School Effectiveness Fracturing The Discourse:

School Effectiveness Louise Morley, Naz Rassool, 2002-11-01 How have the school effectiveness and school improvement movements arrived where they are today Over the past three decades there has been a great deal of development from the 1960s when debates arose regarding equality of opportunity to the 1980s when market concepts came into play This book contrasts current thinking on educational standards with prevailing thought from prior decades and tackles difficult questions of quality and educational outcomes Anyone wishing to improve their understanding of school effectiveness will find this book interesting and highly informative *International Handbook of School Effectiveness and Improvement* Tony Townsend, 2007-09-21 This book reviews of the development implementation and practice of the disciplines of school effectiveness and school improvement Seven main topics are addressed History of the school effectiveness movement over the last 25 years Changes in accountability and standards Leadership in school effectiveness Changes in teacher education Impact of Diverse Populations Education Funding and its Impact and Best Practice Case Studies The contributors are active in school effectiveness research worldwide School Effectiveness and Improvement Research, Policy and Practice Christopher Chapman, Paul Armstrong, Alma Harris, Daniel Mujs, David Reynolds, Pam Sammons, 2012-03-12 This book provides a contemporary overview of school effectiveness and improvement It charts the development theory and research in this area and looks at the contribution made to policy and practice It also challenges some assumptions that have become ingrained into the theoretical and methodological traditions of the field By challenging these orthodoxies it provides a framework that sets a new agenda and repositions the field to meet the emerging challenges of the twenty first century It argues that traditional measures of school effectiveness are challenged as systems have attempted to adapt to a complex range of emerging agendas New theoretical perspectives are required which consider education and a broader set of outcomes This shift requires a rethink of how effectiveness and improvement have been understood by the field and a reconstruction by policy makers and practitioners Attention must be given to promoting equity as well as effectiveness so that one school or student's gain no longer means another's loss The field must develop new methodologies if inequities are to be challenged and a broader set of outcome measures are to be developed The two questions guiding this book are How can educational effectiveness and improvement research and practice support the development of a more equitable education service What are the key indicators of educational effectiveness and improvement and what are the new methodologies required to facilitate a shift from school effectiveness and improvement to educational effectiveness and improvement This book uses lenses of research policy and practice to explore these key questions and articulate what such a repositioning may look like and how it may be achieved It will prove invaluable for teachers school leaders and anyone involved in policy and educational research **Discourse In Educational And Social Research** Maclure, Maggie, 2003-03-01 WINNER 2004 AESA Critics Choice Award With wonderful clarity Maggie MacLure shows how

Culture, Work and Psychology Pedro F. Bendassolli, 2019-04-01 This book arises from the observation that mainstream psychology especially work and organisational psychology WOP suffers from critical limitations in its attempts to deal with the complexities of work as a cultural phenomenon We can only mention a few examples here In the WOP field especially in Anglo Saxon tradition work experiences are seen through the lenses of traditional behavioural approaches whereas culture is seen as a software of the mind to use a popular definition found in this field based on cross cultural mainstream psychology Competences to take another example are thought of as something that do or do not people have inside them Suffering like stress a common work based problem of our times is considered to be dependent on a person's personality perceptions or as a set of behaviours triggered by facing an objective environment Even meaning making process can be found to be defined from a WOP mainstream point of view meanings are social cognitions shared by people by means of unidirectional socialisation processes Therefore the goal of this book is to deliver to the reader a new and challenging theoretical and methodological tool box inspired by insights developed from a broad cultural psychological perspective Its focus is on the consideration of work and organisations based on core concepts developed inside cultural psychology

Therefore it is designed to discuss potential extensions of these concepts to work psychology

Challenges and Negotiations for Women in Higher Education Pamela Cotterill, Sue Jackson, Gayle Letherby, 2007-06-28 CONCEPTUALISING CHALLENGES AND NEGOTIATIONS FOR WOMEN IN HIGHER EDUCATION 1 2 3 Pamela Cotterill Sue Jackson and Gayle Letherby 1 2 3 Staffordshire University Birbeck University of London University of Plymouth INTRODUCTION Despite the historical tradition of academia as a male space Evans 1995 Abbott et al 2005 Stanley 1997 Letherby 2003 it is possible to argue that the expansion of higher education in the 1980s and 1990s benefited women more than it did men By 1995 there were two and a half times more women in the academy than in 1970 1 Abbott et al 2005 and in the decade to follow the numbers of women undergraduate students had overtaken men with a substantial minority of these being older non standard entrants Furthermore as Paula J Caplan 1997 3 argues Visions of the academic life draw us women toward it picturing an intellectual community whose members search with passion and integrity for Truth and Knowledge We imagine that in academia we shall find freedom from bias freedom from worldly struggles of power and wealth freedom to choose what to study and what to say and an environment characterized by tolerance and openness where everyone's energy is focused on the open exploration of ideas However whilst this may be the vision for some women it is important not to view this widening of female participation in higher education through rose tinted glasses
