Sociedades Caboclas Amazônicas Cristina Adams,2006 *Amazon Peasant Societies in a Changing Environment*

Cristina Adams,Rui S. S. Murrieta,Walter A. Neves,Mark Harris,2008-12-02 Amazonia is never quite what it seems Despite regular attention in the media and numerous academic studies the Brazilian Amazon is rarely appreciated as a historical place home to a range of different societies Often left invisible are the families who are making a living from the rivers and forests of the region Broadly characterizing these people as peasants *Amazon Peasant Societies in a Changing Environment* seeks to bring together research by anthropologists historians political ecologists and biologists A new paradigm emerges which helps understand the way in which Amazonian modernity has developed This book addresses a comprehensive range of questions from the politics of conservation and sustainable development to the organization of women s work and the diet and health of Amazonian people Apart from offering an analysis of a neglected aspect of Amazonia this collection represents a unique interdisciplinary exercise on the nature of one of the most beguiling regions of the world **Forest, Field, and**

Fallow Antoinette M.G.A. WinklerPrins,Kent Mathewson,2021-01-12 This volume aims to present the essential work of geographer and historical ecologist William M Denevan to explain the impact and influence his thinking had on the conceptual advancement not only in his own discipline but in a range of related disciplines such as anthropology archaeology and environmental history The book is organized around eight themes demonstrating Denevan s early and profound insights on topics that remain of current relevance today and the scholarly impact his writing had on subsequent scholarship The book is unique because it offers commentary from active scholars who address the impacts of Prof Denevan s thinking and work on contemporary environmental and ecological issues with a focus on several groundbreaking themes e g historical demography agricultural landforms cultural plant geography human environmental impacts indigenous agro ecology tropical agriculture livestock and landscape and synthetic contributions This book will be of interest to a range of scholars in geography anthropology archaeology history and ecology as well as to environmental managers and practitioners especially those working for non profit organizations and government organizations tasked with finding ways to adapt to global environmental change **Climate Change, Culture, and Economics** Donald C. Wood,2015-09-22 It is becoming

increasingly difficult to deny that human activity is a factor in global climate change This special volume of REA facilitates readers to better understand the ways in which people around the world have adapted or failed to adapt culturally to changing economic conditions caused by climate change *Anthropology, Economics, and Choice* Michael

Chibnik,2011-11-01 In the midst of global recession angry citizens and media pundits often offer simplistic theories about how bad decisions lead to crises Many economists however base their analyses on rational choice theory which assumes that decisions are made by well informed intelligent people who weigh risks costs and benefits Taking a more realistic approach the field of anthropology carefully looks at the underlying causes of choices at different times and places Using case studies of choices by farmers artisans and bureaucrats drawn from Michael Chibnik s research in Mexico Peru Belize and the United

States Anthropology Economics and Choice presents a clear eyed perspective on human actions and their economic consequences Five key issues are explored in depth choices between paid and unpaid work ways people deal with risk and uncertainty how individuals decide whether to cooperate the extent to which households can be regarded as decision making units and the tragedy of the commons the theory that social chaos may result from unrestricted access to commonly owned property Both an accessible primer and an innovative exploration of economic anthropology this interdisciplinary work brings fresh insight to a timely topic

Amazonia in the Anthropocene Nicholas C. Kawa,2016-05-10 Widespread human alteration of the planet has led many scholars to claim that we have entered a new epoch in geological time the Anthropocene an age dominated by humanity This ethnography is the first to directly engage the Anthropocene tackling its problems and paradoxes from the vantage point of the world s largest tropical rainforest Drawing from extensive ethnographic research Nicholas Kawa examines how pre Columbian Amerindians and contemporary rural Amazonians have shaped their environment describing in vivid detail their use and management of the region s soils plants and forests At the same time he highlights the ways in which the Amazonian environment resists human manipulation and control a vital reminder in this time of perceived human dominance Written in engaging accessible prose Amazonia in the Anthropocene offers an innovative contribution to debates about humanity s place on the planet encouraging deeper ecocentric thinking and a more inclusive vision of ecology for the future

