Lynda Hillyer, 2000 *Dictionary of Museology* François Mairesse, 2023-04-05 The internationally focused Dictionary of Museology reflects the diversity of cultural and disciplinary approaches to theory and practice in the museum field today The museum world is changing rapidly and the characteristics and social roles of the world's approximately 100 000 existing museums are constantly evolving In addition to their traditional functions of preservation research and communication museums are increasingly addressing issues related to social inclusion human rights sustainable development and finances all of which are explored in this dictionary Drawing on the support of an international editorial committee including influential figures from the US Canada Brazil Japan Spain Germany France and the UK this collaborative work produced by over 100 researchers from around the world provides an overview of this unique field by defining over 1 000 terms relating to museology The Dictionary of Museology is intended for a broad spectrum of museum professionals academics researchers and students The book will be especially useful to those working with international partners since a common lexicon that conveys the complex reality of current social and cultural values is particularly vital for those working across borders

**Managing Indoor Climate Risks in Museums** Bart Ankersmit, Marc H.L. Stappers, 2016-09-28 This book elaborates on different aspects of the decision making process concerning the management of climate risk in museums and historic houses The goal of this publication is to assist collection managers and caretakers by providing information that will allow responsible decisions about the museum indoor climate to be made The focus is not only on the outcome but also on the equally important process that leads to that outcome The different steps contribute significantly to the understanding of the needs of movable and immovable heritage The decision making process to determine the requirements for the museum indoor climate includes nine steps Step 1 The process to make a balanced decision starts by clarifying the decision context and evaluating what is important to the decision maker by developing clear objectives In Step 2 the value of all heritage

assets that are affected by the decision are evaluated and the significance of the building and the movable collection is made explicit Step 3 The climate risks to the moveable collection are assessed Step 4 Those parts of the building that are considered valuable and susceptible to certain climate conditions are identified Step 5 The human comfort needs for visitors and staff are expressed Step 6 To understand the indoor climate the building physics are explored Step 7 The climate specifications derived from step 3 to 5 are weighed and for each climate zone the optimal climate conditions are specified Step 8 Within the value framework established in Step 1 the options to optimize the indoor climate are considered and selected Step 9 All options to reduce the climate collection risks are evaluated by the objectives established in Step 1
