become a well developed human being you need to develop this mind And that is your primary religion You were born as a human being so the first and foremost goal of your life is to become a full fledged human being With the goal of life to know yourself and this worldly system always try to be alert Be diligent to make yourself a real and all round developed human being Whether you belong to a conventional religion by birth or intention your first identity is that you are a human being As a human being your main and fundamental religion is natural human religion ManavDharma And this normal human religion is the MahaDharma The main thing is to develop the human mind with overall well being We are here on an educational journey Gaining high to higher consciousness is the underlying purpose of human life Here the more we become conscious through knowledge experience the more we will benefit From a spiritual point of view nothing will go with us when we leave here except the consciousness First of all we have to understand what this MahaDharma really is MahaDharma is natural human religion our basic religion the religion of building people This religion is not comparable to any other conventional religion God and faith are not the foundation of this religion It is based on logic and spiritual science reasonable spirituality MahaDharma is completely different from the conventional religions *Some amazing scientific research papers of an Indian spiritual leader Maharshi MahaManas Sumeru Ray (Maharshi MahaManas),2022-12-20* The great doctrine of this time called MahaVad Mahaism written by Sumeru Ray alias Maharshi MahaManas contains a number of scientific theories and scientific research articles with evidences Sumeru Ray alias Maharshi MahaManas who has been working tirelessly almost all his life for the real human development and peace Here is the essence of Maharshi MahaManas s logic and science based modern doctrine called MahaVad The root cause of most man made problems suffering and misery is lack of sufficient knowledge and consciousness and mental illness Blind faith blind devotion superstition and violence hatred terrorism have all arisen from that Real human development and peace can only be achieved if proper mind development education and training are introduced all over the world And if real human development takes place then most of the human centered problems will be solved His revolutionary doctrine of human development called MahaVad contains many scientific theories and scientific articles with evidence Some of those scientific articles have been published in various international science journals as scientific research papers in the last part of 2021 And they have been admired by wise people Those research papers were compiled and published as a book for the people seeking knowledge Thanks Editor **The Bomb Doctor** Kirk Yeager,Selene Yeager,2024-05-21 A rare peek behind the curtain into boots on the ground in the lab scientific bomb forensics told with humanity heart and even a bit of humor This is not CSI What you encounter as a true bomb detective or Bomb Doctor as some in the FBI call me are fields of twisted metal containing soot covered fragments intermingled with human remains You have carnage and chaos As you wade into that sea of wailing sirens and screaming survivors awash with the stench of diesel fuel and decaying bodies your job is to ferret out forensic clues in a type of macabre scavenger hunt to ultimately reconstruct the scene and the explosive device and determine what happened and what the bomb looked like

before it was torn asunder None of this happens overnight Nor does it happen in a timeframe that can be neatly packaged in an hour long made for TV drama The scavenger hunt can take months or in the case of the infamous Collar Bomber seven painstaking years The work is worth every second and every horrific image that etches itself into your brain because it helps prevent new horrors Not all obviously We are not superheroes But unlike shooters who often just snap or seem to act out in random ways bombers almost always have a story one that follows an arc In The Bomb Doctor my goal is to explain that arc explode myths reconstruct reality and build an understanding of the reason and means behind the mayhem as well as pull back the curtain on the investigative process that brings bombers to justice

Bodies We've Buried Jarrett Hallcox, Amy Welch, 2007-05-01 Two National Forensic Science Institute administrators invite readers into what the Washington Post calls the Harvard of hellish violence the only hands on CSI school of its kind where students are trained in burial recovery with actual human remains With exclusive access to a world normally off limits to the public this is the first book to go behind the scenes of the ten week course that discloses the uncensored realities of burial exhumations and the fascinating art of forensic investigation

IRA, The Bombs and the Bullets A. R. Oppenheimer, 2008-10-16 In this groundbreaking title A R Oppenheimer tells how the Irish Republican Army became the most adept and experienced insurgency group the world has ever seen through their bombing expertise and how after generations of conflict it all came to an end The book is a comprehensive account of more than 150 years of Irish republican strategic tactical and operational details and an analysis of the IRA s mission doctrine targeting and acquisition of weapons and explosives As a leading expert on non conventional weapons and explosives Oppenheimer vividly presents the story

behind the bombs those who built and deployed them those who had to deal with and dismantle them and those who suffered or died from them He analyses where how and why the IRA s 19 000 bombs were built targeted and deployed and explores what the IRA was hoping to accomplish in its unrivaled campaign of violence and insurgency through covert acquisition training intelligence and counter intelligence Beginning with the Fenian Dynamiters in the second half of the nineteenth century Oppenheimer fully describes and assesses the impact of the pre 1970s bombing campaigns in Northern Ireland and England and the evolution of strategies and tactics during the Troubles He concludes with the decommissioning of an arsenal big enough to arm several battalions which included an entire home crafted missile system an unsurpassed range of improvised explosive devices IEDs and enough explosives to blow up several urban centres The author scrutinises the level of deadly improvisation that became the hallmark of the Provisional IRA s expertise and the ingenuity in its pioneering IED timing delay and disguise technologies and follows the arms race it carried on with the British Army and security services in a long war of mutual assured disruption He also provides an insight into the bombing equipment and guns in the vast IRA inventory held at Irish Police HQ in Dublin *Technical Reports* Institution of Structural Engineers (Great Britain),1918

With verbal glee Prcic serves up a darkly comic vision of the terrors and misunderstandings of immigration Shelf Awareness

Ismet Prcic's brilliant provocative and energetic debut novel is about a young Bosnian also named Ismet Prcic who has fled his war-torn homeland and is now struggling to reconcile his past with his present life in California. He is advised that in order to make peace with the corrosive guilt he harbors over leaving his family behind, he must write everything. The result is a great rattlebag of memories, confessions, and fictions. Sweetly humorous recollections of Ismet's childhood in Tuzla appear alongside anguished letters to his mother about the challenges of life in this new world. As Ismet's foothold in the present falls away, his writings are further complicated by stories from the point of view of another young man, real or imagined, named Mustafa who joined a troop of elite soldiers and stayed in Bosnia to fight. When Mustafa's story begins to overshadow Ismet's new world identity, the reader is charged with piecing together the fragments of a life that has become eerily unrecognizable even to the one living it. *Shards* is a thrilling read, a harrowing war story, a stunningly inventive coming-of-age, and a heartbreaking saga of a splintered family. Fierce, funny, and real, it also says much about war, exile, guilt, and fear. Chicago Sun Times Favorite Books of 2011

Explosives G I Brown, 2011-11-08 This entertaining and informative book tells the dramatic tale of explosives from gunpowder to the H bomb. Laying the emphasis on the lives of the people involved on the diverse uses of explosives and on their social and historical impact, the author relates a story of remarkable international and human endeavour. Many of those involved, Roger Bacon, Guy Fawkes, Alfred Nobel, Robert Oppenheimer, are famed worldwide; others such as C F Schonbein, William Bickford, Sir Frederick Abel, and Charles E Munroe, though less well known, also played critical roles. Alongside their achievements, this book highlights the uses and impact of explosives in both war and terrorism and in civil engineering, quarrying, mining, demolition, fireworks, manufacture, and shooting for sport. In many cases, explosives are seen to have had a significant historical impact, as for example in the early use of gunpowder in the American Civil War, the defeat of the Spanish Armada, and the worldwide opening up of canals and railways.
