Quick and Easy Internet Activities for the One-Computer Classroom Jordan Brown,2001-12 From its causes and impacts to its solutions the issues surrounding climate change involve multidisciplinary science and technology This handbook addresses all aspects of energy in the context of mitigation of atmospheric carbon and resultant climate change **Weather** Mary Kay Carson,2002-02 Contains twenty reproducible web based activities designed to help students in grades six through eight learn about the weather Learner-Centered Teaching Activities for Environmental and Sustainability Studies Loren B. Byrne,2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information develop skills via hands on engagement and encourage personal reflection through metacognitive tasks In addition learner centered classroom approaches may challenge students preconceived notions and expand their thinking by confronting them with thought provoking statements tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work group discussions service and project based learning and student led research among others Unfortunately it is often not possible to use some of these valuable methods in all course situations given constraints of money space instructor expertise class meeting and instructor preparation time and the availability of prepared lesson plans and material Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses The broad goal of this volume is to help advance environmental education practices that help increase students environmental literacy Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge skills and personal views about many contemporary environmental and sustainability issues e-World 7 Anshu Kumar, Shweta Malik, e-World 8 Anshu Kumar, Shweta Malik, **Instructional Technology and Media for Learning** Sharon E.
