La Maison de René Herbst René Herbst, Galerie de Beyrie, 1999 *Objects of Design from The Museum of Modern Art* Paola Antonelli, 2003 *René Herbst* Gillemette Delaporte, 2004-10-01

René Herbst's enduring furniture designs provide fundamental lessons for today's interior designers. A staunch modernist, Herbst was a founding member and later president of the Union des artistes modernes (UAM) in France, which sought to make domestic comfort accessible to all regardless of class. The diversity of his work is testament to his prolific and creative output, and his design is marked by its simplicity and functionality. The French architect-turned-designer was nicknamed 'the man of steel' because he pioneered the use of the material for furniture years before mass production on a large scale was possible. In 1929, he created several versions of his celebrated Sandow Chair, which ignited his research into serial production and inaugurated the era of mass production. This book presents a selection of the best works from the Herbst Collection held by the library of the Musée des Arts Décoratifs in Paris and demonstrates how Herbst was the catalyst of a new style of living that spurred the birth of modernity.

Modern Architecture in Theatre A. Read, 2013-11-21

If the city is the theatre of urban life, how does architecture act in its many performances? This book reconstructs the spatial experiments of Art et Action, a theatre troupe active in 1920s Paris, and how their designs for theatre buildings show how the performance spaces interacted with actors and spectators according to their type.

History of Modern Design David Raizman, 2003

An exploration of the parallel development of product and graphic design from the 18th century to the 21st. The effects of mass production and consumption, man-made industrial materials, and extended lines of communication are also discussed.

Gabriel Guevrekian Hamed Khosravi, 2020-01-01

The Elusive Modernist setzt sich mit der Geschichte der Moderne auseinander und zwar basierend auf dem Vermögen eines ihrer Protagonisten, Gabriel Guevrekian, ca. 1900-1970. Der in Istanbul geborene Guevrekian wuchs in Teheran auf und zog als junger Erwachsener nach Wien, um an der Kunstgewerbeschule Architektur zu studieren. Später arbeitete er mit Oskar Strnad, Josef Hoffmann, Adolf Loos, Henri Sauvage und Robert Mallet Stevens und zu seinen bekanntesten Entwürfen gehören der kubistische Garten für die Villa Noailles in Frankreich und zwei Häuser für die Wiener Werkbund-Ausstellung. Mit nicht einmal dreißig Jahren galt Guevrekian als eine der bedeutendsten Persönlichkeiten der europäischen Avantgarde in Paris. Im Laufe der 1930er Jahre verbrachte er einige Jahre im Iran, wo er öffentliche Bauten entwarf. Nach Ende des Zweiten Weltkriegs lehrte er zunächst in Europa und schließlich in Amerika. Seine ganz unterschiedlichen Unternehmungen sowie die Häuser und Nationalitäten, die er in Asien, Europa und Amerika besaß, führten zu einer Reihe sehr verschieden ausgeprägter Persönlichkeiten. Er folgte durch seine eigene sehr unmittelbare Auseinandersetzung jede Disziplin mit Bedeutung aus, machte jede Stadt zum Zentrum und jede ra epochal.

Risk and Uncertainty in the Art World Anna M. Dempster, 2014-04-10

This edited book offers the first complete overview of risk in the art market by bringing together contributions from a wide range of international

thought leaders on the topic both practitioners and leading scholars who investigate the specific types of uncertainty that exist in the art market as well as the dominant models used to manage the risks An essential read for both art world practitioners as well as scholars and students Risk and Uncertainty in the Art Market elucidates the dynamics and unique qualities of the art market as well as developing insights relevant to other sectors including sociology business and management economics and finance Elusive Archives Martin Brückner, Sandy Isenstadt, 2021-08-27 The essays that comprise Elusive Archives raise a common question how do we study material culture when the objects of study are transient evanescent dispersed or subjective Such things resist the taxonomic protocols that institutions such as museums and archives rely on to channel their acquisitions into meaningful collections What holds these disparate things together here are the questions authors ask of them Each essay creates by means of its method a provisional collection of things an elusive archive Scattered matter then becomes fixed within each author's analytical framework rather than within the walls of an archive's reading room or in cases along a museum corridor This book follows the ways in which objects may be identified gathered arranged conceptualized and even displayed rather than by discovering artifacts in an archive and then asking how they came to be there The authors approach material culture outside the traditional bounds of learning about the past Their essays are varied not only in subject matter but also in narrative format and conceptual reach making the volume accessible and easy to navigate for a quick reference or if read straight through build toward a new way to think about material culture

