Religious Requirements And Practices Of Certain Se:

Monthly Catalog of United States Government Publications ,1982 **Anthropology of Religion** Richley H. Crapo,2003 This text offers an alternative to the case driven approach that the sole use of a reader tends to foster It provides students with ways of conceptualizing what religion is what its social and psychological functions are the nature of religious symbolism and religious behaviour and the organizational structure of religions All the standard topics are covered e g ideology and symbolism ritual and ceremony organizational forms and social and psychological functions of religion as well as ones of more recent interest such as religion and gender the psychology of religion and pilgrimage Extended narrative examples illustrate the theoretical and analytic discussions in the text expose students to a variety of different religions and provide real world examples of the concepts of each chapter An integrated student study guide self test materials at the end of each chapter allows students to evaluate their own mastery of each chapter determine what they need to review further and prepare for course tests The text is copiously illustrated with ethnographic examples from both western and non western religions **The Social Psychology of Tolerance** Maykel Verkuyten,2022-11-29 This highly topical book is the first of its kind to provide a comprehensive theoretical and empirical discussion of the social psychology of tolerance exploring the importance and drawbacks of a focus on tolerance and discussing how tolerance can be stimulated in a range of contexts The importance of tolerance for a diverse equal and open society is increasingly recognized by social and behavioural scientists When people are aware of salient differences and disagree about the value of various viewpoints and ways of life the question of tolerance arises Not only in relation to religious cultural ideological and viewpoint differences but also concerning everyday things such as annoying habits of one s partner the views and behaviour of one s children disagreements at work and neighbourhood hassles Verkuyten uses concrete examples to discuss the various reasons for why tolerance is vital for peaceful communities especially in our increasingly diverse and polarized world Providing a thorough examination of the social psychology of tolerance this is a valuable text not only to social psychologists but to a range of students and scholars in the social and behavioural sciences more broadly **The Code of Federal Regulations of the United States of America** ,1981 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government **Code of Federal Regulations** ,1992 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries **Reproducing the State** Jacqueline Stevens,2020-12-08 People are said to acquire their affiliations of ethnicity race and sex at birth Hence these affiliations have long been understood to be natural independent of the ability of political societies to define who we are Reproducing the State vigorously challenges the conventional view as well as post structuralist scholarship that minimizes state power Jacqueline Stevens examines birth based theories of membership and group affiliations in political societies ranging from the Athenian polis to tribes of Australia to the French republic to the

contemporary United States The book details how political societies determine the kinship rules that are used to reproduce political societies Stevens analyzes the ways that ancestral and territorial birth rules for membership in political societies pattern other intergenerational affiliations She shows how the notion of ethnicity depends on the implicit or explicit invocation of a past present or future political society She also shows how geography is used to represent political regions including continents as the seemingly natural underpinning for racial taxonomies perpetuated through miscegenation laws and birth certificates And Stevens argues that sex differences are also constituted through membership practices of political societies In its chronological and disciplinary range *Reproducing the State* will reward the interest of scholars in many fields including anthropology history political science sociology women s studies race studies and ethnic studies
