Subject Guide to Books in Print ,1997 *Books in Print Supplement* ,2002 **"Architecture and Pilgrimage, 1000?500 "** Deborah Howard,2017-07-05 Although there is an obvious association between pilgrimage and place relatively little research has centred directly on the role of architecture Architecture and Pilgrimage 1000 1500 Southern Europe and Beyond synthesizes the work of a distinguished international group of scholars It takes a broad view of architecture to include cities routes ritual topographies and human interaction with the natural environment as well as specific buildings and shrines and considers how these were perceived represented and remembered The essays explore both the ways in which the physical embodiment of pilgrimage cultures is shared and what we can learn from the differences The chosen period reflects the flowering of medieval and early modern pilgrimage The perspective is that of the pilgrim journeying within or embarking from Southern Europe with a particular emphasis on Italy The book pursues the connections between pilgrimage and architecture through the investigation of such issues as theology liturgy patronage miracles and healing relics and individual and communal memory Moreover it explores how pilgrimage may be regarded on various levels from a physical journey towards a holy site to a more symbolic and internalized idea of pilgrimage of the soul **The Publishers Weekly** ,1921

Beyond the Northlands Eleanor Rosamund Barraclough, 2016-10-19 In the dying days of the eighth century the Vikings erupted onto the international stage with brutal raids and slaughter The medieval Norsemen may be best remembered as monk murderers and village pillagers but this is far from the whole story Throughout the Middle Ages long ships transported hairy northern voyagers far and wide where they not only raided but also traded explored and settled new lands encountered unfamiliar races and embarked on pilgrimages and crusades The Norsemen travelled to all corners of the medieval world and beyond north to the wastelands of arctic Scandinavia south to the politically turbulent heartlands of medieval Christendom west across the wild seas to Greenland and the fringes of the North American continent and east down the Russian waterways trading silver skins and slaves *Beyond the Northlands* explores this world through the stories that the Vikings told about themselves in their sagas But the depiction of the Viking world in the Old Norse Icelandic sagas goes far beyond historical facts What emerges from these tales is a mixture of realism and fantasy quasi historical adventures and exotic wonder tales that rocket far beyond the horizon of reality On the crackling brown pages of saga manuscripts trolls dragons and outlandish tribes jostle for position with explorers traders and kings To explore the sagas and the world that produced them Eleanor Rosamund Barraclough now takes her own trip through the dramatic landscapes that they describe Along the way she illuminates the rich but often confusing saga accounts with a range of other evidence archaeological finds rune stones medieval world maps encyclopaedic manuscripts and texts from as far away as Byzantium and Baghdad As her journey across the Old Norse world shows by situating the sagas against the revealing background of this other evidence we can begin at least to understand just how the world was experienced remembered and imagined by this unique culture from the outermost edge of Europe so many centuries ago

Index to Book Reviews in Religion ,1987 **The Publishers' Trade List Annual** ,1985 **Describing the City, Describing the State** Sandra Toffolo, 2020-07-15 In *Describing the City Describing the State* Sandra Toffolo presents a comprehensive analysis of descriptions of the city of Venice and the Venetian Terraferma in the Renaissance when the Venetian mainland state was being created Working with an extensive variety of descriptions the book demonstrates that no one narrative of Venice prevailed in the early modern European imagination and that authors continuously adapted geographical descriptions to changing political circumstances This in turn illustrates the importance of studying geographical representation and early modern state formation together Moreover it challenges the long standing concept of the myth of Venice by showing that Renaissance observers never saw the city of Venice and the Venetian Terraferma in a monolithic way
