Grammich, Allan Abrahamse, 2003-09-12 To assess whether an initiative to reduce gun violence that had been successful in Boston could be adapted for use elsewhere researchers selected an East Los Angeles area for a similar intervention that was to include both law enforcement and social service components Although the latter component was not widely available when the intervention began researchers found that the intervention helped reduce violent and gang crime in the targeted districts and that crime also decreased in surrounding communities

Firearms and Violence National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee to Improve Research Information and Data on Firearms, 2005-01-13 For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics For public authorities to make reasonable decisions on these matters they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion In performing these tasks legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies Readers of the research literature on firearms may sometimes

find themselves unable to distinguish scholarship from advocacy Given the importance of this issue there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research Firearms and Violence uses conventional standards of science to examine three major themes firearms and violence the quality of research and the quality of data available The book assesses the strengths and limitations of current databases examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved
