Build a Remote-Controlled Robot...for Under 300 Dollars David R. Shircliff,1986 **Remote Control Robotics**

Craig Sayers,2012-12-06 Increasingly robots are being used in environments inhospitable to humans such as the deep ocean inside nuclear reactors and in deep space Such robots are controlled by remote links to human operators who may be close by or thousands of miles away The techniques used to control these robots is the subject of this book The author begins with a basic introduction to robot control and then considers the important problems to be overcome delays or noisy control lines feedback and response information and predictive displays Readers are assumed to have a basic understanding of robotics though this may be their first exposure to the subject of telerobotics Professional engineers and roboticists will find this an invaluable introduction to this subject Build A Remote-Controlled Robot David R. We, Robot Mark Meadows, 2010-12-07 We Robot does for robotics what Michio Kaku's bestselling *Physics of the Impossible* has done for physics. How close to becoming reality are our favorite science fiction robots? And what might be the real-life consequences of their existence? Robotics and artificial intelligence expert and science fiction fan Mark Stephen Meadows answers that question with an irresistible blend of hard science, futurist imagination, solid statistics, pop culture, and plenty of humor.
