People Yearbook 2006:

People Yearbook 2006 Cutler Durkee, 2006 **Quest for World-Class Teacher Education?** Jun Li, 2016-07-25 Utilizing a case study method and a Multiperspectival Approach this volume presents a pioneering in depth study about China's teacher education policy since the 1990s. It critically investigates the rational dynamic and complex implementation process taking place at the micro institutional level for the transformations of teacher education institutions. The book first introduces the sociopolitical and cultural background of China's teacher education system and its challenges under the condition of globalization and illustrates major national initiatives for nurturing highly qualified teachers. It then explores new teachers' identities in an era of enhanced professionalism, uncovers the ways they reflect China's teacher education reform, and distills the rationales behind these policy actions. This is followed by an analytic presentation of the findings of the case study of a provincial normal university with a particular focus on such core pieces of the implementation jigsaw as policy flow, the dynamism of implementation, sociopolitical and cultural confluence, and institutional barriers in the complex process. Lastly, the book unravels key recommendations and implications for policy implementation studies from the China policy case and constructs a Chinese Zhong Yong Model of policy implementation and sheds new light on policy studies of teacher education reform in particular and public policy in general, which may be transferable to other sociopolitical contexts seeking to nurture world class teachers and achieve educational excellence in a global age. *China's Education Aid to Africa* Wei Ye, 2023-05-31 China's rise as an aid provider in Africa has caught global attention, with China's activity being viewed as the projection of soft power of a neo colonialist kind in an international relations context. This book, which focuses on China's education aid, government scholarships, training, Confucius Institutes, dispatched teachers, etc., reveals a much more complicated picture. It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection, how much of China's aid is bound up with an education for economic growth outlook mirroring China's own recent experiences of economic development, and how China's aid prioritized to reflect the commercial sector's interests is out of step with most international development aid, which is dominated by education agendas and the campaigns of international organizations and traditional donors. This leaves China easily exposed to the charge of neo colonialism. This situation also reveals insufficient knowledge production of China and in South South Cooperation. Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform. **Rural Education in China: Policy and Development (1978 - 2018)** Wu Zhihui, 2025-09-23 This book reveals the policy changes and profound transformations in rural education in China over the past 40 years of reform and opening up. The book emphasizes the need to accurately address the relationship between urban and rural educational development, adopt an integrated urban rural education mindset, and establish a mechanism for promoting balanced development by linking urban and rural areas, advancing overall

progress and ensuring urban rural integration This will comprehensively revitalize rural education We must treat the development of rural education as the most foundational livelihood project and regard promoting fairness and justice in urban rural education as a long term task focusing on balance strengthening the foundation and addressing shortcomings We must adhere to the rule of law in education enhance and improve the leadership of the party and government over rural education and correctly guide public opinion and manage societal mindset We must strengthen research on rural education make top level designs for the future development of rural education and inspire innovative vitality among grassroots educators effectively conducting rural education modernization experiments to lay a solid foundation for achieving the fundamental modernization of socialism with Chinese characteristics

International Migration in Cuba

Margarita Cervantes-Rodríguez, 2015-08-26 Since the arrival of the Spanish conquerors at the beginning of the colonial period Cuba has been hugely influenced by international migration Between 1791 and 1810 for instance many French people migrated to Cuba in the wake of the purchase of Louisiana by the United States and turmoil in Saint Domingue Between 1847 and 1874 Cuba was the main recipient of Chinese indentured laborers in Latin America During the nineteenth century as a whole more Spanish people migrated to Cuba than anywhere else in the Americas and hundreds of thousands of slaves were taken to the island The first decades of the twentieth century saw large numbers of immigrants and temporary workers from various societies arrive in Cuba And since the revolution of 1959 a continuous outflow of Cubans toward many countries has taken place with lasting consequences In this book the most comprehensive study of international migration in Cuba ever undertaken Margarita Cervantes Rodríguez aims to elucidate the forces that have shaped international migration and the involvement of the migrants in transnational social fields since the beginning of the colonial period Drawing on Fernand Braudel's concept of *longue durée* transnational studies perspectives on power and other theoretical frameworks the author places her analysis in a much wider historical and theoretical perspective than has previously been applied to the study of international migration in Cuba making this a work of substantial interest to social scientists as well as historians

Contemporary Chinese Economy Gang Gong,2012-03-12 The Chinese economy has been regarded as one of the most dazzling phenomena in the current world economy A systematic objective and academic analysis on the contemporary Chinese economy however is still lacking This book written by an excellent native Chinese scholar fills this void in many respects lucidly The book gives a systematic analysis on the modern Chinese economy since China s economic reform and its opening up in 1978 It also includes analytical comparisons on differences between China and the West and illustrates how these differences in terms of economic structure financial and administrative system the governance of the economy attributed to the growth and economic performance of China The book also provides a deep economic analysis on China s future difficulties and challenges in development The book provides a strategic consideration on how China should meet with these challenges and difficulties Since China is an example of successful rise of a developing nation in the current world this book is an innovative contribution to academics in the field of macroeconomics for developing economies The book illustrates the success from a new perspective This book makes an excellent choice as a textbook for related courses on Chinese economy in universities It also serves as an excellent reference for understanding and researching on contemporary Chinese economy

Markets Over Mao Nicholas R Lardy,2014-09-10 China s transition to a market economy has propelled its remarkable economic growth since the late 1970s In this book Nicholas R Lardy one of the world s foremost experts on the Chinese economy traces the increasing role of market forces and refutes the widely advanced argument that Chinese economic progress rests on the government s control of the economy s commanding heights In another challenge to conventional wisdom Lardy finds little evidence that the decade of the leadership of former President Hu Jintao and Premier Wen Jiabao 2003-13 dramatically increased the role and importance of state owned firms as many people argue This book offers powerfully persuasive evidence that the major sources of China s growth in the future will be similarly market rather than state driven with private firms providing the major source of economic growth the sole source of job creation and the major contributor to China s still growing role as a global trader Lardy does however call on China to deregulate and increase competition in those portions of the economy where state firms remain protected especially in energy and finance

Research from Archival Case Records Philip C.C. Huang,Kathryn Bernhardt,2014-04-30 Legal history studies have often focused mainly on codified law without attention to actual practice and on the past without relating it to the present As the title *Research from Archival Case Records* Law Society and Culture in China of this book suggests the authors deliberately follow the research method of starting from court actions and only on that basis engage in discussions of laws and legal concepts and theory The articles cover a range of topics and source materials both past and present They provide some surprising findings about disjunctures between code and practice adjustments between them and how those reveal

operative principles and logics different from what the legal texts alone might suggest Contributors are Kathryn Bernhardt Danny Hsu Philip C C Huang Christopher Isett Yasuhiko Karasawa Margaret Kuo Huaiyin Li Jennifer M Neighbors Bradly W Reed Matthew H Sommer Huey Bin Teng Lisa Tran Elizabeth VanderVen and Chenjun You **Emerging Infectious Diseases** ,2008 International Social Security Review ,2008 For a Safer Tomorrow Edmund Cairns,Jacqueline Smith,2008 This report based on Oxfam International s experience in most of the world s conflicts sets out an ambitious agenda to protect civilians through combining local national and regional action with far more consistent international support Port Privatisation James Reveley,Malcolm T.
