global climatic change abatement Wim's vision was to form a multidisciplinary group whose members maintained the ideal of open collaboration toward the attainment of shared goals Always encouraged and often shaped by Wim this free association of international scholars termed the Terra Preta Nova Group came together in 2001 and has flourished This effort has been defined by enormous productivity Wim who is

Utilizing ethnographic and archaeological data and an updated paradigm derived from the best features of cultural ecology and ecological anthropology this extensively illustrated book addresses over fifteen South American adaptive systems representing a broad cross section of band village chiefdom and state societies throughout the continent over the past 13 000 years Indigenous South Americans of the Past and Present presents data on both prehistoric and recent indigenous groups across the entire continent within an explicit theoretical framework Introductory chapters provide a brief overview of the variability that has characterized these groups over the long period of indigenous adaptation to the continent and examine the historical background of the ecological and cultural evolutionary paradigm The book then presents a detailed overview of the principal environmental contexts within which indigenous adaptive systems have survived and evolved over thousands of years It discusses the relationship between environmental types and subsistence productivity on the one hand and between these two variables and sociopolitical complexity on the other Subsequent chapters proceed in sequential order that is at once evolutionary from the least to the most complex groups and geographical from the least to the most productive environments around the continent in counterclockwise fashion from the hunter gatherers of Tierra del Fuego in the far south to the villagers of the Amazonian lowlands to the chiefdoms of the Amazon v ea and the far northern Andes and finally to the chiefdoms and states of the Peruvian Andes Along the way detailed presentations and critiques are made of a number of theories based on the South American data that have worldwide implications for our understanding of prehistoric and recent adaptive systems **On Vision and Being Human: Exploring the Menstrual, Neurological and Symbolic**

Origins of Religious Experience Bruce Rimell, 2015-07 Visionary and religious experiences are ubiquitous among human beings but why do we experience them as coming from a hidden reality beyond the senses Why should we believe in the existence of deities despite the mundane evidence of our own eyes Why do we as intelligent primates ascribe any importance to these imaginary realities at all This creative and speculative thesis seeks to answer these questions in a new way gazing into the content of visions themselves and exploring the various inner realities that gave rise to these transformative and meaningful aspects of our humanity Focusing upon symbolic cognition as a fundamental organising principle of human experience a diverse series of musings upon the nature of reality consciousness and our evolutionary origins seeks to transcend our modern artificial boundaries to arrive at a holistic and delightfully playful human image for the twenty first century An original visionary thesis illustrated with 30 beautiful drawings *Ingenuity in the Making* Richard J.
