French Fortresses in North America 1535-1763 René Chartrand, 2013-03-20 Following the discovery of America by Columbus in 1492 European colonists brought their system of fortification to the New World in an attempt to ensure their safety and consolidate their conquests French and British explorers came later to North America and thus the establishment of their sizeable settlements only got under way during the 17th century The inhabitants of New France built elaborate fortifications to protect their towns and cities This book provides a detailed examination of the defenses of four of them Qu bec Montr al and Louisbourg in Canada and New Orleans in Louisiana

Architecture in Transition Kelly Crossman, 1987-11-01 However behind the public face of design architectural life in Canada during the 1880s and 1890s was in turmoil The Canadian public had lost confidence in its designers students were forced to study abroad to secure a first class education professional rivalry was unscrupulous architectural competitions a scandal American architects and their architecture were the fashion These things changed but not before the world of the Canadian architect had been turned on its head replaced by one which resembled the world of contemporary architects with professional organisations regulated standards formalised education centred in the universities and the belief that Canadian architecture should reflect local climates culture and geography Kelly Crossman provides the first analysis of this period Beginning with a review of the architectural milieu in Toronto and Montreal in the 1880s he traces the rise of professionalism as an idea and architectural nationalism as a goal His analysis is more a history of architectural ideas than a survey of forms It places the architecture of these years in an historical and ideological context demonstrating that it developed with its own logic in response to national and international factors During the two decades after 1885 Canadian architects grappled with problems whose long term implications they could not have foreseen the role of the architect in industrialised society the need to accommodate and integrate applied science and the need to express their own and their country s personality in architectural form By the beginning of this century they had begun to find their own voice The story of this process will be of interest not just to students and scholars but to anyone interested in the development of Canada and its architecture

Drawing on Architecture Jordan Kauffman, 2019-03-19 How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In Drawing on Architecture Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history Drawing on interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change **The**

Urban Form, 1200-1900 Terry R. Slater, Sandra M.G. Pinto, 2017-09-20 Towns are complicated places It is therefore not surprising that from the beginnings of urban development towns and town life have been regulated Whether the basis of regulation was imposed or agreed ultimately it was necessary to have a law based system to ensure that disagreements could be arbitrated upon and rules obeyed The literature on urban regulation is dispersed about a large number of academic specialisms However for the most part the interest in urban regulation is peripheral to some other core study and consequently there are few texts which bring these detailed studies together This book provides perspectives across the period between the high medieval and the end of the nineteenth century and across a geographical breadth of European countries from Scandinavia to the southern fringes of the Mediterranean and from Turkey to Portugal It also looks at the way in which urban regulation was transferred and adapted to the colonial empires of two of those nations *A History of*

Canadian Architecture Harold D. Kalman, Harold Kalman, 1994 The Making of the Nations and Cultures of the New World

Gérard Bouchard, 2008-03-03 The Making of the Nations and Cultures of the New World explores the question of how a culture a collective consciousness is born G rard Bouchard compares the histories of New World collectivities which were driven by a dream of freedom and sovereignty and finds both major differences and striking commonalities in their formation and evolution He also considers the myths and discursive strategies devised by elites in their efforts to unite and mobilize diversified populations **The Rhetoric of Canadian Writing** , 2021-11-22 The sixteen articles in The Rhetoric of Canadian Writing are a welcome contribution to the growing interest in Canadian culture indicating its variety Aboriginal Anglo Canadian and French Canadian culture and their interrelationships are all represented In classical oratory the term rhetoric

Québec monumental, 1890-1990 Luc Noppen,Hélène Jobidon,Paul Trépanier,1990 A l'aide de photos et de plans un bilan centenaire de l'architecture dans la ville et la région de Québec Quelques projets la fin précèdent les brèves biographies des intervenants et la bibliographie des monuments

Montreal, City of Spires Clarence Epstein,2012-03-19T00:00:00-04:00 Of the fifty religious buildings discussed in this book only a precious few remain standing despite the fact that Montreal boasts one of the largest and most eclectic groupings of Georgian and Victorian structures of any city in North America Following the British conquest of New France in 1759 a remarkable series of transformations took place in the small Catholic trading town of Montreal Given the diversity of settlers forced to live side by side the new church buildings that were to rise became strategic public spaces meeting places as well as power bases It was no wonder that by the time Mark Twain toured Canada s first metropolis in the 1880s he found that one could not throw a brick in the place without breaking a church window By addressing the social religious and architectural issues surrounding these colonial era structures it will become apparent that Montreal was at once a shining jewel in England s imperial crown a chief outpost of Catholicism in the New World as well as the British North American headquarters for more than a dozen independent congregations
