Model Aircraft Robin Carpenter, 2020-04-20 This is a practical guide to getting the best from the many resin and etch detailing kits available to enhance scale model aircraft and is intended to help beginners and experienced model makers alike. Richly illustrated it uses six model building examples from the very basic application of etch to the major conversions. It includes an overview of the tools required, guidance on building the basic model kit, an explanation of different types of multimedia, the methods for producing etched brass, how to undertake 3D design and 3D printing, and finally gives the steps for successful resin casting.

Small-scale Models for Studying Effects of Creep and Shrinkage on Long-term Deflection of Reinforced Concrete Slabs Frank B. Cox, 1972 The objective of the study was to determine the feasibility of using small scale models to study the effects of creep and shrinkage on long term deflections of reinforced concrete slabs and if feasible to determine a the smallest length scale N that can be reliably used to study these effects b to what degree creep and shrinkage may affect model slabs loaded with either dead loads, dead loads plus estimated actual live loads, or dead load plus design live loads, and c if creep and shrinkage measurements obtained from model slabs can be correlated with those of standard laboratory specimens such as 6 by 12 in cylindrical specimens. Strain and deflection readings were obtained on six simply supported square slabs for periods up to and slightly exceeding 1000 days. Similar readings were also obtained on corresponding slabs and 6 by 12 in cylindrical specimens positioned whereby the effects of shrinkage, creep, and autogenous volume change could be either investigated or correlated with the strain and deflection measurements from the test specimens. Handbook of Behavioral and Cognitive Geography Daniel R. Montello, 2018-04-27 This comprehensive Handbook summarizes existing work and presents new concepts and empirical results from leading scholars in the multidisciplinary field of behavioral and cognitive geography: the study of the human mind and activity in and concerning space, place, and environment. It provides the broadest and most inclusive coverage of the field so far, including work relevant to human geography, cartography, and geographic information science.

Mediterranean Weather Handbook for Sailors Roberto Ritossa, 2014-09-10 Mediterranean Weather Handbook for Sailors is an indispensable reference providing a general understanding of the various phenomena concurring to determine weather in the Mediterranean, as well as useful forecasting aids. It is written for sailors, not meteorologists; theory is kept to a minimum while every effort is made to provide clear interpretative tools that are helpful in understanding actual weather and forecasting. Roberto Ritossa is a meteorology expert and this handbook is a result of many years' research on Mediterranean weather patterns. This second edition includes details of new and changed websites that offer meteorological services. Throughout the graphics have been improved and for some sections additional illustrations have been added. Roberto Ritossa has produced an excellent weather text book for those who choose to sail in the Mediterranean. Although it claims to be written for sailors, not meteorologists, there is more than enough essential theory to satisfy the keenest of amateur meteorologists. I would certainly buy a copy if I were to ever plan to return to the Mediterranean as a sailor. IG Cruising. This little book contains a

plethora of useful information and should be on the book shelf of every Mediterranean sailor Flying Fish The Journal of the Ocean Cruising Club
