**Evidentiality and Epistemic Modality in Spanish (Semi-)Auxiliaries** Bert Cornillie, 2008-08-27 This volume presents a systematic and comprehensive analysis of the Spanish evidential semi auxiliaries parecer and resultar the modal

constructions with *amenazar* and *prometer* and the modal auxiliaries *poder* *deber* and *tener que*. These verbs have never been considered together in a global approach that transcends the classical verbal periphrases model. The book proposes a cognitive functional account of evidentiality and modality in Spanish with special attention to subjectivity and grounding. The theoretical reflection relies on empirical evidence of two sorts: synchronic and diachronic corpus analyses alternate with tests that measure the semantic and pragmatic compatibility of the evidential and epistemic constructions with specific sentences. Following the assumption that linguistic forms are determined by their meaning, the array of constructions that characterizes the different verbs justifies their grouping in three pairs of semi auxiliaries: *parecer* vs *resultar*, *amenazar* vs *prometer* and *poder* vs *deber*, *tener que*. The distributional differences observed in the corpus are further shown to correlate with different degrees of grammaticalization. Primarily intended for scholars working in the field of Spanish functional linguistics, the monograph is also relevant for grammaticalization studies and for cognitive semantic research at large. Given its combined theoretical and applied character, the volume is also of interest to anyone concerned with syntactic processes, lexical semantics or the wider area of discourse analysis and pragmatics.
