about Marketing Mathias Elsässer,2022-03-22 Following Einstein s sentence Everything should be made as simple as possible but not simpler If you can t explain it simply you don t understand it well enough this book puts a spotlight on the complex marketing ecosystem from a physicist s point of view Today s marketing world is overcomplex CMOs face the challenge to transform their current target operating models towards a 100% customer centric and data driven way of working A journey from good old mad men toward math men marketing This book consists of three parts The first part strips down the complexity of the marketing universe to the leanest frame of reference and then brings back the complexity step by step in single dimensions Part two and three just follow these thoughts and provide a detailed description of 56 small atoms that can be used in a maturity assessment of your marketing How to use them in a broader transformation concludes the book In summary An end 2 end guideline how to pursue and master the transformation from mad men towards a math men marketing operating model Growth Strategy Seung-Joo Lee,2004 **Books in Print** ,1991 *Strategic and Financial Implications of New Product Quality in High-tech Industries* Hyun Sang Shin,2008 Kwajalein Atoll, U.S. Army Proposed Actions Including Proposed Strategic Defense Initiative Activities, Prepared by U.S. Army Strategic Defense Command ,1989

territories These networks aim to create a healthy fair localized and inclusive food supply model standing in contrast to the dominant corporate food system characterized by long haul complex and fragile supply chains Despite their potential SFNs such as community supported agriculture farmers markets and urban agriculture have not been thoroughly examined through the lens of economic geography and related interdisciplinary perspectives The current globalized food system is fraught with economic social and environmental issues including the marginalization of family farming environmental degradation and the loss of local knowledge and biodiversity SFNs offer a critical alternative by emphasizing small batch production environmental sustainability and social equity yet there remains a significant gap in understanding their full impact and potential This research topic aims to collate comprehensive research on Sustainable Food Networks SFNs with specific objectives identifying various SFN initiatives across different territories evaluating their spatial dimensions in global contexts and assessing policies that can enhance the social economic and environmental sustainability of food value chains Key questions include how alternative values are propagated within SFNs the critical spatial nodes for these values the role of urban and peri urban agriculture and the interplay between territorial conditions and SFN performance Additionally the research seeks to understand how SFNs compete with hegemonic value chains and the potential role of public policy in strengthening these networks To gather further insights into the complexities and potentials of SFNs we welcome articles addressing but not limited to the following themes The propagation and transfer of alternative values within SFNs Identification of critical spatial nodes for the reproduction of these values Roles of urban and peri urban agriculture in SFNs Relationships between territorial conditions governance and SFN performance Strategies employed by SFNs to tackle competition from corporate value chains The impact of SFNs on the surge of local organic and healthy food outlets The role of public policy in supporting and strengthening SFNs
