Redefining Urban And Suburban America Evidence From Census 2000 Volume 2:

Redefining Urban and Suburban America Robert Lang, Bruce Katz, Alan Berube, 2014 Results from Census 2000 continue to reveal the striking changes taking place in the nation's cities and suburbs during the 1990s. Thanks to a decade of strong economic growth, concentrated poverty in inner cities declined dramatically, homeownership rose among young minority households, and workers from abroad settled in growing metropolitan areas that had experienced little immigration to date. This second volume in the Redefining Urban and Suburban America series makes clear, however, that regional differences add texture to these broader social and economic trends. Using data from the Census long form, the contributors to this book probe migration, income, and poverty and housing trends in the nation's largest cities and metropolitan areas. Economically, the fast-growing Sunbelt and the Midwest performed well in the 1990s, enjoying declining poverty rates, rising homeownership, and the evolution of a solid middle-class population. Cities like San Antonio, Chicago, Houston, and Columbus saw stunning declines in high-poverty neighborhoods. The story was more mixed in the coastal areas of the Northeast and West, where poverty rates rose in cities such as Boston, New York, Washington, and Los Angeles. On net, their metro areas lost residents to other parts of the United States, even as they gained workers and families from abroad. This volume provides a closer look at the unprecedented social and economic changes taking place in the nation's oldest and newest communities and explores the implications for a diverse set of policy areas, including metropolitan development patterns, immigrant incorporation, and the promotion of affordable housing and homeownership.

Redefining Urban and Suburban America
Bruce Katz, Robert E. Lang, 2004-05-13 The early returns from Census 2000 data show that the United States continued to undergo dynamic changes in the 1990s, with cities and suburbs providing the locus of most of the volatility. Metropolitan areas are growing more diverse, especially with the influx of new immigrants; the population is aging, and the make-up of households is shifting. Singles and empty nesters now surpass families with children in many suburbs. The contributors to this book review data on population, race, and ethnicity and household composition provided by the Census's short form and attempt to respond to three simple queries: Are cities coming back? Are all suburbs growing? Are cities and suburbs becoming more alike? Regional trends muddy the picture. Communities in the Northeast and Midwest are generally growing slowly, while those in the South and West are experiencing explosive growth. Warm, dry places grew; cold, wet places declined. Note two authors: Some cities are robust, others are distressed. Some suburbs are bedroom communities, others are hot employment centers, while still others are deteriorating. And while some cities' cores may have been intensely developed, including those in the Northeast and Midwest, and seen population increases, the areas surrounding the cores may have declined significantly. Trends in population confirm an increasingly diverse population in both metropolitan and suburban areas, with the influx of Hispanic and Asian immigrants and with majority populations of central cities, for the first time, being made up of minority groups. Census 2000 also reveals that the overall level of black-to-nonblack segregation has reached its lowest point since

1920 although high segregation remains in many areas *Redefining Urban and Suburban America* explores these demographic trends and their complexities along with their implications for the policies and politics shaping metropolitan America The shifts discussed here have significant influence *Twenty-First Century Gateways* Audrey Singer, Susan W.

Hardwick, Caroline B. Brettell, 2009-04-01 While federal action on immigration faces an uncertain future states cities and suburban municipalities craft their own responses to immigration *Twenty First Century Gateways* focuses on the fastest growing immigrant populations in metropolitan areas with previously low levels of immigration places such as Atlanta Austin Charlotte Dallas Fort Worth Minneapolis St Paul Phoenix Portland Sacramento and Washington D C These places are typical of the newest largest immigrant gateways to America characterized by post WWII growth recent burgeoning immigrant populations and predominantly suburban settlement More immigrants both legal and undocumented arrived in the United States during the 1990s than in any other decade on record That growth has continued more slowly since the Great Recession nonetheless the U S immigrant population has doubled since 1990 Many immigrants continued to move into traditional urban centers such as New York Chicago and Los Angeles but burgeoning numbers were attracted by the economic and housing opportunities of fast growing metropolitan areas and their largely suburban settings The pace of change in this new geography of immigration has presented many local areas with challenges social fiscal and political Edited by Audrey Singer Susan W Hardwick and Caroline B Brettell *Twenty First Century Gateways* provides in depth comparative analysis of immigration trends and local policy responses in America s newest gateways The case examples by a group of leading multidisciplinary immigration scholars explore the challenges of integrating newcomers in the specific gateways as well as their impact on suburban infrastructure such as housing transportation schools health care economic development and public safety The changes and trends dissected in this book present a critically important understanding of the reshaping of the United States today and the future impact of *The Futures of the City Region* Michael Neuman, Angela Hull, 2013-09-13 Does the city region constitute a new departure in urbanisation If so what are the key elements of that departure The realities of the urban in the 21st century are increasingly complex and polychromatic The rise of global networks enabled by supranational administrations both governmental and corporate strongly influences and structures the management of urban life How we conceive the city region has intellectual and practical consequences First in helping us grasp rapidly changing realities and second in facilitating the flow of resources ideas and learning to enhance the quality of life of citizens Two themes interweave through this collection within this broad palette First are the socio spatial constructs and their relationship to the empirical evidence of change in the physical and functional aspects of urban form Second is what they mean for the spatial scales of governance This latter theme explores territorially based understandings of intervention and the changing set of political concerns in selected case studies In efforts to address these issues and improve upon knowledge this collection brings together international scholars building new data driven cross disciplinary theories to

