Mirrors and Reflections Alexandre V. Borovik, Anna Borovik, 2009-11-07 *Mirrors and Reflections* presents a systematic and elementary introduction to the properties of finite groups generated by reflections The approach is based on fundamental geometric considerations in Coxeter complexes and emphasizes the intuitive geometric aspects of the theory of reflection groups The exposition is directed at advanced undergraduates and first year graduate students and features a large number of exercises at various levels of difficulty *Mirrors and Mirroring from Antiquity to the Early Modern Period* Maria Gerolemou, Lilia Diamantopoulou, 2020-01-09 This volume examines mirrors and mirroring through a series of multidisciplinary essays especially focusing on the intersection between technological and cultural dynamics of mirrors The international scholars brought together here explore critical questions around the mirror as artefact and the phenomenon of mirroring Beside the common visual registration of an action or inaction in a two dimensional and reversed form various types of mirrors often possess special abilities which can produce a distorted picture of reality serving in this way illusion and falsehood Part I looks at a selection of theory from ancient writers demonstrating the concern to explore these same questions in antiquity Part II considers the role reflections can play in forming ideas of gender and identity Beyond the everyday we see in Part III how oracular mirrors and magical mirrors reveal the invisible divine prosthetics that allow us to look where the eye cannot reach Finally Part IV considers mirrors roles in displaying the visible and invisible in antiquity and since

NASA Technical Translation, 1967 **Vertical-Cavity Surface-Emitting Laser Devices** Herbert Li, Kenichi Iga, 2013-04-17 Explains in detail the basics theory design fabrication and operation of vertical cavity surface emitting lasers All the chapters are written by pioneers and key experts who have exclusive access to the most up to date innovations in the respective fields

Mathematical Models of Financial Derivatives Yue-Kuen Kwok, 2008-07-10 Objectives and Audience In the past three decades we have witnessed the phenomenal growth in the trading of financial derivatives and structured products in the financial markets around the globe and the surge in research on derivative pricing theory Leading financial institutions are hiring graduates with a science background who can use advanced analytical and numerical techniques to price financial derivatives and manage portfolio risks a phenomenon coined as Rocket Science on Wall Street There are now more than a hundred Master level degree programs in Financial Engineering Quantitative Finance Computational Finance on different continents This book is written as an introductory textbook on derivative pricing theory for students enrolled in these degree programs Another audience of the book may include practitioners in quantitative teams in financial institutions who would like to acquire the knowledge of option pricing techniques and explore the new development in pricing models of exotic structured derivatives The level of mathematics in this book is tailored to readers with preparation at the advanced undergraduate level of science and engineering majors in particular basic proficiencies in probability and statistics differential equations numerical methods and mathematical analysis Advance knowledge in stochastic processes that are relevant to the

martingale pricing theory like stochastic differential calculus and theory of martingale are introduced in this book The cornerstones of derivative pricing theory are the Black Scholes Merton pricing model and the martingale pricing theory of financial derivatives

Elements of the Theory of Elliptic Functions Naum Il'ich Akhiezer, This book contains a systematic presentation of the theory of elliptic functions and some of its applications A translation from the Russian this book is intended primarily for engineers who work with elliptic functions It should be accessible to those with background in the elements of mathematical analysis and the theory of functions contained in approximately the first two years of mathematics and physics courses at the college level

Physics of Collisional Plasmas Michel Moisan, Jacques Pelletier, 2012-06-20 This text is an introduction to the physics of collisional plasmas as opposed to plasmas in space It is intended for graduate students in physics and engineering The first chapter introduces with progressively increasing detail the fundamental concepts of plasma physics The motion of individual charged particles in various configurations of electric and magnetic fields is detailed in the second chapter while the third chapter considers the collective motion of the plasma particles described according to a hydrodynamic model The fourth chapter is most original in that it introduces a general approach to energy balance valid for all types of discharges comprising direct current DC and high frequency HF discharges including an applied static magnetic field The basic concepts required in this fourth chapter have been progressively introduced in the previous chapters The text is enriched with approx 100 figures and alphabetical index and 45 fully resolved problems Mathematical and physical appendices provide complementary information or allow to go deeper in a given subject

Coxeter Matroids Alexandre V. Borovik, Israel M. Gelfand, Neil White, 2012-12-06 Matroids appear in diverse areas of mathematics from combinatorics to algebraic topology and geometry This largely self contained text provides an intuitive and interdisciplinary treatment of Coxeter matroids a new and beautiful generalization of matroids which is based on a finite Coxeter group Key topics and features Systematic clearly written exposition with ample references to current research Matroids are examined in terms of symmetric and finite reflection groups Finite reflection groups and Coxeter groups are developed from scratch The Gelfand Serganova theorem is presented allowing for a geometric interpretation of matroids and Coxeter matroids as convex polytopes with certain symmetry properties Matroid representations in buildings and combinatorial flag varieties are studied in the final chapter Many exercises throughout Excellent bibliography and index Accessible to graduate students and research mathematicians alike Coxeter Matroids can be used as an introductory survey a graduate course text or a reference volume

[Wireless Power Transfer for Electric Vehicles and Mobile Devices](#) Chun T. Rim, Chris Mi, 2017-08-07 From mobile cable free re charging of electric vehicles smart phones and laptops to collecting solar electricity from orbiting solar farms wireless power transfer WPT technologies offer consumers and society enormous benefits Written by innovators in the field this comprehensive resource explains the fundamental principles and latest

advances in WPT and illustrates key applications of this emergent technology Key features and coverage include The fundamental principles of WPT to practical applications on dynamic charging and static charging of EVs and smartphones Theories for inductive power transfer IPT such as the coupled inductor model gyrator circuit model and magnetic mirror model IPTs for road powered EVs including controller compensation circuit electro magnetic field cancel large tolerance power rail segmentation and foreign object detection IPTs for static charging for EVs and large tolerance and capacitive charging issues as well as IPT mobile applications such as free space omnidirectional IPT by dipole coils and 2D IPT for robots Principle and applications of capacitive power transfer Synthesized magnetic field focusing wireless nuclear instrumentation and future WPT A technical asset for engineers in the power electronics internet of things and automotive sectors Wireless Power Transfer for Electric Vehicles and Mobile Devices is an essential design and analysis guide and an important reference for graduate and higher undergraduate students preparing for careers in these industries
