Making Time Richard Whipp, Barbara Adam, Ida Sabelis, 2002-07-04 Time is an essential feature of social and organizational life and part of the deep structure of business activity Plans performance productivity and pay are all linked to and often measured by time Yet time is often taken for granted in daily life and the business world The aim of this book is to bring time into sharper focus and in particular to look at the way time is constructed made managed and used in organizations The book both provides an overview of some of the key concepts in time time s arrow time s cycle clock time etc and it explores how particular features of the modern world global time futures etc extend and change the temporal dimension of organizational activity *Making Time* emphasizes the richness of the temporal relations within organizations and the wealth of competing attempts to order and control time in the act of managing It describes and explains this temporal complexity as it occurs in management giving full recognition to the way that people create their own sense of time alongside the official temporal apparatus of the clock and diary The contributors use a variety of management perspectives strategy organization theory decision making industrial relations and marketing and deliberately place the experience of more traditional industrial settings alongside those at the forefront of the new economy *Making Time* seeks to spark a debate across the field of management that does justice to the richness of the temporal features of contemporary organizations The book will be vital reading for those who want to understand the complexities of time in organizations and the modern world and the challenges it presents for the theoretical and practical spheres of management

Researching with Feeling Caroline Clarke, Mike Broussine, Linda Watts, 2014-10-10 Why should

researchers be interested in their feelings and emotions as they carry out research. Emotion is what it is to exist to be human and is present in every sphere of our lives. All activities are infused with emotion even those that are constructed as rational because rationality and emotionality are interpenetrated and entwined because all thinking is tinged with feeling and all feeling is tinged with thinking. This book illuminates the emotional processes of doing social and organizational research and the implications of this for the outcomes of research. With contributions from leading academics and research practitioners it addresses the significant issue of the sometimes intense emotional experiences involved in doing research and the implications it has for the theory and practice of social research. By examining the nature of feelings and emotions it explores how we might understand researchers' emotions and experiences and considers the often powerful feelings encountered in a variety of research contexts. Topics discussed include power relations, psycho-social explanations of researcher emotions, paradoxical relations with research participants and the sometimes disturbing data that is gained, research supervision, the politics of research, gender, publishing, undergoing vivas and presenting at conferences. This book will therefore be a valuable companion to researchers and research students from the start of their career onwards.

The Cambridge Handbook of Identity Michael Bamberg, Carolin Demuth, Meike Watzlawik, 2021-11-11. While identity is a key concept in psychology and the social sciences, researchers have used and understood this concept in diverse and often contradictory ways. The Cambridge Handbook of Identity presents the lively multidisciplinary field of identity research as working around three central themes: i) difference and sameness between people; ii) people's agency in the world; and iii) how identities can change or remain stable over time. The chapters in this collection explore approaches behind these themes followed by a close look at their methodological implications while examples from a number of applied domains demonstrate how identity research follows concrete analytical procedures. Featuring an international team of contributors who enrich psychological research with historical, cultural and political perspectives, the handbook also explores contemporary issues of identity, politics, diversity, intersectionality and inclusion. It is an essential resource for all scholars and students working on identity theory and research.

The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-16. Conceived as the meanings that individuals attach to their selves, a substantial stockpile of theory related to identities accumulated across the arts, social sciences and humanities over many decades continues to nourish contemporary research on self-identities in organizations. In times which are more reflexive, narcissistic and fluid, the identities of participants in organizations are increasingly less fixed and less certain, making identity issues both more salient and more interesting. Particular attention has been given to processes of identity construction, often styled identity work. Research has focused on how, why and when such processes occur and their implications for organizing and individual, group and organizational outcomes. This has resulted in a burgeoning stream of research from discursive, dramaturgical, symbolic, socio-cognitive and psychodynamic perspectives that most often casts individuals' efforts to fabricate identities as intentional, relational and consequential. Seemingly

intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies **Sabelis** Huibert Sabelis,Wim Van der Beek,2007