create new images of the city region that may prove to supplement if not supplant old ones The book illustrates the dialectical interplay of theory and fact time and space and spatial and institutional which expands on our intellectual grasp of the theoretical debates on city regions through practical knowing citing examples from Europe the United States Australasia and beyond This book was originally published as a Special Issue of Regional Studies *Transforming Race and Class in Suburbia* T. Vicino, 2008-06-09 Just as the nation witnessed the widespread decay of urban centers there is a mounting suburban crisis in first tier suburbs the early suburbs to develop in metropolitan America These places once the bastion of a large middle class have matured and experienced three decades of social and economic decline In the first comprehensive analysis of suburban decline for an entire region Vicino uses Baltimore as an illustrative case to chronicle how first tier suburbs experienced widespread decline while outer suburbs flourished since the 1970s At the brink of the twenty first century Vicino illustrates how the processes of deindustrialization racial diversity and class segregation have shaped the evolution of suburban decline **Redefining Urban and Suburban America** Alan Berube, Bruce Katz, Robert E. development since World War II Ethnographies of Neoliberalism Carol J. Greenhouse, 2012-02-25 Since 2008 the global economic crisis has exposed and deepened the tensions between austerity and social security not just as competing paradigms of recovery but also as fundamentally different visions of governmental and personal responsibility In this sense the core premise of neoliberalism the dominant approach to government around the world since the 1980s may by now have reached a certain political limit Based on the premise that markets are more efficient than government neoliberal reforms were pushed by powerful national and transnational organizations as conditions of investment lending and trade often in the name of freedom In the same spirit governments increasingly turned to the private sector for what were formerly state functions While it has become a commonplace to observe that neoliberalism refashioned citizenship around consumption the essays in this volume demonstrate the incompleteness of that image as the social limits of neoliberalism are inherent in its very practice Ethnographies of Neoliberalism collects original ethnographic case studies of the effects of neoliberal reform on the conditions of social participation such as new understandings of community family and gender roles the commodification of learning new forms of protest against corporate power and the restructuring of local political institutions Carol J Greenhouse has brought together scholars in anthropology communications education English music political science religion and sociology to focus on the emergent conditions of political agency under neoliberal regimes This is the first volume to address the effects of neoliberal reform on people's self understandings as social and political actors The essayists consider both the positive and negative unintended results of neoliberal reform and the theoretical contradictions within neoliberalism as illuminated by circumstances on the ground in Africa Europe South America Japan Russia and the United States With an emphasis on the value of ethnographic methods for understanding neoliberalism's effects around the world in our own times Ethnographies of Neoliberalism uncovers how people realize for themselves the limits of the market and act accordingly from their own understandings of partnership and solidarity Revisiting Rental Housing Nicolas P. Retsinas, Eric S. Belsky, 2008-07-01 Rental housing is increasingly recognized as a vital housing option in the United States Government policies and programs continue to grapple with problematic issues however including affordability distressed urban neighborhoods concentrated poverty substandard housing stock and the unmet needs of the disabled the elderly and the homeless In Revisiting Rental Housing leading housing researchers build upon decades of experience research and evaluation to inform our understanding of the nation's rental housing challenges and what can be done about them It thoughtfully addresses not only present issues affecting rental housing but also viable solutions The first section reviews the contributing factors and primary problems generated by the operation of rental markets In the second section contributors dissect how policies and programs have or have not dealt with the primary challenges what improvements if any have been gained and the lessons learned in the process The final section looks to potential new directions in housing policy including integrating best practices from past lessons into existing programs and new innovations for large scale long term market and

policy solutions that get to the root of rental housing challenges Contributors include William C Apgar Harvard University Anthony Downs Brookings Rachel Drew Harvard University Ingrid Gould Ellen New York University George C Galster Wayne State University Bruce Katz Brookings Jill Khadduri Abt Associates Shekar Narasimhan Beekman Advisors Rolf Pendall Cornell University John M Quigley University of California Berkeley James A Riccio MDRC Stuart S Rosenthal Syracuse University Margery Austin Turner Urban Institute and Charles Wilkins Compass Group
