

Making a Piecewise Linear Function:

$$1: m = \frac{1-2}{-3-4} = \frac{3}{1} = 3$$

$$y+2 = 3(x+4)$$

$$y = 3(x+4) - 2$$

$$2: m = \frac{0-1}{1-3} = \frac{-1}{-2} = \frac{1}{2}$$

$$y-1 = \frac{1}{2}(x+3)$$

$f(x) =$

Piecewise Linear Concordances And Isotopies:

Piecewise Linear Concordances and Isotopies Kenneth C. Millett, 1974 The geometrical techniques in piecewise linear topology are extended to the situation where one has a projection which must be preserved These include general position sunny collapsing and engulfing They are employed to study the relative homotopy groups of the simplicial spaces of concordances and isotopies and consequently give a proof of a parameterized version of Hudson's concordance implies isotopy theorem

A Multiple Disjunction Lemma for Smooth Concordance Embeddings Thomas Gehret Goodwillie, 1990 Requiring background in basic differential topology this book is aimed at researchers interested in the homotopy type of spaces of smooth embeddings and spaces of diffeomorphisms The author provides a proof of a useful connectivity estimate in the theory of concordances or pseudo isotopies generalizing Morlet's result from triads to n -ads The method of proof is a differentiable general position technique analogous to piecewise linear sunny collapsing

Surveys on Surgery Theory, Volume 2 Sylvain Cappell, Andrew Ranicki, Jonathan Rosenberg, 2014-09-08 Surgery theory the basis for the classification theory of manifolds is now about forty years old The sixtieth birthday on December 14 1996 of C. T. C. Wall a leading member of the subject's founding generation led the editors of this volume to reflect on the extraordinary accomplishments of surgery theory as well as its current enormously varied interactions with algebra analysis and geometry Workers in many of these areas have often lamented the lack of a single source surveying surgery theory and its applications Because no one person could write such a survey the editors asked a variety of experts to report on the areas of current interest This is the second of two volumes resulting from that collective effort It will be useful to topologists to other interested researchers and to advanced students The topics covered include current applications of surgery Wall's finiteness obstruction algebraic surgery automorphisms and embeddings of manifolds surgery theoretic methods for the study of group actions and stratified spaces metrics of positive scalar curvature and surgery in dimension four In addition to the editors the contributors are S.
