## **Questions Patients Most Often Ask Their Doctors:**

**Doctor Goldman's Guide to Effective Patient Communication: Explanations of the Most Common Medical Conditions in Layperson's Terms and Helpful Provider-Patient Interactions** Dr. Kissinger Goldman, 2023-07-18 Doctor Goldman's Guide to Effective Patient Communication Explanations of the Most Common Medical Conditions in Layperson's Terms and Helpful Provider-Patient Interactions is an important resource for doctors, clinicians, administrators, faculty, and students in the health professions. It contains instruction and learning objectives for interpersonal communication skills with self-assessment and self-awareness tools for the betterment of patient care as well as patient and provider experience. Giving case studies in a variety of patient care environments, Dr. Goldman utilizes contemporary terminology and references to master fundamental skills to help facilitate effective doctor-patient interaction when communicating diagnosis, prognosis, treatment, and recovery.

**100 Questions & Answers about High Blood Pressure (Hypertension) , Field Guide to the Difficult Patient Interview** Frederic W. Platt, Geoffrey H. Gordon, 2004 Written by physicians skilled at coaching colleagues in physician-patient communication, this pocket guide presents practical strategies for handling a wide variety of difficult patient interviews. Each chapter presents a hypothetical scenario, describes effective communication techniques for each phase of the interaction, and identifies pitfalls to avoid. The presentation includes examples of physician-patient dialogue, illustrations showing body language, and key references. This edition includes new chapters on caring for physician patients, communicating with colleagues, disclosing unexpected outcomes and medical errors, shared decision making, and informed consent, and teaching communication skills. Other new chapters describe clinical attitudes such as patience, curiosity, and hope.

**Aspects of the Computer-based Patient Record** Harold P. Lehmann, Patricia A. Abbott, Nancy K. Roderer, Adam Rothschild, Steven Mandell, Jorge Ferrer, Robert E. Miller, Marion J. Ball, 2013-06-29 One of the hottest political issues today concerns ways to improve national healthcare systems without incurring further costs. An extensive study by the Institute of Medicine (IOM) in the United States formally reported that computer-based patient records are absolutely necessary to help contain the cost explosion in health care. The information obtained from experts, the studies conducted, and the conclusions that went into the IOM's report have now been collected in *Aspects of the Computer-Based Patient Record*. A large portion of the volume discusses the state of the art in existing computer-based systems as well as the essential needs which must be addressed by future computer-based patients' records. A final section in the book discusses implementation strategies for changing to the electronic system and practical issues: Who will bear the final cost? How and when will healthcare providers who use the system be trained? This volume contains the concise, valuable information which hospital administrators, hospital systems designers, third-party payer groups, and medical technology providers will need if they hope to successfully transit to hospital systems which use a computer-based patient record.

**A Textbook of General Practice 3E** Patrick White, Ann Wylie, 2011-12-30 An essential guide to general practice and being a general practitioner. *A Textbook of General Practice* is

written specifically with the medical student and foundation doctor in mind Reflecting current practice the book does not seek to reiterate the content of a general medical textbook but instead teaches the fundamental principles of general practice The coverage is comprehensive with everything the undergraduate student or foundation doctor will encounter in a general practice module or rotation The skills and knowledge presented can usefully be applied to all areas of clinical practice With practical exercises throughout the book readers are encouraged to learn through doing Quotes from students and tutors offer insights into personal experience while thinking and discussion points encourage reflection New features in this edition include improved organization red flag pointers to serious illnesses and SBA style self assessment questions With content entirely updated to reflect the latest recommendations from Tomorrow s Doctors the third edition of A Textbook of General Practice is the number one choice for undergraduates seeking a narrative introduction to this important discipline

fundamental and practical knowledge about research methodology that is essential for health care chaplains and students and professionals in other health care fields and the social sciences The chapters in this book were originally published as articles in the Journal of Health Care Chaplaincy      Evidence-based Pediatrics and Child Health Virginia Moyer,Elizabeth Elliott,2008-04-15 Evidence Based Pediatrics and Child Health is a ground breaking new text on pediatrics and child care management using evidence based approach It covers all the major childhood conditions and contains the features of both a handbook and a reference text Each chapter combines both advice on management and how best to practice evidence based medicine with reviews of all the available evidence in a specific area The goal of the book is to help pediatricians and others who care for children to provide the best possible care by combining the best most current evidence with special circumstances of each individual patient      **Skills for Communicating with Patients** Jonathan Silverman,Suzanne Kurtz,Juliet Draper,2016-03-09 Skills for Communicating with Patients Third Edition is one of two companion books on improving communication in medicine which together provide a comprehensive approach to teaching and learning communication skills throughout all levels of medical education in both specialist and family medicine Since their publication the first edition of thi      **Language, Corpora, and Technology in Applied Linguistics** Muhammad Afzaal,Swaleha Bano Naqvi,Geng Qiang,2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so

realistic in today's market that translation educators have to face the shock wave it brought to translation learners and practitioners and rethink the relation between human translators and algorithms. Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation. Thus understood, it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies. This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research. We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres. Papers addressing the highlighted topics are especially welcome. In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world.

*What Kind of Death* Govert den Hartogh, 2022-10-31 Many books have been published about physician assisted death. This book offers a comprehensive and in depth examination of that subject but it also extends the discussion to a broader range of end of life decisions including suicide, palliative care and sedation until death. In every jurisdiction that has laws permitting some kind of physician assisted death, a central point of controversy is whether such assistance should only be available to dying patients or to everyone who wants to end his life. The right to determine the manner and time of one's own death however does not necessarily mean that physicians should be permitted to cooperate in ensuring a quick and peaceful death. In this book Govert den Hartogh considers the fundamental and practical matters including concrete issues of legal regulation related to end of life decision making. He proposes a two tiered system. Everyone should have access to humane means of ending his life if his decision to end it is voluntary, well considered and durable. But doctors should only participate in a joint action of ending the patient's life on his request if they also are convinced of acting in the patient's best interests in particular by ending intolerable and unrelievable suffering. And perhaps there is reason to restrict that second service to dying patients. The whole argument however depends on the extent to which in both tiers of the system we can design legal safeguards that will enable us to trust judgments about the requesting person's request and about his suffering. The book considers much new evidence in regard to this issue. *What Kind of Death* will appeal to researchers and advanced students working in bioethics, applied ethics, philosophy of law and health law.
