The Many Facets of Israel's Hydrogeology Uri Kafri, Yoseph Yechieli, 2020-11-09 This book presents a collection of essays that address various facets of the hydrogeology of Israel Despite its small geographic size Israel exhibits a variety of climates and is located between two regional fluctuating base levels The respective chapters discuss the variety of hydrogeological configurations and hydrological processes produced by these geographical circumstances In some cases the interpretation of these aspects is deliberately left open to debate because the authors were asked to provide in addition to their own views also alternative and even conflicting ones Hydrogeological configurations similar to those in Israel can be found in other countries around the world Therefore researchers scholars and professionals in this interdisciplinary field can benefit from and directly apply the considerable

experience and expertise that has been gathered in Israel over the past few decades The Makhteshim Country Boris R. Krasnov,2001 **Climate Changes during the Holocene and their Impact on Hydrological Systems** Arie S.

Issar,2004-08-05 It is now widely accepted that increasing concentrations of greenhouse gases in the atmosphere are causing higher global atmospheric temperatures However there is still a great deal of uncertainty about the likely effects of such a temperature rise on climate and even more about the impacts of climate change and variability on the world s hydrological regimes and socio economic systems Studying the effects of climate variability in the past can give clues as to possible future effects This volume provides a comprehensive review of the effects of climate variability on hydrological and human systems in the Holocene the last 10 000 years in various parts of the world The book concentrates on the regions bordering the Mediterranean Sea western and central Europe China Japan West and South Africa and the southwestern USA This book will be of value to researchers and professionals in hydrology climatology geology and historical geography *The Acheulian*

Recycling at the Late Lower Palaeolithic Qesem Cave, Israel Flavia Venditti,2019-04-09 Qesem Cave Israel acts here as

a case study to explore two important topics from the Middle Pleistocene the practice of recycling old discarded flakes for the production of new objects by means of recycling and the production of flakes and tools of small dimensions topics that have not gained sufficient attention from the scientific community An Investigation into Early Desert Pastoralism Steven A. Rosen, 2011-10-11 Negev focuses on two primary purposes one theoretical methodological and the second substantive Briefly stated the book comprises a case study of excavations at an early ca 2800 B C pastoral site in the Negev providing detailed analyses and a synthetic overview of a seasonal encampment from this early period in the evolution of desert pastoral societies It thus both demonstrates the feasibility of an archaeology of early mobile pastoralism and grapples with the basic anthropological and methodological issues surrounding the subject Substantively both the architectural and material culture assemblages uncovered constitute the first detailed analysis of this early desert culture and include materials previously unreported for the region and period Historically the Camel Site is placed in a larger perspective of the beginnings of multiresource nomadism in relation to the rise of complex societies *The Legacy of Tethys* F.D. Por, 2012-12-06 This book is an attempt to present a comprehensive view on the aquatic biogeography of a small but very dynamic and complex area of the globe Luckily this area called here the Levant has attracted much interest in the past and is being increasingly studied in the present The interphasing between the knowledge of the historical and formative processes and that of the recent distributional aspects is fairly good The recent years saw also a widening effort which expressed itself in several symposia and monographic books Therefore I considered it possible to treat the whole subject of the aquatic biogeography of the Levant singlehandedly rather than in the presently widespread manner of an edited book I am keenly conscious of the shortcomings of my approach of presenting much second hand information Possibly this is being compensated by the fact that this book has a more coherent structure and eventually a clearer scientific message The effort spent in synthesizing the data from the widely different sources hopefully pays off in a presentation which is more easily comprehended by the average reader For the suspicious reader I would recommend to read first the closing chapter of this book in which the quintessence of this book and its message is presented in a summarizing manner The Pre-Quaternary Geology of Israel Y. Yom-Tov, Zvi Garfunkel, Eitan Tchernov, 1988 **River Dynamics and Integrated River Management** Zhao-Yin Wang, Joseph H.W. Lee, Charles S. Melching, 2014-09-24 River Dynamics and Integrated River Management provides comprehensive information on rivers for integrated management including natural processes stresses resulting from human activities and restoration of various parts of the river basin including the watershed mountain streams alluvial rivers estuaries and natural and man made lakes Essential concepts traditional and modern such as river patterns step pool systems vegetation erosion charts habitat diversity and flushing times of bays are clearly defined physically and explained with figures and pictures Detailed mathematics and rigorous analyses are avoided so as to facilitate a holistic view of the subject of integrated river management Researchers can easily familiarize themselves with the science of river management in its widest sense with the

impressive pictures and examples in this book Dr Zhaoyin Wang is a professor at the Department of Hydraulic Engineering Tsinghua University China Dr Joseph H W Lee is a Chair Professor at the Department of Civil and Environmental Engineering The Hong Kong University of Science Technology China Dr Charles S Melching is a Professor at the College of Engineering Marquette University Milwaukee WI USA
