Principles of Risk Analysis

Charles Yoe, 2011-09-15 In every decision context there are things we know and things we do not know Risk analysis uses science and the best available evidence to assess what we know and it is intentional in the way it addresses the importance of the things we don't know Principles of Risk Analysis Decision Making Under Uncertainty lays out the tasks of risk analysis in a straightforward conceptual manner that is consistent with the risk models of all communities of practice It answers the questions what is risk analysis and how do I do this Distilling the common principles of the many risk tribes and dialects into serviceable definitions and narratives the book provides a foundation for the practice of risk analysis and decision making under uncertainty for professionals from all walks of life In the first part of the book readers learn the language models and concepts of risk analysis and its three component tasks risk management assessment and communication The second part of the book supplies the tools techniques and methodologies to help readers apply the principles From problem identification and brainstorming to model building and choosing a probability distribution the author walks readers through the how to of risk assessment Addressing the critical task of risk communication he explains how to present the results of assessments and how to develop effective messages The book's simple and straightforward style based on the author's decades of experience as a risk analyst trainer and educator strips away the mysterious aura that often accompanies risk analysis It describes the principles in a manner that empowers readers to begin the practice of risk analysis to better understand and use the models and practice of their individual fields and to gain access to the rich and sophisticated professional literature on risk analysis Additional exercises as well as a free student version of the Palisade Corporation DecisionTools Suite software and files used in the preparation of this book are available for download

Advances in Decision Making Under Risk and Uncertainty Mohammed Abdellaoui, John D. Hey, 2008-09-17 Brings the reader into contact with the accomplished progress in individual decision making through the contributions to

uncertainty modeling and behavioral decision making This work also introduces the reader to the subtle issues to be resolved for rational choice under uncertainty **Risk, Uncertainty, and Rational Action** Carlo Jaeger, 2001 Risk as we now know it is a wholly new phenomenon the by product of our ever more complex and powerful technologies In business policy making and in everyday life it demands a new way of looking at technological and environmental uncertainty In this definitive volume four of the world s leading risk researchers present a fundamental critique of the prevailing approaches to understanding and managing risk the rational actor paradigm They show how risk studies must incorporate the competing interests values and rationalities of those involved and find a balance of trust and acceptable risk Their work points to a comprehensive and significant new theory of risk and uncertainty and of the decision making process they require The implications for social political and environmental theory and practice are enormous Winner of the 2000 2002 Outstanding Publication Award of the Section on Environment and Technology of the American Sociological Association **Risk and Presidential**

Decision-making Luca Trenta, 2016-05-20 This book aims at gauging whether the nature of US foreign policy decision making has changed after the Cold War as radically as a large body of literature seems to suggest and develops a new framework to interpret presidential decision making in foreign policy It locates the study of risk in US foreign policy in a wider intellectual landscape that draws on contemporary debates in historiography international relations and Presidential studies Based on developments in the health and environment literature the book identifies the President as the ultimate risk manager demonstrating how a President is called to perform a delicate balancing act between risks on the domestic political side and risks on the strategic international side Every decision represents a risk vs risk trade off in which the management of one target risk leads to the development countervailing risks The book applies this framework to the study three major crises in US foreign policy the Cuban Missile Crisis the seizure of the US Embassy in Tehran in 1979 and the massacre at Srebrenica in 1995 Each case study results from substantial archival research and over twenty interviews with policymakers and academics including former President Jimmy Carter and former Senator Bob Dole This book is ideal for postgraduate researchers and academics in US foreign policy foreign policy decision making and the US Presidency as well as Departments and Institutes dealing with the study of risk in the social sciences The case studies will also be of great use to undergraduate students **A field study of group decision-making in health care** Juliane Marold, Ruth Lassalle, Markus Schöbel, Dietrich Manzey, 2013-11-01 The authors have undertaken a field study of daily decision making processes in groups under uncertainty in the health care domain The work follows the tradition of naturalistic decision making NDM research It aims to understand how groups in this high reliability context conceptualize and internalize uncertainties and how they handle them in order to achieve effective decision making in their everyday activities The work is based on observations of a specific kind of health care meeting where treatment options for cancer patients are discussed as well as on questionnaires completed by the participating physicians The researchers have analyzed the strategies used by people to cope with

uncertainty including the order in which these strategies are used The have analyzed characteristics of decisions where the decision making process was judged by the experts involved to be good or acceptable The work identifies a new source of uncertainty not found in previous NDM studies divergent opinions held by decision makers in the group A strong hierarchy gradient in play during the meetings is perceived by group members as contributing to poor decision making performance The authors suggest a number of techniques which could be used to improve decision making performance including the use of formalized decision support procedures to more clearly distinguish phases of presenting information and evaluating it and to encourage information exchange between group members Group leaders could be trained in coaching behaviour in order to improve psychological safety and other members could be trained to encourage speak up behaviour assertiveness

Overview of risk-informed decision-making processes Enrico Zio,Nicola Pedroni,2012-10-01 The authors introduce the general concepts definitions and issues related to the use of Risk informed decision making RIDM These are structured processes which assist decision makers when faced with high impact complex decisions involving multiple objectives and the presence of uncertainty They aim to ensure that decisions between competing alternatives are taken with an awareness of the risks associated with each option and that all attributes of a decision are considered in an integrated manner Motivations for the use of these techniques as a complement to more traditional deterministic approaches to risk assessment are provided The RIDM processes adopted by NASA and by the US Nuclear Regulatory Commission are described in detail with an analysis of commonalities and differences in approach , **Primer on Risk Analysis** Charles Yoe,2016-04-19 In every decision context there are things we know and things we do not know Risk analysis uses science and the best available evidence to assess what we know and it is intentional in the way it addresses the importance of the things we don t know *Primer on Risk Analysis Decision Making Under Uncertainty* lays out the tasks of risk analysis in a *Managing and Leading for Science Professionals* Bertrand C.