Sculpture and the Vitrine John C. Welchman, 2017-07-05 Vitrines and glass cabinets are familiar apparatuses that have in large part defined modern modes of display and visibility both within and beyond the museum They separate objects from their contexts group them with other objects both similar and dissimilar and often serve to reinforce their intrinsic or aesthetic values The vitrine has much in common with the picture frame the plinth and the gallery but it has not yet received the kind of detailed art historical and theoretical discussion that has been brought to these other modes of formal display The twelve contributions to this volume examine some of the points of origin of the vitrine and the various relations it brokers with sculpture first in the Wunderkammer and cabinet of curiosities and then in dialog with the development of glazed architecture beginning with Paxton's Crystal Palace 1851 The collection offers close discussions of the role of the vitrine and shop window in the rise of commodity culture and their apposition with Constructivist design in the work of Frederick Kiesler as well as original readings of the use of vitrines in Surrealism and Fluxus and in work by Joseph Beuys Paul Thek Claes Oldenburg and his collaborators Jeff Koons Mike Kelley Dan Graham Vito Acconci Damien Hirst and Josephine Meckseper among others Sculpture and the Vitrine also raises key questions about the nature and implications of vitrinous space including its fronts onto desire and the spectacle transparency and legibility and onto ideas and practices associated with the archive collecting preserving and ordering *Part-Architecture* Emma Cheadle, 2017-07-20 Part Architecture presents a detailed and original study of Pierre Chareau's Maison de Verre through another seminal modernist artwork Marcel

Duchamp's Large Glass Aligning the two works materially historically and conceptually the book challenges the accepted architectural descriptions of the Maison de Verre makes original spatial and social accounts of its inhabitation in 1930s Paris and presents new architectural readings of the Large Glass Through a rich analysis which incorporates creative projects into history and theory research the book establishes new ways of writing about architecture Designed for politically progressive gynaecologist Dr Jean Dalsace and his avant garde wife Annie Dalsace the Maison de Verre combines a family home with a gynaecology clinic into a free plan layout Screened only by glass walls the presence of the clinic in the home suggests an untold dialogue on 1930s sexuality The text explores the Maison de Verre through another radical glass construction the Large Glass where Duchamp's complex depiction of unconsummated sexual relations across the glass planes reveals his resistance to the marital conventions of 1920s Paris This and other analyses of the Large Glass are used as a framework to examine the Maison de Verre as a register of the changing history of women's domestic and maternal choices reclaiming the building as a piece of female social architectural history The process used to uncover and write the accounts in the book is termed part architecture Derived from psychoanalytic theory part architecture fuses analytical descriptive and creative processes to produce a unique social and architectural critique Identifying three essential materials to the Large Glass the book has three main chapters Glass Dust and Air Combining theory text creative writing and drawing each traces the history and meaning of the material and its contribution to the spaces and sexuality of the Large Glass and the Maison de Verre As a whole the book contributes important and unique spatial readings to existing scholarship and expands definitions of architectural design and history

Jewellery in the Age of Modernism 1918-1940 Simon Bliss, 2018-11-15 Why has jewellery and body adornment often been marginalized in studies of modernist art and design This study explores the relationship between jewellery modernism and modernity from the jazz age to the second world war in order to challenge the view that these portable art forms have only a minor role to play in histories of modernism From the masterworks of the Parisian jewellery houses to the film and photography of Man Ray this study seeks to present jewellery in a new light where issues of representation and display are considered to be as important in the creation of a modern jewellery culture as the objects themselves Drawing on material from museums archives contemporary journals memoirs literary and theoretical texts this study shows how the emergence of modern jewellery began to seriously question conventional notions of body adornment
