

PHYSIOLOGIE DES PASSIONS

PAR

CH. LETOURNEAU

« La physique, ou la recherche des causes
efficientes et matérielles, produit la mécanique ; mais la métaphysique, ou la recherche
des formes, produit la magie ; car la recherche
des causes finales est stérile et pareille à
une vierge consacrée à Dieu, elle n'enfante
rien. »

scientiarum*, III, 5.)

Physiologie des passions; ou Nouvelle doctrine des sentiments moraux Jean-Louis-Marie Alibert, 1843 Physiologie des passions Jean-Louis-Marie Alibert, 1825 *Morbid Undercurrents* Sean M. Quinlan, 2021-09-15 In *Morbid Undercurrents* Sean M Quinlan follows how medical ideas stemming from the so called birth of the clinic zigzagged across the intellectual landscape of the French Revolution and its aftermath It was a remarkable hotspot in the historical timeline when doctors and scientists pioneered a staggering number of fields from forensic investigation to evolutionary biology and their innovations captivated the public imagination During the 1790s and beyond medicine left the somber halls of universities hospitals and learned societies and became profoundly politicized inspiring a whole panoply of different often bizarre and shocking subcultures Quinlan reconstructs the ethos of the time and its labyrinthine underworld traversing the intersection between medicine and pornography in the works of the Marquis de Sade efforts to create a natural history of women the proliferation of sex manuals and books on family hygiene anatomical projects to sculpt antique bodies the rage for physiognomic self help books that taught readers to identify social and political types in post revolutionary Paris the use of physiological medicine as a literary genre and the mesmerist renaissance with its charged debates over animal magnetism and somnambulism In creating this reconstruction Quinlan argues that the place and authority of medicine evolved at least in part out of an attempt to redress the acute sense of dislocation produced by the Revolution *Morbid Undercurrents* exposes how medicine then became a subversive radical and ideologically charged force in French society **Physiologie des passions** Charles Letourneau, 1878 **Physiologie des passions** Charles Letourneau, 1868 **Catalogue of the Library of the Peabody Institute of the City of Baltimore** ,1883 Catalogue of the Library of the Peabody Institute of the City of Baltimore N. H. Morison, 1889 **Catalogue of the Library of Parliament** Anonymous, 2025-08-29 Reprint of the original first published in 1857 The Antigonos publishing house specialises in the publication of reprints of historical books We make sure that these works are made available to the public in good condition in order to preserve their cultural heritage

Physiologie des passions Alibert, 1826 The Physiology of Taste Brillat-Savarin, 1926 **Nonfictional Romantic Prose** Steven P. Sondrup, Virgil Nemoianu, Gerald Gillespie, 2004 *Nonfictional Romantic Prose Expanding Borders* surveys a broad range of expository polemical and analytical literary forms that came into prominence during the last two decades of the eighteenth century and the first half of the nineteenth They stand in contrast to better known romantic fiction in that they endeavor to address the world of daily empirical experience rather than that of more explicitly self referential fanciful creation Among them are genres that have since the nineteenth century come to characterize many aspects of modern life

like the periodical or the psychological case study others flourished and enjoyed wide spread popularity during the nineteenth century but are much less well known today like the almanac and the diary Travel narratives pamphlets religious and theological texts familiar essays autobiographies literary critical and philosophical studies and discussions of the visual arts and music all had deep historical roots when appropriated by romantic writers but prospered in their hands and assumed distinctive contours indicative of the breadth of romantic thought

The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism A glance at the index of each volume quickly reveals the extraordinary richness of the series total contents

Romantic Irony sets the broader experimental parameters of comparison by concentrating on the myriad expressions of irony as one of the major impulses in the Romantic philosophical and artistic revolution and by combining cross cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams

Romantic Drama traces creative innovations that deeply altered the understanding of genre at large fed popular imagination through vehicles like the opera and laid the foundations for a modernist theater of the absurd

Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments

Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse including Romanticism s own self commentary in theoretical statements on the arts society life the sciences and more Nor are the discursive dimensions of imaginative literature neglected in the closing volume

Romantic Prose Fiction where the basic Romantic themes and story types the romance novel novella short story and other narrative forms are considered throughout Europe and the New World This enormous realm is seen not just in terms of Romantic theorizing but in the light of the impact of Romantic ideas and narration on later generations As an aid to readers the introduction to Romantic Prose Fiction explains the relationships among the volumes in the series and carries a listing of their tables of contents in an appendix No other series exists comparable to these volumes which treat the entirety of Romanticism as a cultural happening across the whole breadth of the Old and New Worlds and thus render a complex picture of European spiritual strivings in the late eighteenth and the nineteenth centuries a heritage still very close to our age

The Great Nation in Decline Sean M. Quinlan, 2016-03-16 This book studies how doctors responded to and helped shape deep seated fears about nervous degeneracy and population decline in France between 1750 and 1850 It uncovers a rich and far ranging medical debate in which four generations of hygiene activists used biomedical science to transform the self sexuality and

community in order to regenerate a sick and decaying nation a programme doctors labelled physical and moral hygiene Moreover it is shown how doctors imparted biomedical ideas and language that allowed lay people to make sense of often bewildering socio political changes thereby giving them a sense of agency and control over these events Combining a chronological and thematic approach the six chapters in this book trace how doctors began their medical crusade during the middle of the Enlightenment how this activism flowered during the French Revolution and how they then revised their views during the period of post revolutionary reaction The study concludes by arguing that medicine acquired an unprecedented political social and cultural position in French society with doctors becoming the primary spokesmen for bourgeois values and thus helped to define the new world that emerged from the post revolutionary period **Quelques considérations sur l'histoire physiologique des passions et des affections de l'âme; thèse inaugurale, etc** J. E. B. DENARP,1816
