

# TEXT FEATURES

Text features refer to the organizational and structural elements of a text that generally help with navigating and meaning-making.

## OVERVIEW

A text feature is an element of a text that helps readers to make meaning of the text. They could be used to display information in easy-to-digest ways, help compel the storyline forward, help readers navigate a non-linear text, and structure data in an organized fashion. Without text features, we would simply have big blocks of text that would be tedious to read and comprehend.

## EXAMPLES

- **Graphs/Charts:** Visual representations of data. They help to illustrate and explain datasets and relationships between data in a fast and consumable way.
- **Table of Contents:** A list of titles or chapters and the page numbers where they start, usually located at the beginning of a book. They allow readers to navigate the book easily.

*The Picture and the Text* Robert MacDougall, 1914 Photo-texts Andy Stafford, 2010-01-01 What do photographs want Do they need any accompaniment in today's image saturated society Can writing inflect photography or vice versa in such a way that neither medium takes precedence Or are they in constant inexorable battle with each other Taking nine case studies from the 1990s French speaking world from France North Africa and the Caribbean this book attempts to define the interaction between non fictional written text caption essay fragment poem and photographic image Having considered three categories of intermediality between text and photography the collaborative the self collaborative and the retrospective the book concludes that the dimensions of their interaction are not simple and two fold visibility versus alongside textuality but threefold and therefore complex Thus the photo text as defined here is concerned as much with orality the demotic the popular the vernacular as it is with visual and written culture That text image collaborations give space to the spoken spectral traces of human discourse suggests that the key element of the photo text is its radical provisionality

**The Future of Text and Image** Ofra Amihay, Lauren Walsh, 2012-01-17 The question of the relation between the visual and the textual in literature is at the heart of an increasing number of scholarly projects and in turn the investigation of evolving visual verbal dynamics is becoming an independent discipline This volume explores these profound literary shifts through the work of twelve talented and in some cases emerging scholars who study text and image relations in diverse forms and contexts The inter medial conjunctures investigated in this book play with and against the traditional roles of the visual and the verbal The Future of Text and Image presents explorations of the incorporation of visual elements into works of literature of visual writing modes and of the textuality and literariness of images It focuses on the special potential literature offers for the combination of these two functions Alongside examinations of major forms and genres such as memoirs novels and poetry this volume expands the discussion of text and image relations

into more marginal forms for instance collage books the PostSecret collections of anonymous postcards and digital poetry In other words while exploring the destiny of text and image as an independent discipline this volume simultaneously looks at the very literal future of text and image forms in an ever changing technological reality The essays in this book will help to define the emergent practices and politics of this growing field of study and at the same time reflect the tremendous significance of the visual in today s image culture