Another Boom for Amazonia? Jr. Penn,2010-05 This study examines the socioeconomic and environmental implications of the new camu camu industry in Peru Camu camu *Myrciaria dubia* is a small tree native to wetlands of the Amazon basin It is especially abundant in Peruvian Amazonia The high vitamin C content of the fruit has generated interest in exporting camu camu products from Amazonia to more developed countries The government of Peru has been actively promoting this new extractive industry as well as the planting of camu camu in rural areas Non governmental development organizations and private industry are now actively involved with camu camu projects and enterprises In Peru enthusiasm for this native species is high because camu camu is expected to provide a much needed and sustainable economic boost for the region However many questions about the environmental implications and socioeconomic impacts of the camu camu export industry need to be answered in order to understand its ecological and economic viability and its effects on business and in rural communities Winner of 2010 Dissertation Excellence Award Findings indicate that camu camu has provided significantly more income to rural residents than is provided by the traditional boom and bust economies of Amazonia Households who adopted camu camu as a new crop in their floodplain agroforestry systems farmed significantly more floodplain land than non adopters and were especially adept at experimenting with new innovations Lack of agricultural credit is a major constraint to adopting camu camu as a new crop in Peru

Geographic isolation and the location of processing facilities in relation to fruit harvests present major obstacles to the economic viability of the new industry Camu camu was found to be cultivated with a higher diversity of annual crops than is typical in floodplain fields of the region Extraction of camu camu fruits from the wild does not appear to have a negative environmental impact at least in the initial years of the industry This non timber forest product in the process of domestication can support a viable industry in the Peruvian Amazon if agricultural extension methods and marketing channels are improved

Time and Complexity in Historical Ecology William Balée, Clark L. Erickson, 2006-06-22 This collection of studies by anthropologists botanists ecologists and biologists is an important contribution to the emerging field of historical ecology The book combines cutting edge research with new perspectives to emphasize the close relationship between humans and their natural environment Contributors examine how alterations in the natural world mirror human cultures societies and languages Treating the landscape like a text these researchers decipher patterns and meaning in the Ecuadorian Andes Amazonia the desert coast of Peru and other regions in the neotropics They show how local peoples have changed the landscape over time to fit their needs by managing and modifying species diversity enhancing landscape heterogeneity and controlling ecological disturbance In turn the environment itself becomes a form of architecture rich with historical and

Mobility and Migration in Indigenous Amazonia Miguel N. Alexiades,2009-04-01 Contrary to ingrained academic and public assumptions wherein indigenous lowland South American societies are viewed as the product of historical emplacement and spatial stasis there is widespread evidence to suggest that migration and displacement have been the norm and not the exception This original and thought provoking collection of case studies examines some of the ways in which migration and the concomitant processes of ecological and social change have shaped and continue to shape human environment relations in Amazonia Drawing on a wide range of historical time frames from pre conquest times to the present and ethnographic contexts different chapters examine the complex and important links between migration and the classification management and domestication of plants and landscapes as well as the incorporation and transformation of environmental knowledge practices ideologies and identities

Landscape Ethnoecology Leslie Main Johnson,Eugene S. Hunn,2012 Although anthropologists and cultural geographers have explored place in various senses little cross cultural examination of kinds of place or ecotopes has been presented from an ethno ecological perspective In this volume indigenous and local understandings of landscape are investigated in order to better understand how human communities relate to their terrestrial and aquatic resources The contributors go beyond the traditional ecological knowledge TEK literature and offer valuable insights on ecology and on land and resources management emphasizing the perception of landscape above the level of species and their folk classification Focusing on the ways traditional people perceive and manage land and biotic resources within diverse regional and cultural settings the contributors address theoretical issues and present case studies from North America Mexico Amazonia tropical Asia Africa and Europe

Scoping the Amazon Stephen Nugent,2016-07-01 The Amazon Indian is an icon that straddles the world between the professional anthropologist and the popular media Presented alternately as the noble primitive the savior of the environment and as a savage dissolute cannibalistic half human it is an image well worth examining Stephen Nugent does just that critiquing the claims of authoritativeness inherent in visual images presented by anthropologists of Amazon life in the early 20th century and comparing them with the images found in popular books movies and posters The book depicts the field of anthropology as its own form of culture industry and contrasts it to other similar industries past and present For visual anthropologists ethnographers Amazon specialists and popular culture researchers Nugent s book will be enlightening entertaining reading

The Organization of Ancient Economies Kenneth Hirth, 2020-09-17 In this book Kenneth Hirth provides a comparative view of the organization of ancient and premodern society and economy Hirth establishes that humans adapted to their environments not as individuals but in the social groups where they lived and worked out the details of their livelihoods He explores the variation in economic organization used by simple and complex societies to procure produce and distribute resources required by both individual households and the social and political institutions that they supported Drawing on a wealth of archaeological historic and ethnographic information he develops and applies an analytical framework for studying ancient societies that range from the hunting and gathering groups of native North America to the large state societies of both the New and Old Worlds Hirth demonstrates that despite differences in transportation and communication technologies the economic organization of ancient and modern societies are not as different as we sometimes think
