Subcommittee on Energy Research, Development, and Demonstration,1975 *Transforming Government and Public Services* Stephen Jenner,2016-02-24 This book distills the learning from practical experience and academic research and represents a significant contribution to the challenges we face in transforming government and public services in an environment of ever tighter finances John Suffolk UK Government Chief Information Officer Major public sector IT enabled business change programmes are designed to realize benefits in terms of more efficient services services tailored to the need of citizens and improved outcomes but in practice such benefits often fail to materialize or we are unable to demonstrate their delivery Transforming Government and Public Services provides proven tools techniques and processes to reverse this trend Stephen Jenner explores a number of key themes that are fundamental to an approach to project portfolio management built on value He explains how to develop a business case to achieve a desired intent rather than justify a particular solution create project documentation that is both technically rigorous and gives users a clear understanding of where you are going treat projects as investments rather than costs include stage gates with teeth that are closely linked to real performance plan for success rather than holding people to account for failure use a single version of the truth principle so there are no arguments about different data In a complex confusing and often highly politicized

environment Stephen Jenner's Transforming Government and Public Services provides a clear definitive and highly applied guide for all involved in selecting the right projects and doing them right so that they achieve the intended investment objectives

Planning, Development and Management of Sustainable Cities Tan Yigitcanlar, Md. (Liton) Kamruzzaman, 2019-04-30 The concept of sustainable urban development has been pushed to the forefront of policymaking and politics as the world wakes up to the impacts of climate change and the destructive effects of the Anthropocene Climate change has emerged to be one of the biggest challenges faced by our planet today threatening both built and natural systems with long term consequences which may be irreversible While there is a vast body of literature on sustainability and sustainable urban development there is currently limited focus on how to cohesively bring together the vital issues of the planning development and management of sustainable cities Moreover it has been widely stated that current practices and lifestyles cannot continue if we are to leave a healthy living planet to not only the next generation but also to the generations beyond The current global school strikes for climate action known as Fridays for Future evidences this The book advocates the view that the focus needs to rest on ways in which our cities and industries can become green enough to avoid urban ecocide This book fills a gap in the literature by bringing together issues related to the planning development and management of cities and focusing on a triple bottom line approach to sustainability
